Miscellaneous. "FESTER HER OUT!" A BARN AND BLESSED SPECIFIC IN CALIFORNIA. THIRTY YEARS AGO. In those days, men would flock in crowds to catch a glimpse of that rare and blessed spectacle, a woman!

BOGUS MINING. People whose surplus cash invites the attention of operators in mining stocks, may learn something from the following description of bogus mining as it is conducted in Colorado. "A claim" is secured—hundreds of them can be had for a score or two thousand dollars are invested in apparatus, and a few tons of selected quartz are crushed and tested, giving unusually rich results.

How to SPLIT WOOD EASILY.—Old Bailey, a well-known writer, who has never been seen since he published his ideas for paper, understand that any kind of firewood, or timber that is being split into oven-wood, or riven into staves or wagon-spokes, will separate much more easily when the wood is saturated with water.

PRINTS AND THEIR PRODUCTION. An interesting collection of prints, produced by various processes, and recently brought together at the house of the Society of Arts in London, is of an historical character. In arranging it, the object has been to illustrate the results attained by each of the processes employed, rather than to point attention to the work of any particular masters or schools of art.

THE BLUE COLOR OF WATER.—A French chemist, M. Soret, has recently examined water in large masses, in order to ascertain whether its blue color is due to the suspension of a fine series of particles, or to the phenomenon with those colors, known as Dr. J. Tyndall, in condensed vapors. M. Soret examined the water of the Lake of Geneva, to find whether the light from it was polarized.

THE EXECUTIONER OF PARIS. It seems that the famous Sansons, who have been from father to son for many generations the executioners in the Department of the Seine, including Paris, have died out, and that a German, or a man of German origin, has taken the place of them.

THE STOCK SHOULD GOVERN THE FARMING.—Hog-raising demands a certain kind of farming; horse-raising another; and sheep-raising a third and very different one. For hogs, you want small fields for clover, rye, and corn, and a few trees for shade.

WHAT IS TO BE AN AMERICAN.—At the Peabody funeral in Westminster, Abbey, in London, there was finally read a paper, which the paper closed in the rabble. A little dirty Jew broker, four feet high, had edged his way between two huge policemen's legs, and was rapidly advancing toward the covered outlook on the tomb, when he was finally arrested and forcibly brought back.

THE ENTIRE NUMBER OF SHEEP IN THE UNITED STATES IS OVER 23,000,000. One-half of the sheep are kept in seven States, Ohio taking the lead, with 6,730,126 head, and producing nearly one-sixth of all the wool in the country. Michigan shows third in this list.

NEW ADVERTISEMENTS. FROM THE GREAT EAST MEDICAL BLESSING OF THE AGE. DR. KENNEDY'S RHEUMATISM AND NEURALGIA DISOLVENT. THE ENTIRE NUMBER OF SHEEP IN THE UNITED STATES IS OVER 23,000,000.
