SAINT DENIS-THE SEPULCHRE OF THE FRENCH MONAROH.

It is to be regretted that nearly all the spots where the great contending armies in Europe have met, the most noble churches of France are built. The on hedrals of Strasbourg, Metz. and Rheims are known to every ed, wherever men have hearts to love beauty of form consecrated to the spirit of religion. And Saint Denis. adds the Louisville Courier-Journal. is not an exception to the list. The heantiful facade, the portals emblematie of the coronation of the Virgin and the Passion, the rose window gencies that occur. imaging the baptism of Clovis. and the six hundred statues of the cathedrul at Rheims are happily uninjured. but the fine old gothic church of St. Martin, at Metz, with its towers, itapses, and paintings of the Lorraine school, are undoubted y like the spires, the clock, and the high altar of Strasbourg-in rains. Its defenselessness saved Rheima; but the fortifications which have necessitated the terrible destruction; and loss of

life at Metz and Strasbourg will, we are afraid, he equally fatal to the Abbey of St. Denis. While the bells here in hundreds of churches cresummoning worshipers to praise and prayer, another peal may be heard in one of the most | gales, and driving storms of snow ancient fanes of France-the peal of and rain, breasting the heaviest seas. the cannon. With the exception of and threading his torthous way ' the brief period of insanity when, at among tides and corrents, and through the commencement of the great Revolution, the Parisians installed the Goddess of Reason on the altars of Jehovab, until Robespierre, with 'a strange mixture of implety and world of water, which, when in their computation, declared that the new angry moods, rage and roar around republic recognized God, the tower

him, as if eager to make the ship of the abbey of St. Denis had for and all its contents their prey. He has to find his way over twelve hundred and thirty-two years pathless deep by means of stars been a memorial and a sanctuary of which are constantly in motion, and by the sun, which on no two days But, independent of its beauty and

ticles that might be converted to great uses. Our country is so young,

Conductor _____, of one of the Cenral Pacific passenger trains, took charge of his train at Truckee, bound oticed among his passengers a very retty, modest appearing young lar, who seemed to be traveling alone. As the cars climbed the mountain, whirled through gorge and around recipice, she sat at one of the windows and gazed out with an anxious look, as though she longed to reach the shores of the Pacific, where she might meet with friends or relatives. While passing through the car the conductor thought he heard some one address him, and on looking around discovered that it was his oung female passenger, who, with bashful air, inquired if he was gong through to Sacramento. On being answered that he was.

as blushed still dooper, and said that he had a rather queer request to make of him. She said she expected to meet at "the Junction" a genleman whom she had never seen. out to whom she was about to be married, and requested the conductor to watch for him, and to introduce him to her if he should find him. For some two years they had been in correspondence with one another -how it was first brought about she did not say-and it was finally arranged that she should go to Cali-

fornia, and that her unknown friend should at once lead her to the altar. On sped the train, through tunneis and snow drifts and over yawning gulfs, but to the soou-to-be bride deither thought of danger, nor of beauties and graadeur of the Sterras; she sat still and gazed wistfully down into the valley, where the muddy Sacramento was winding its

crooked way toward the coast, and where she hoped soon to meet her nysterious lover. Station after station was reached. and finally the Junction came in sight. The conductor stationed him-

ed about as the train neared the depot.

-Life at Home, by Dr. Win Aikman THÉ HUMAN VOICE

Dion Boucicault, commenting on the Albert Hall of Science and Art, in the Pall Mall Gazette, says: The human voice, when speaking with clear ar ticulation and subbled from good acres, and the island was sub-equent lungs, will fill 400,000 cubic feet of Tu air, proviaed they be enclosed in a y purchased of them by Capt. Wil | air, provided they be enclosed in a Bo liam B Frew (formerly of Port Lake, | proper manner, and the voice placed | Re and eirected advantageously. The Fu wabic copper mine) for himself and same voice singing can fill with equal associates, including among them facility 600,000 cubic feet. When M jor Sibley, of New York, a broth- singing the vowels are principally er, we think, of General Sibley of used, because it is necessary to $d \neq t$ upon a note, and we cannot prolong a consonant. In speaking, on the

contrary, we depend for articulation on the consouants; but their short, percussive sound does not travel When we shout, or in open air speaking, which partakes of shouting, we prolong the vowels, drawling the E syllables of each word : but what we gain in sound, we lose in clearness of articulation; expression is lost | tr

in monotony because its fineness de- of pends upon the infinite variety of u which the consonant is capable and bestows on the vowels. Two thous F sand voices, singing or speaking totogether, travel uo farther than one voice. They may fill a certain area more completely with that intricacy ber, filled with stone, to serve as a of waves which when very troublebreakwater and ice breaker; and some we call a din; but each voice within these cribs a coffer-dam was exerts its own influence on the air built, and puddled with clay, having according to its power, and dies with-

in certain limits. A second voice rior of the island nearly water-tight, acts independently, and produces its it at least from the intrusions of the own effects, not fortilying the first. but distinct from it. And so with The next step was to set up two any number of voices-say 10,000 large syphon pumps worked by shouting together; if a single tram-

steam, by which the inside was peter were placed among them, the of voices would have expired in a duced by the ten thousand voice-, the trampet would be inaudible. To illustrate this theory giore clearly, it is plain that twenty thousand persons cannot throw stones further than one person; it is true that the air within certain limits will be more full of

stones, but they will all come to the
