I presume this is meant as a pledge to be redeemed after a monetary offering; but the custom is not a common one, as if a spectator happens to be sitting to the front of the theatre, it is not at all pleasant to be suddenly extinguished by the living sense of a candle in the dark.

THE PROPHECY OF HABAKUK. If, overlooking his inspiration, we were to subject the writings of this prophet to the standard of literary criticism, it might well be said that the style is of the most ordinary.

RETURNED. Through the kindness of God, we are home again, much rested, and considerably improved in health.

THE ADVANCE AND THE SABBATH.

The Advance of June 17th, under heading "The Expositor," has the following:

Another correspondent complains that friends of his Christian relatives and friends have been drawn away by those who insist that the seventh day of the week is the proper and only Sabbath, the only day so named in Scripture, and the one indicated in the fourth commandment.

It is claimed that the Greek word used by Paul could not mean the seventh-day rest, because it is in the plural form, "Sabbaths," and not "the Sabbath."

de refers at all to the Sabbath in this place, whether Jewish or Christian; his *ton Sabbathon, of Sabbaths, or weeks*, most probably refers to their *feasts of weeks*: of which much has been said in the notes on the Pentateuch.

It would be easy to multiply citations, classical and explanatory, to show that *Sabbaton*, in Col. 2: 16, can fairly be taken in no other than its plural form.

The Sabbath Recorder.

HAS GOD CHANGED?

This is a strange question; but it is suggested by reading the remarks of the American Presbyterian, concerning "Thoughts Suggested by the Perusal of Gillilan and other Authors on the Sabbath," as published in the Recorder of July 22d, as follows:

"For our part, setting aside the propriety of observing the amazing fact of the Resurrection, we regard the suffering of a slip, so to speak, in the exact time of the observance of the Sabbath by the primitive church, the best evidence in the world that Christianity is not the religion of small punctilios and of the artificial conscience which Baptists, both of the First and Seventh-day sort, would make of it.

enlightened. And our fathers have worshipped Baal from the days of Moses until now. This shows that ours is not the religion of small punctilios."

There will be people drift, when such is the language of the teachers of religion? Has God changed? Does he not require Christians to do what he has said?

at all efforts to elevate woman in any way, who belittle and debase man. It is those who are content to be the goddesses of man's sentiments, and the slaves of his passions—those who like to be talked of as angels, while they are treated as chattels—not those who stand up bravely, and assert their equal claim to human rights and human privileges.

There are some who talk much of woman's rights, and think very little of woman's duties. Very true. So there are some who talk much of man's rights, and think very little of man's duties.

CO-OPERATION. Dear Sir:—Some weeks since, there appeared in the Advent Review and Sabbath Herald the Minutes of the General Conference of the Seventh-day Adventists, an item of which was the appointment of a Committee to present an Address in their behalf to the Seventh-day Baptists; upon which a writer, under the signature M. Quad, proceeded to discuss...

CHENANGO VALLEY. The columns of the Sabbath Recorder, under the title of the Chenango Valley, and running through the columns of Madison, Chenango, and the Chenango Valley, read its entire length, by the river, from which the name is derived. It contains a full and complete description of the valley, its scenery, its soil, its climate, its products, its manufactures, its commerce, its population, its history, its present condition, and its future prospects.

TELEGRAPH IN GREAT BRITAIN. The bill for the purchase of the telegraphic lines throughout Great Britain has received the royal assent, and will soon go into effect. An exchange, in noticing the bill, says that the Government purpose extending telegraphic communication to the whole of the large towns, to all the second-rate towns having railway stations, and to places in which there are either telegraph or railway stations. It is contemplated to serve, under the new arrangement, 3,975 telegraph offices, and to have 842 branch offices, instead of the 247 existing at present. There is now one telegraph office to every 18,000 of the population; the Government will have one office to every 3,000 of the population.

ROMANCE OF CONVENT LIFE.—It tends very materially to disabuse the mind of all notions about the peace and serenity of convent life, to read a paragraph like the following, which the Presbyterian takes from the statement of an ex-convent:—"Perhaps the most cruel chastisement of all in a convent is that of describing a cross upon the floor with the tongue. I have seen this penance performed through the length and breadth of the refectory, a large hall capable of seating two hundred persons, and made one mass of sores. The track begins to red with blood; but the cross must be completed. The blood flows copiously; but there is no pity, no respite; and long before the task is completed, the inmates are reduced to a state of insensibility. He reached Susquehanna from New York at 3.10 in the afternoon, and after inspecting the extensive shops of the railway at that place, left in a special train for Hornellsville. At 4.15 he reached Hornellsville, and was met by a large number of people, who were waiting to see him. He was accompanied by a delegation of leading citizens. A large concourse of people were at the depot to welcome him. The train was delayed about 15 minutes, and during the time hundreds crowded around the car to see him. He left for Corry, Pa., where he expects to spend a few days in the oil regions.

RAILROAD WAR. A Railroad War existed in the State of New York, during two or three days of last week, which threatened to assume serious proportions. It seems that the managers of the Erie Railroad have been buying up the stock of the Albany and Susquehanna Railroad for the purpose of controlling it. The managers of the New York Central Railroad, or a clique in Albany, also wished to control it, and both parties claimed to own stock enough to entitle them to do so. Both resorted to the courts to obtain injunctions, and got receivers appointed, and each held a part of the road. Under these circumstances, the Governor threatened to interfere, declare the line of the road a state of insurrection, call out the militia, and appoint officers to run the road for the public accommodation. This led the billigents to agree upon officers to be appointed by the Governor to manage the road, while the conflicting parties fight the case out before the courts.

WANTED AGENTS. NIGHT SCENES. BIBLE. HON. GEORGE W. WOODWARD, Chief Justice of the Supreme Court of Pennsylvania, writes: "I consider 'Hoodland's German Bitters' a valuable medicine in cases of indigestion or Dyspepsia. I can testify this from my own experience, with respect to James Thompson."

HOODLAND'S GERMAN BITTERS. A combination of all the ingredients of the Bitters, with pure Sassafras Bark, Orange Peel, and other valuable ingredients, has been made up in Germany at the medicinal works of Dr. J. C. Hoopland, in cases of indigestion or Dyspepsia. There is no adulteration of these Bitters, and they are the only ones of the kind used in compounding the Bitters, hence the medicinal value of the Bitters is not lost. Hoodland's German Bitters is the only one of the kind used in compounding the Bitters, hence the medicinal value of the Bitters is not lost.

COMING ELECTIONS.—The following is a list of State Elections soon to be held. Sept. 7.—Vermont, State officers and Legislature. Sept. 13.—Maine, State officers and Legislature. Oct. 5.—Colorado, delegates to Congress. Oct. 12.—Pennsylvania, State officers and Legislature. Oct. 12.—Ohio, State officers and Legislature. Oct. 12.—Iowa, State officers and Legislature. Oct. 20.—New York, Secretary of State, Legislature, etc. Nov. 2.—New Jersey, Legislature. Nov. 2.—Massachusetts, State officers and Legislature. Nov. 2.—Minnesota, State officers and Legislature. Nov. 2.—Wisconsin, State officers and Legislature. Nov. 3.—Texas, New Constitution and State officers. Nov. 3.—Mississippi, New Constitution and State officers.

TEMPERANCE AND POLITICS.—On the 11th of August, a State Convention of Temperance men was held at Hartford, Conn., to appoint delegates to the National Temperance Convention, and to consult upon the organization of an independent political temperance party in Connecticut. The following resolution embodies the sentiment adopted: Resolved, That as temperance voters of Connecticut we announce as a platform of First—No license in any form, or under any circumstances, for the sale of alcoholic drinks as a beverage. Second—The absolute and entire prohibition of the manufacture, importation or sale of intoxicating liquors for medicinal purposes.

STEARNS HAS LATELY met a pretty severe rebuke in New York, in the trial and punishment of six Wall-street brokers, who were indicted for taking a bribe of \$100,000 from the Standard Oil Company. They were all members of well-known and leading firms, and on being brought to trial, they pleaded guilty, and submitted to the sentence of the Judge. He imposed fines, varying from \$250 to \$500, on the whole, six, and in the case of two of them he superadded imprisonment—one for five days and the other for ten days, in the city prison. The two who were sentenced to double punishment gave the officers some trouble in serving the process for their arrest, and thus provoked the wrath of the Judge. One of those who were sentenced to imprisonment was Mr. Russell Sage, well known as a public man in New York, and formerly a member of Congress from the Rensselaer district.

MONUMENTAL BLOCK OF GRANITE.—A block of granite of unprecedented size has recently been quarried at Monson, Mass. This slab is 350 feet long, fourteen feet wide, and four feet thick, containing 15,000 cubic feet, and weighing 1,283 1/3 tons. To cut it from the rocks, 1,104 holes were drilled on a line parallel with the front edge. This ponderous piece of granite will be cut up and sent to Albany, to be used in the construction of the new capital building.

SUMMARY OF NEWS. A cable dispatch announces the accidental death of the Rev. Mr. Wright, of New York. He was killed by a falling weight at the New York Hotel. He had just returned to his hotel, from a trip in a yacht, when, stepping from the window of his room on to the balcony, he lost his footing, and fell into the street, where he was instantly killed. The deceased had for many years resided in Liverpool, where he was established in business.

SHARK CATCHING.—A party of eight gentlemen from Bristol Ferry, N. Y., recently landed in three hours, near the south point of Hog Island, ten sharks, one of which was the largest caught in that vicinity for several seasons. In length it measured eight feet, while the distance around the largest part of its body was two feet, and it weighed 230 lbs. The total weight of the four men was only able to bring it to the side of the boat, when another gentleman had to quiet the monster with vigorous blows on its nose with a heavy oak club. Then, by the aid of a rope, the shark was hoisted and killed. It is a wonder that no human lives were lost. At daybreak the scene presented beggars description.

THE NEW YORK POST OFFICE.—Ground was broken in the City Hall Park, New York, last week, for the new post office building, which will extend three hundred feet on Park Row, and the same distance on Broadway. The plan selected to throw the main span of the bridge was Col. Joseph Dodd, who has been in the New York post office since 1816, at which time he used to take the southern mail under his arm and cross the river in a row boat. The southern mail which Col. Dodd used to take over the river so easily now requires for its removal three two-horse, two four-horse, and one single-horse teams, and averages daily 300 large leather bags, and 200 canvas bags.

AN EXTRAORDINARY ROBBERY was committed, one night last week, on the New York Central Railroad, between Utica and Albany. A band of eight robbers got on board at Fonda, took possession of the baggage and express men, gagged the baggage and express men, and plundered the safes. To avoid suspicion, they passed out the baggage at stations before reaching Albany, they left the train, and when it reached that point, the state of things was discovered, and the gagged and manacled men relieved. A sharp look-out for robbers is likely to bring them to justice.

KEEPING RECORDS.—The Rev. Dr. Lyng, of St. George's church, New York, has kept for a quarter of a century a record of the Sunday schools of his parish, which have included in all more than 20,000 scholars; yet he can show to-day the names of only 100 of the scholars. He has a record of the number for any Sunday of that period. This record enables him to point to fifty ministers of the gospel who have been led along from the infant class to the pulpit, and more than a thousand persons who have been trained for the school to the church during that time.

SAD LOSS OF LIFE.—About 4 o'clock Saturday morning, Aug. 14th, the boilers of the Evansville and Cairo packet, Cumberland, exploded, when near Shawneetown, Ill., and eighteen or twenty lives were lost. The clerk's books were blown overboard, and the names of the missing cannot be ascertained. The boat is a total loss. A portion of her cargo, consisting of wheat and corn, will be saved.

CONOP ROBBERIES.—The New York Tribune publishes several columns of crop reports, from the consideration of which it infers that Thanksgiving proclamations in all the States will fall far short of the merited of the rain and sunshine, and are having blessed the husbandman with abundance for man and beast. Millions of bushels of wheat will sell for a dollar or a little more a bushel. Potatoes may not bring over a dollar a barrel. It will be possible for thousands of families to get peaches for twenty-five cents a peck.

SPURGEON ON INFANT SALVATION.—Mr. Spurgeon being charged with believing "that there are infants in hell a span long," replied: "I have always believed in the salvation of all infants; and I intensely detest the opinions which your opponent dares to attribute to me. I do not believe that in this earth there is a single professing Christian holding the damnation of infants; or, if there be, he must be insane, or utterly ignorant of Christianity."

THE STEAMSHIP GERMANIA, which sailed from New York for Hamburg on the 3d of August, struck an iceberg on the 7th, off Trappan Bay, Newfoundland. Her passengers were saved, together with the mails and a part of the treasure on board. The ship, and most of her freight, will prove a loss.

SAN NEWS is conveyed in a Washington dispatch, which says that the health of George Peabody, who is now at the White Sulphur Springs, is no better. He is more feeble than when he arrived at the Springs, and now can scarcely write his name. Those who are most intimate with him, state that he is falling very fast.

A NEW CHURCH.—The motives which actuated Judas Iscariot in the betrayal of his Master have been made the subject of a good deal of theological comment, and some have thought that they were not bad ones, but that he merely meant to force the Saviour into an assumption of his authority as King of the Jews. The awkward circumstances were his kiss and the thirty pieces of silver. However, they have set up a Church of St. Judas Iscariot in London, which has never taken, creed, nor priest, and is not a part of any denomination. It is known that the conscience of Judas led him to do with himself; and we shall be sorry if the disciples of the new church are induced to go and do likewise. Some people cannot possibly be independent in their views, without needless nocking the whole Christian world. So say the New York Tribune.

THERE WERE 19 AMERICAN mercantile sea-going craft and foreigners (bound to or from United States ports) wrecked in the Gulf of Mexico, in the month of August last, or during the month as either totally lost or missing. They comprised 1 ship, 5 barkers, 1 brig, 11 schooners, and 1 steamer. Of these, 13 were wrecked, 2 abandoned, 1 foundered, and 3 were missing. The total value of the domestic craft (exclusive of cargoes) is estimated at \$316,000.

THE LATEST SPECIAL DEPOSIT we have heard of, is that made by a man who, being happily possessed of \$8,300 in bonds, hid the same in an ash-hole. His wife made a fire there smoke holes, and the man was killed. The bonds nearly experienced the fate of John Rogers. The owner sent the blackened and charred remains to the Treasury for redemption, and after a long wait, they were returned.

WOODEN TRAIL RAILWAYS FOR freight are now in operation in Canada. The rails are maple strips fourteen feet long, six inches deep, and four inches wide, with the thin edge uppermost. The engines run on these rails, and are propelled by steam. Each engine and car cost from \$8,500 to \$10,000; while the cost of construction of such roads, where timber is plenty, is about \$5,000 per mile, exclusive of bridges.

ON FRIDAY NIGHT, two boys named Michael Mahoney and John Coffey, both aged twenty years, were roasted to death while sleeping in an ash pit on the Central Railroad, near Elizabethport, N. J. They belonged to Elizabeth, and being away from home went into the pit to sleep, and during the night a fire was kindled, which was hauled into the pit, literally roasting them to death.

THE EARNINGS OF THE UNION PACIFIC Railroad for May 10, the time of its completion, to June 1, were \$42,475 37; June, \$676,949 11; July, \$655,729 19; total, \$1,174,153 97. The earnings are derived from the books of the company. The large amount of freight which was induced by the lower rates just offered, is now starting over the road, and will largely increase the receipts the coming month.

THE WEST BETWEEN THE TRUNK LINES of railroads from New York to the West is now being waged with greater intensity than ever, and freight to Chicago has been reduced to 18 cents per hundred weight. The merchants are taking advantage of this low freight, and the different railroad depots are crowded with merchandise awaiting transportation. The Society of California Pioneers of San Francisco have purchased a cane, valued at \$1000, for presentation to Wm. H. Seward on his return from Alaska. The head of the stick is composed of forty-one regular pieces of gold-bearing quartz, from the principal mines in California, set in gold.

MR. BRIDGMAN, of Bellows Falls, Vt., has several small ponds containing manna forty thousand trout, being from six months to three years of age. The water is changed once in twenty-four hours, and the fish are fed on ground beef twice a day at an expense of one dollar per week.

A TENNESSEAN has invented a machine for spinning cotton, and takes the bolls just as they are gathered and converts them, by a single process, into a ribbon of spun cotton, composed of filaments laid parallel to one another, and in much better condition than the cotton as it is from the field.

ON THE MORNING OF August 11th, the Pacific express car on the Central Railway was robbed between Fonda and Albany. Three men entered the car, seized the messenger, and bound him, and took the key of the safe from the messenger, and robbed it of its contents.

THE MEDICAL FACULTY and Senatus of the University of Edinburgh have recommended, and the University has agreed to their sanction, to the matriculation of ladies as medical students, on the understanding that they pass the usual examinations and that separate classes are formed for their instruction.

THE KILLING OF THE ENGLISH TRAVELER Powell and his wife in Abyssinia is a sad case. Powell was a missionary and had been separated through by the natives. Mr. Powell, sitting in a chair with a rifle in his hands before her, got a spear in her breast, and lying to her husband's side, was stoned to death.

A CALIFORNIA CHINESEMAN having been shot by his mistress how to make a pudding containing three eggs, but having seen her throw one bad egg away, continued for months after, whenever he made the pudding, to use four eggs, regularly breaking, and leaving and throwing one, away as he had seen her do.

THE UNIVERSAL YANKEE, who visits all lands, has found his way to ancient Jerusalem. A taropike road has recently been constructed by the Turkish Government between Jaffa (the old Joppa) and Jerusalem, and a Scotch steamer driver has started an omnibus line thereon.

AMONG THE EFFECTS of a man recently drowned at one of the Jersey watering places, was found a forged Philadelphia city warrant, which is likely to lead to disclosures relative to an extensive fraud attempted in that line.

CAPTAIN GREEN, one of the assistant engineers of the Troy Fire Department, was almost at the point of death last week on account of having been bitten by a common house fly, feeding on some putrid substance.

THE FIRST COTTON BALD OF THE CROP of 1869 has arrived in New York. It is from a plantation in Washington county, Texas, and is of very fine quality. It is to be shipped to Liverpool.

A YOUNG LADY of Portland was accidentally not fatally burned by her hair catching fire while she was sitting on the sofa, and the flames communicating to a light morning dress which she wore.

MR. JOHN F. REGAN, of Dubuque, Iowa, blind and seventy years old, has ordered his own tombstone, and is superintending its manufacture, and has written his epitaph—six verses in poetry.

THE HON. A. O. ALLEN, of Boston, who suddenly went insane during the cable celebration at Duxbury, died on Saturday in the McLean Asylum at Somerville.

A WALTON TREE eight feet across, perfectly sound, was lately discovered one hundred and seventy-five feet deep in an Illinois coal mine. A Connecticut paper describes a walking cane composed of four hundred and sixty-three pieces of leather, and made from a pair of old boots worn by a resident of New York.

THE INSTRUMENTS OF THE OBSERVATORY of Vesuvius indicate that a fresh internal disturbance is commencing in the interior of the mountain.

A MILK-WHITE WOODPECKER was recently killed in North Stonington, Conn. It had been sent to New York for preservation as a curious specimen.

THE NORWICH BULLETIN says that many of the mills in eastern Connecticut are already running short time in consequence of short water.

AN EXPRESS TRAIN LOCOMOTIVE on the Housatonic Railroad, near New York, succeeded in killing five cows outright at a single trial.
