ONE STEP MORE.

What though before me it is dark, Too dark for me to see? I ask but light for one step more; 'Tis quite enough for me.

Each little humble step I take, The gloom clears from the next; So though 'tis very dark beyond, I never am perplexed.

And if sometimes the mist hangs close, So close I fear to stray, Patient I wait a little while,

And soon it clears away. I would not see my further path. For mercy veils it so; My present steps might harder be

old I the future know.

It may be that my path is rough, Thorny, and hard and steep; And, knowing this, my strength might fail Through fear and terror deep.

It may be that it winds along A smooth and flowery way; But seeing this, I might despise

The journey of to-day. Perhaps my path is very short, My journey nearly done, And I might tremble at the thought Of ending it so soon.

Or, if I saw a weary length Of road that I must wend Fainting, I'd think, "My feeble powers Will fail me ere the end."

And so I do not wish to see My journey, or its length; Assured that, through my Father's love, Each step will bring its strength.

Thus step by step I onward go,
Not looking far before; Trusting that I shall always have Light for just "one step more." -British Herald.

HOW TO GROW OLD.

BY REV. AMOS S. CHEESBROUGH.

PSALM 92: 13, 14.—"Those that be planted in the house of the Lord shall flourish in the courts of our They shall still bring forth fruit in old age; they shall be fat and flourishing.'

It is a great privilege, my friends, that I am able to testify publicly on this my birthday, that you have made my ministrations to you, since I took the oversight of this church, very pleasant by reason of your uniform kindness toward me, both as a citizen of this community and as your pastor. am, however, reminded by the recurrence of no such well-regulated families, no such this anniversary that my ministerial work can not last many years longer at the fartherest. In three years I shall have reached my three score and ten. Then, doubtless I shall be considered an old man, and hence possibly disqualified from discharging efficiently and acceptably the responsibilities of a passpeak of me as already an old man. I was quite startled some five or six years ago, the Lord to "impart power to the words of effectually speak as a dying man to dying brighter to the end of life's journey. man; at least I do not feel old.

me. The brow is wrinkled, but the brow is living.

"A thousand hints proclaim the truth, As plain as truth was ever told, That even in my vaunted youth, I'm growing old."

> JESUS THE LIGHT OF THE BIBLE.—You have often admired the line of shimmering light which shines on the ruffled waters when the moon is in the heavens. Look in any other direction and the waters are dark and troubled. Look toward the orb of night, and you see the glory all the way, right from your feet to the heavens above: Another standing beside you, looking at another angle, will see another line of light and glory, and another in another place will see another; and so on endlessly. The moon is other point, will see something that you and angles; but if "looking unto Jesus" be our And though no one can see it all, each one will see all he needs. Every one that looks in the right direction will see a path of light and glory leading from his own feet across the troubled waters of his life, up to the heavens above. "We all with open face be-holding as in a glass the glory of the Lord, are changed into the same image from glory to glory;" and "when Christ, who is our life, shall appear, then shall ye also appear with him in glory" (Col. 3:4).—J. Monro Gibson, D. D.

Missionary Pepartment

Conducted by the Corresponding Secretary for the Board of Managers of the Seventh-day Baptist Missionary Society.

REV. A. E. MAIN, Corresponding Secretary, Asha-REV. GEO. B. UTTER, Treasurer, Westerly, R. L.

WHILE performing missionary work in the Central Association, Bro. A. W. Coon preached for the Sunday people at South Otselic, N. Y., four times. He presented the Sabbath question to them in connection with a Bible-school lesson, and also preached a missionary sermon, after which a collection was taken for our missionary work, of \$11 63.

Twice since the Anniversaries at Farina, the question of allowing the Missionary Secretary to divide his time between the Secretaryship and the duties of another position in denominational work, has been before the Missionary Board; and for the second time it has committed itself to the plan adopted by the Society at Little Genesee, N. Y., in 1880, namely, that the Secretary should devote his time and labors to the general cause of missions, home and foreign, East and West. We trust that our brethren in the West will look on this as a sign of the Board's appreciation, not want of appreciation, of the importance of the home mission field of the great Northwest. In the opinion of the Board, for the Secretary to become a missionary in Chicago, and remain Missionary Secretary, according to the suggestion of several prominent brethren of the North Western Association, would be to greatly hinder his usefulness as Secretary, and would therefore prove really detrimental to the cause of missions as a whole. May results show the wisdom of this judgment.

THE following missionary work is reported, mainly for the quarter ending Nov. 30, 1881 By L. F. Randolph, at Greenbrier, Ritchie, and Hughes Fork, W. Va.; 13 weeks, 14 sermons, 10 prayer-meetings, 12 visits, 1 addition, and 1 church and Bible-school organized. By W. I. Haight, at Watson and Shaw Hill, N. Y.; 10 weeks, 17 sermons, 7 prayer-meetings, 32 visits, and 608 pages of tracts distributed. By A. W. Coon, at Nor- houses. Spent three weeks there. The inwich, Preston, Lincklaen, and South Otselic, N. Y.; 8 weeks, 25 sermons, and 43 visits. By C. A. Burdick, at Portville, Bell's Run, Hebron, Hebron Centre, and Roulette; 13 weeks, 31 sermons, besides lectures to the Excel Band, 1 prayer-meeting, and 63 visits. By B. E. Fisk, at Hornellsville, N. Y.; 14 weeks, 13 sermons, 14 prayer-meetings, and A sick man embraced the Sabbath in his bed 6 visits. By F. F. Johnson, at Stone Fort, Enon, and in various neighborhoods in Southern Illinois; 13 weeks, 49 sermons, 6 prayer-meetings, 66 visits, 4,000 pages of tracts distributed, and 3 additions.

These brethren report in the aggregate \$140 11 contributed for the support of preaching, and \$64 84 for the missionary treasury.

The Secretary has recently visited the following points in the Northwest: Pardee and Nortonville, Kan.; Long Branch, Harvard. Orleans, North Loup, Calamus, and Davis Creek, Neb.; Garwin, Iowa; New Auburn, Trenton, Alden, Albert Lea, Wells, and Dodge Centre, Minn.; Milton Junction, Wis.: and Chicago, Ill. At fourteen of these places he preached 57 sermons; he also received for the Missionary Society about \$85, and for the Tract Society \$38 65.

ABOUT MAKING REPORTS.

We desire to make, at the next Anniversary of our Society, a full and detailed report of the work performed during the year beginning September 1, 1881, and ending August 31, 1882. This can not be done. however, without the co-operation of our missionaries. Five blank reports have been sent to nearly or quite all of the missionaries; and any who have not received them, are requested to promptly inform the Corresponding Secretary of the fact, and they will be supplied. On one of these blanks the missionary is asked to state the work he has done during the months of September, Ocotober, and November, 1881; on another, the work for December, 1881, and January and February, 1882; on another that for March, thank them for it. Others have not done to be held in the old meeting-house at Pat- will take a decided stand for the truth in mission some twenty dollars. I am glad that leads to a full consecration of intellect and

him to make a more satisfactory report at the end of the year.

sermons, once in two weeks, in the Seventhday Baptist church, and two more on the weeks; in all, about 90. During the last three weeks I have held some extra meetings, weather and home duties preventing more. converted. Five have been baptized, three two more by statement. Three of these, a man and his wife, and a son of sixteen years, have come to the observance of the Bible Sabbath, which has given the Church great encouragement, and will give it great help. Things on this field, although not what they should be, are brightening, and the faithful membership are taking new heart. They have so pressed me to continue my labors among them another year, that I have con-Respectfully, sented to do so.

J. CLARKE.

DERUYTER, N. Y., Jan. 16, 1882.

SCANDINAVIAN MISSION.

I will now give my report for the las quarter in 1881. Nov. 5th, began missionary work in Moody county, Dakota, preached 5 times, held 2 prayer-meetings, and made 14 visits. Nov. 17th, went to Turner coun ty, D. T., began meetings Sabbath-day, Nov. 19th. The 24th-26th, the Baptists held union meetings in their meeting-house. attended the meetings, and Bro. Ring, Seventh-day Baptist minister, was also there, and there were three Baptist ministers present. We all preached, held 7 meetings, and had a very good time. After these union meetings, I continued meetings, preaching in three school-houses and some private terest this time was better than ever before. The Sabbath is kept in five families; they are good, trusted Christians. A woman told me that she became convinced that the seventh day was the Bible-Sabbath by reading my tract, "The Open Letter to the Baptists," and she is now keeping the Sabbath.

I found that field more interesting than I expected. The prospect for a church is good now, and we expect to organize a church there this Winter. One brother, C. Swensen, subscribed for the Sabbath Recorder. preached there 14 times, held 2 prayer-meetings, made 43 visits. May the Lord give me wisdom to work more faithfully this year.

hope to see more good results. Your brother in Christ,

C. J. SINDALL.

OWATOA, Minn., Jan. 16, 1882.

KENTUCKY.

I believe that my last report gave an account of my labors on the Kentucky field up to Oct. 9th; since that time I have written a few brief notices of Sabbath sermons preached at different places in the State, and of the interest felt in the subject, and that was manifest on these several occasions, and you have H. H. C. Q. James, where I was given a seen these in the RECORDER. I will now complete my report to the Board, and forward it for your coming meeting.

previous appointment at "Grange Hall," about one mile from Bro. Threlkeld's, to a fair-sized audience, which gave good attention and was deeply interested. Before the | sions, while I remained. While I took great sermon, I told them of my conversion to the care to enforce the binding nature of the Sabbath, and was listened to with apparent- divine law, I also took the opportunity of ly deep interest. On Bro. Threlkeld's invitation, a number of persons came forward as of universal and perpetual obligation. I and gave him their hands, thus asking to be did this the more freely and fully as the remembered in prayer. It was a deeply sol- strangest doctrines regarding the law of God

On the 11th of October I left Bro. T.'s and went on my way to Ohio county, having previously written to Bro. Hamilton Maxwell, ask-April, and May, 1882; on another, for June, | iug him to send for me to Spring Lick, a sta-July, and August, 1882, whether the time tion on the Paducah and Elizabethtown spent be one day or three months; and in Railroad, and to which place I went via. We immediately made shown by some outside of our little church, Some have cordially acceded to it, and we arrangements for a meeting in the evening, and I am quite hopeful that some of these

reports, from this time forward, in the man- of Bro. M. I remained in this neighborhood ner above explained, assuring them that it until the 24th of Oct., preaching nearly evwill simplify the Secretary's work, and enable ery evening at the church; but very few attended on these services, as scarlet fever was prevailing to an alarming extent among the children of the neighborhood. I held one preaching service at Whiting-hill schoolhouse, about three miles north of Patties-I make the following statement of my ville. About thirty persons, mostly young work in Otselic, for nine months ending people, were present, and gave good attenwith Jan 1, 1882. I have preached three tion. I also sent an appointment, by request, to Falls of Rough, for a preaching service there, and rode six miles in the rain, same field, making five sermons every two but as no one came because of the rain, no service was held. Dr. Meador, who lives at Pattiesville, and who has done much to aid perhaps about half the time, the going and our brethren who have visited this field before me, was unable to do anything, being Most of the membership have been quickened, kept at home by the severe, and probably backsliders reclaimed, and several have been | fatal sickness of his wife. I was deeply moved by their severe affliction, and called of whom have united with the Church, and often at their home to see them, and speak comforting words to the sick. When I left, the Doctor kindly gave me a friendly letter of introduction to some gentlemen at Fordsville, that proved to be of great service to me at that place.

On the 25th of October I took my leave of the friends at old Pattiesville, and went to Fordsville, eight miles distant, and on reachevening at the school-house. I preached here three evenings in succession to fair-sized con-Sabbath doctrine, having the largest congregation at that service. I also gave Sabbath tracts to all that would promise to read them, promise. Nearly every person in the house came and took them with great apparent ingreat pleasure the generous hospitality extended to me by Bro. Dabney Gaines of this

Oct. 28th. Left Fordsville, and was kindy carried by Bro. Samuel Gaines, some seventeen miles, into the vicinity of Cane Run Baptist church, Ohio sounty, to which place I had sent, by request, an appointment for preaching on Sunday, Oct. 30th. I preached in this church three times, and the last time presented the Bible doctrine of the Sabbath to about 125 persons, who eagerly came and took all the Sabbath tracts I had. This ly entertained by Tro. Samuel Christian, and others, during my stay. I spent the Sab bath with a Baptist brother, John A. McCord, who gave me a hearty welcome. I felt so much interest in these new-found friends that I ordered the RECORDER sent to eight different persons who seemed very anxious to learn more about our people and their doctrine. My orders for the RECORDERS was from that time to the end of the volume, and at my own expense.

The next day I came down to Horse Branch, railroad station, and preached in the evening to a large company of young people, who gathered at the school-house. The next day, Nov. 2d, I went by railroad to Shepherdsville, in Bullitt county, eighteen miles from Louisville on the railroad to Nashville. Reached there late in the evening, and stayed over night at the hotel. Early in the morning, I took the foot train to find our brethren who live four or five miles from town. Half way out there my walk was ended, by a Baptist brother putting me onto his horse, and sending me, with a glad heart, the rest of the way. I soon reached the home of Bro. hearty welcome, and shared the hospitality of his pleasant home till Nov. 28th, or about one month. About three miles from Bro. On the evening of Oct. 10th, I preached by James's is a meeting-house, called "Bethel;" at this church and at the school-house in Bro. James's district we at once began meetings, and continued them, with occasional omispresenting the claims of Jehovah's Sabbath that I ever heard of had been preached there. Nor did I forget to preach the glad tidings, that "God sent forth his Son, made of a woman, made under the law, to redeem them that are under the law."

On the Sabbath we held brief services: some of the time a Bible service; and the last Sabbath I was there, I preached to seven so; and these we earnestly ask to make their | tiesville, about one mile from the residence | the near future. Some of the young people | I took the responsibility, and hope that it | heart to God.

were greatly interested, and some of them. I hope, are not far from the kingdom of God. Still the prospects of the little church are not very hopeful in a worldly point of view: but I remember that He who founded the church on the Rock said to it, "Fear not, Kentucky field. I am satisfied that he has little flock, it is your Father's good pleasure a wonderful hold of the people there, and to give you the kingdom." He is more to that he is well settled in his views of Chrisit than numbers. It is my painful duty to say that some of the members of the church have been the compelling power in making do not seem to feel the necessity of godly him a Seventh-day Baptist. I think that living, and have not been careful of their de- the door is open, that we have or can get the portment. I hope the future of this little church may be filled with rich blessings of

Leaving there on the 28th of November, I

returned to Carrsville, where I arrived on the 30th. I went by way of Louisville and the Ohio River, as being much cheaper than by the railroad to Paducah, and then by boat to C. The object of my return was to preach, and help gather into church organization, or else into union with the Stone Fort Church, the Sabbath-keepers in Livingston county. I preached on the Sabbath in Bro. Threlkeld's house, and three times in Grange Hall, and once at the house of Mr. Newton Todd, whose wife is a Sabbath-keeper. On Sabbath, Dec. 10th, we were to have preaching and a Bible-school at Bro. Threling there, gave notice of a meeting in the keld's house, but as Sister Threlkeld was taken suddenly ill, no services were held. On First-day, Dec. 11th, I preached at Cave gregations. The last evening I presented the | Spring school-house, six miles from Bro. Threlkeld's, and then we repaired to the water, and Bro. T. administered the ordinance of baptism to all of his children, and and their coming to get them was their they, with Bro. T. and wife, with Sister Todd, were received into the fellowship of the Stone Fort Seventh-day Baptist Church, terest. I wish to say that I remember with | by Bro. F. F. Johnson, who was present from that Church, and authorized to act as its delegate in the case. It was a happy day for the little handful of Sabbath-keepers in Livingston county, and a time never to be forgotton by myself, as well as by the multitude who witnessed the solemnities of the occasion. Can we forget to pray for these young people, who have in early life consecrated themselves to the service of Christ, and the keeping of the commandments of God, and this, too, when Sabbath-keeping implies much self-denial and cross-bearing? No path strewn with roses beckons them onward: was an entirely new field, and the whole trials and work are before them with the apquestion was nearly new to all. I was kind- | proving smile of the Master, who lets fall-on their hearts his promise, "Fear not, little flock." May the pledges and union formed that day be ratified in heaven. The Firstday Baptists and our people held joint services that day, and their pastor also baptized two willing converts.

The time of my tarry on this field having expired, I went, after the baptism, with a family who live near the Ohio River, and just at night was set across in a skiff to Golconda, Ill., and when morning dawned was on my way to Evansville, Ind., where I took the train for home, where I arrived at noon on the 14th of December, having been absent three months lacking four days.

Brethren of the Missionary Board, I wish, in closing this report, to make some statements and suggestions that go far in my own mind to determine our future duty and action. I sincerely hope that these suggestions will not be regarded as an attempt to dictate. or control the Board in any future action, but simply as the result of my own observations, with the intention of helping the Board to supply the Kentucky field.

1. There is a wide-open door. I do not wish to convey the idea that there are no oball in their power to prevent our brethren being heard, still the common people will hear, and some of them will believe and act. 2. We ought to enter this open door, and sow and reap the harvest. We are able to do it. And the ability to do it lays us under faith."—Thomas Guthrie, D. D. the strongest obligation. Now, as to the

way we have been doing. I have been very doubtful in regard to the results of such transcient labor. Still it may have been the best that we could do in the past, because no one seemed willing to enter the field permanently. When it was settled that I was It will awaken a sympathy for perishing to spend a season in Kentucky, I determined | souls, by which labor for Christ will become to survey the entire field, even if the expense | a delightful joy. Holiness will awaken deof doing so should be heavy, so that I could, from this survey, reach an intelligent conclusion, and recommend what seems to me to be wise action for our Board to take. With this as one object in view, and yet this was not all, when I reached Louisville, where, I of September, 1881, and ending the thirty- for him to meet me as I requested, and so I I also administered the Lord's Supper in the confess, I desired greatly to come right on truth, will aid him in pulpit utterances, will first of August, 1882. This seems to us to went on as best I could, via. Falls of Rough, evening after, only three of us uniting in the home, yet, with tearful eyes and prayerful give variety and edge to his discourses. How be an intelligible, reasonable, and business- but did not reach Bro. M.'s until Sabbath service. There is a good deal of interest heart, I turned my course down the Ohio many instances may be cited where Christian River to Carrsville, well knowing that in so doing it would increase the expenses of the

may appear in the final result to have been

3. I recommend that the Board take measures to secure the services of Bro. C. W. Threlkeld as a permanent laborer on the tian life and doctrine, and that these views needed funds to keep a laborer in the field: and finally, that God has sent the laborer.

All of which is respectfully submitted.

BROOKFIELD, N. Y., Dec. 21, 1881.

SOME THINGS CHURCH MEMBERS SHOULD DO.

They are more permanently identified with the church than the pastor. He is employed by them for the time being to assist them in their own work. Hence they are under obligations to support him. Paul says. "They which wait at the altar are partakers with the altar. Even so the Lord ordained that they which preach the gospel should live of the gospel." He bases the principle of ministerial support on the old provision made for the priesthood. He "ordained" it as a gospel plan.

But the church members should do something more than afford pecuniary support to the pastor; they should co-operate with him in a cordial and earnest manner, giving him their sympathy and the benefit of their prayers. Here is where laymen often fail. They apparently think, sometimes, that the pastor is lawfully to be criticised and found fault with; and if an imperfection is discovered, as it may be, it is to be distorted and magnified and rendered insufferable. Such a course is ruinous both to pastor and people, and is destructive to the spirituality of every church where it occurs.

If the people are in full sympathy with the pastor in his labors, trials, disappointments and perplexities, they will have no time or disposition to censure him; they will, instead, help him by being companions and fellow-laborers with him, and will feel that there is something for them to do in building up the church—that it is their work.

Another thing church members should do s to take care of their own piety. This is of more consequence to them than anything else, and should be attended to before anything else. They must see to it themselves. They should make their piety a certainty. Here is where their great anxiety should be exercised, as a mistake here is irreparable. They should "know of the doctrine" by doing the will of God. "He that believeth on the Son of God hath the witness in himself." If they have this "witness" and keep it, they are qualified to do more for God than is possible without it.—Morning Star.

SEPARATION FROM THE WORLD.—Salvation is all of grace. Yet these things are required: "Let him that nameth the name of Christ depart from all iniquity;" "Whosoever would be my disciple, let him take up his cross, deny himself daily, and follow me." "Ye can not," says our Lord, "serve God and Mammon." Shrink not from the God and Mammon." pain these sacrifices must cost. It is not so great as many fancy. The joy of the Lord is his people's strength. Love has so swallowed up all sense of pain, and sorrow been so lost in ravishment, that men of old took joyfully the spoiling of their goods, and martyrs went to the burning stake with beaming countenances, and sang high death songs amid the roaring flames. Let us by faith rise above the world, and it will shrink into littleness and insignificance compared with Christ. Some while ago two eronauts, hanging in mid-air, looked down to the earth from their balloon, and wondered to see how small great things had grown; ample fields were contracted into little patches, the lake was no larger than a looking-glass; the broad river, with ships floating on its bosom, seemed like a silver thread; the wide-spread city was reduced to the dimensions of a village; the long, rapid, flying stacles to be overcome; there are. There are | train appeared but a black caterpillar slowly preachers and church members that will do creeping over the surface of the ground. And such changes the world undergoes to the eyes of him who, rising to hold communion with God, and anticipating the joys of heaven, lives above it and looks beyond it. This makes it easy and even joyful to part with all for Christ—"this is the victory that overcometh the world, even our

"LET THERE BE LIGHT."

NIGHTFALL.

BY MARY ROWLES.

The hush of twilight, far and wide, Falls on the green and sloping meadows; All tremulous the aspens stand, By way worn zephyrs lightly fanned, here the clear brooklet's mimic tide Sweeps onward to the shadows.

All day its sun-flecked ripples flow Through pastures strown with hay and clover; Through lonely glens, where alders lean To kiss the dimpled waves, unseen, And sweet wild roses blush below The brambles drooping over!

By this low bridge and moss-grown fence, In fitful mood its music tarries; While fluted beech-leaves wide dispread, And circling swallows overhead, Move lightly, till each wavelet hence Some fair reflection carries.

Up the broad shoulders of the hills Soft twilight shadows climb and darken: But on their faces, westward set, A smile of sunset trembles yet, And there a throstle sings, and thrills The world below to hearken!

Far off the cuckoo's plaintive call, Scarce separate from the silence, lingers; In shadowland the blossoms sleep, Where white robed mists arise to keep Their nightly watch, caressing all With silent, dewy fingers.

The stars peep forth, the afterglow Fades slowly out behind the larches; The birds are hushed—save one that seems To chirp a little in his dreams— When outcast breezes faintly blow Adown the woodland arches.

The ripples vanish, seaward drawn; The flowers in sleep their perfume render; So nightly round each darkening slope, The light is sown in patient hope, That the rich harvest of the dawn May rise in golden splendor!

GOD IS: WHAT IS HE?

HISTORY OF DOCTRINES. The history of docsuch doctrines and beliefs, and of modes of thinking and of interpretation. The surest way of arriving at the truth or the error of any doctrine, in its full and symmetrical development, is to take it in its origin, and follow it in its unfoldings, in its historic stages of growth, and in its influence in shaping the lives and characters of those accepting it. Any single individual can develop but little truth or error, and this may often be so microscopic as scarcely to be discoverable by the unassisted eye. It is only as systems have been developed by humanity through the ages, that they receive those massive, even gigantic proportions, and produce those deep and wide-spread good or bad results, that will enable one to discover their true significancy and importance. Influences and tendencies, scarcely discernible in the individual, stand out in full proportion in its his-

By such studies, we may be enabled to prune our own systems of any little deformities or bad tendencies, which, in their incipiency are scarcely discernible, yet, in their mature development, maypresent most unsightly deformities or far-reaching evil ef-

AGNOSTICISM. The doctrine of agnosticism, developing in its latest forms into nihilism, nescience, and relativity, illustrates, with special emphasis, how doctrines apparently God as the infinite power, as essential cause, harmless in the beginning, may grow and bear fruit of a most deleterious nature.

The fathers of the church somewhat gentheological aspect. Clemens Alexandrius what he is not." John of Damascus, "What is the substance of God, or how he exists in a word." St. Augustine, "Rare is the mind, that, speaking of God, knows what it means." Duns Scotus, "Is God accessible to the human reason? I hold that he is not." Tertullian thought the being and essence of God can as little be denied as they can be com-

Agnosticism, as expressed in the philosophic and scientific systems of the present, has already been traced. Its last spoken theory is, in the language of Huxley, "only the order of nature is ascertainable by our faculties," or still more briefly, religion can have for its ultimate the assurance that "Something is." An agnostic of the present thus bewails this loss of a God. "In this latest and most appalling condition, indications are returned from the infinite voids of time and space, that man, with all his noble capabilities for love and adoration, is yet alonedestitute of kith and kin, in all this universe

lonely and soulless mystery."

the father of philosophy, was the first to teach that man, being the offspring of God, has the same idea and laws as the divine, his divine ideas and images reflected in his ideas, and though appearing in us, the finite and relative; yet, by the eye of reason, they are seen to be infinite and absolute. "The true philosopher," he taught, "is one who has attained to a vision of the eternal order, righteousness, and beauty in the eternal being. The soul is raised to the vision of real being, absolute and eternal."

He attributed to the soul two chief facul ties, the higher which thus gave the simple, unchangeable, permanent, absolute; the lower, which gave the complex, changeable, contingent, and relative. These were like two eyes—one beholding the supersensible, ideal, spiritual, absolute; the other beholding the sensible and finite. Into the eye of pure reason, the absolute, like a spiritual sun, pours the light of revealing truth, in the form of unchangeable, universal and necessary ideas. The soul becomes possessor of these, in virtue of its kindred nature to the Aristotle, the pupil of Plato, possessed

mental characteristics quite dissimilar from his teacher. Plato was poetic, ideal, intuitive, synthetical. Aristotle was prosaic, sysstarted the two diverse streams of philosophic and finite beings." tendencies that have swept down the ages, affecting all science, philosophy, and theology. for proving the divine existence presupposes Plato made use of psychological and logical | the idea or conception of God, without being analysis in order to reach the higher con- able to give an account whence obtained sciousness of fundamental and absolute ideas, and, having attained to universal and abso- which makes it know, as soon as it is suffiforms, the first moving cause. He concludes presence." that the "motionless cause of motion is a necessary being. This all-pervading princieternally possesses perfect happiness; and its happiness is in action. This primeval mover is immaterial; for its essence is in energy. It is pure thought—thought thinking itself -the thought of thought-the activity of pure intelligence. Such is the perfect, eternal life of God."

Plotinus and the Neo-Platonists taught that to the spirit, in its diviner moods, there was made a direct revelation of the perfect and absolute One, as by direct vision.

Descartes held the theory that human thought can not recognize itself as imperfect, finite, and relative, without apprehending God as perfect, infinite, and absolute. Both are equally positive, and one can not be conceived without the other, being correlatives. The thought of the finite elevates directly to that of the infinite, of the imperfect to that of the perfect. Malebranche, in his Godvision theory, went still further, teaching that in our vision of everything we had a vision of God, seeing everything in God, the absolute and perfect.

Leibnitz taught the apprehensibleness or creator; hence, at the same time, a creation not accidental and arbitrary, which proceeds necessarily from the nature of God, erally held the doctrine of agnosticism in its | which develops it and manifests it, and | which, consequently, is perfectly regulated; says, "We know not what God is, but only hence a world composed of beings which are themselves forces; hence, in short, a human all things, we are Agnostics, and can not say | not only subject to the action of the world and of God, but which has also in itself a power of action which belongs to it, and proceeds only from itself.

Schelling taught that we obtain our knowlbeyond consciousness, in which we are identified in being with the Absolute, and thus rise to a knowledge of it.

Cousin uses the following language: "Men, reasonable beings, whose nature and destiny is, before everything else, to know and comprehend, and who believe in the existence of God, wish to believe it only under incomprehensible? But that which is absolutely incomprehensible can have no relation to our intelligence, and can not be admitted nor even conjectured by it. A God who is absolutely incomprehensible, is a God who, with this virtual negation of God, the uni- in regard to us, exists not. In truth, what saying that an unmanifested Infinite could verse has lost its soul of loveliness. It is a to us would be a God who had not given to never be found out; that everlasting silence common ones, however, are not sawn, but force.

this poor creature to lift himself up to him, GOD THE KNOWABLE AND KNOWN. Plate, to know him, and to believe in him? To believe is to know and comprehend, in some degree. Faith, whatever be its form, whatever may be its object, common or sublime, can be nothing else than the consent of reason. That is the foundation of all faith. Take away the possibility of knowing, and the root of faith is taken away."

"We here combat the interested assertion of the enemies of philosophy, that God is incomprehensible, and that it is not then for reason, and for the philosophy which it represents, to explain God. It is true that we are not able to absolutely comprehend God, and it is on account of this very thing that darkness and faint-heartedness mingle with the most lively faith, so that the measure of the comprehensibility of God is precisely that of our faith. But even of this incomprehensibility we have a clear and precise idea; for we have the most precise idea of infinitude. This idea is not for us a metaphysical refinement; it is a simple and primitive conception which shines for us from our entrance into this world, luminous and obscure together, explaining everything, and being explained by nothing, because it carries us at first to the summit and limit of all explanation. Reason explains not the inexplicable; it conceives it. Behold, then, whither thought tends; there is infinite betematic, practical, logical, analytic. They ing, the necessary principle of all relative

Coleridge held that "all demonstrations There is something in the human mind lute ideas, he constructs and interprets the ciently awakened to reflect on its own notices universe in the light and after the type of and thoughts, that in all finite quantity, there these ideas. Aristotle reverses this process, is an infinite, in all measures of time, an and, commencing with sensation, proceeds by eternal; that the latter are the basis, the induction from the known to the unknown, substance, the true and abiding reality of the and, thereby, to establish, by logical proofs, former; and that as we truly are, only as far the ages and see what has been the fruitage of the reality of an absolute or divine Spirit, as as God is with us, so neither can we truly the eternal, immutable substance, the im- possess, that is, enjoy our being or any other material energy, the unchangeable form of real good, but by living sensibly in his holy

Calderwood, in his review of Hamilton and Mansel, states his position as follows: "I ple penetrates heaven and all nature. It hold that there is in the mind a necessary belief in the existence of an Infinite Being. This faith in one infinite, all-perfect Being accordingly becomes the regulating principle in the whole current of bur thought; in other words, our thought concerning this great Being, and the works of his hand, is determined by the faith which we find implanted in our nature. The object of faith becomes, in some sense, the object of our thought and knowledge, that is, in so far as our limited thoughts and knowledge can be engaged with such an object. Our faith in God's existence necessarily implies a certain knowledge of God as existing, for, in truth, all faith implies knowledge. Our necessary conviction involves a certain necessary cognition. The theory here maintained, therefore, is that as we have a necessary belief in the divine existence, so we have a necessary fundamental or original knowledge of his nature, and we may form to ourselves a conception of the Infinite One, both clear and distinct, yet felt to be inadequate, though trustworthy in its nature, because resting on the authority of a belief native to the mind. To know the Infinite, in all its extent, must, at all times, be an impossibility; but a partial, trustworthy, and ever-extending knowledge of God is possible to man."

Martineau says, "If the Infinite can have no predicates, none of the marks, that is, characters, of existence, it will be indistinguishable from non-being. To deny it to Spencer proposes, is thus impossible. If it is incognizable, it is also a nonentity. What is intrinsically out of thought is necessarily out of being. Or will you look at the Infinite from the affirmative rather than the negedge of the Infinite by sinking back into a state | ative side; and, instead of guarding it from what it must not be, consider what it must comprise and be? Then we shall give just the opposite account of it; ceasing to say that it can have no predicates, because no limits, we shall demand for it all predicates, because all phases and possibilities of being. To the Infinite as unexclusive, everything affirmative belongs; not only to be, therethe express reservation that this existence is fore, but to be known; to subsist within the incomprehensible. They declare that God sphere of intellect, as well as in every other is incomprehensible. What do they mean sphere. To claim it for Being, yet withdraw by that? Do they mean that it is absolutely it from thought, is thus again impossible. If it is an entity, it is not an incognizable. The Infinite which is real in existence is possible in cognition. What is the use of telling me that an Absolute which came into no re

in a universe full of visions and voices."

Dr. McCosh says, "On the one hand, I find the more profound philosphers of the continent of Europe giving the idea of the Infinite a high place, indeed, the highest place, in their systems. On the other hand, the British philosophers, I find, have views meagre and unsatisfactory. The idea of the Infinite, according to them, is a mere negation, a mere impotency. But if we entertain no such idea, how do all men speak of it? If it be a mere impotency, how do we come to clothe the Divine Being with infini ty? But the infinite in which the mind is led intuitively to believe is not an abstract infinite. It is a belief in something infinite. When the visible things of God declare that there is an intelligent Being, the Author of all the order and adaptation in the universe, we are impelled to believe that this Being is, and must be, infinite, and we clothe him with eternal power and Godhead. The intuition is gratified to the full in the contemplation of a God, eternal, omnipresent, allmighty, and all-perfect. These seem to be necessary perceptions. We can not be made to believe, to think, otherwise. Not only so; it is, in a sense, a universal belief."

Hickok teaches that "reason must find an agent in whom the space-filling force and substance of nature may find an origin. While he conditions all nature, this very conditioning is to arise within himself, selforiginated. This agent must be author of that force which fills the space of universal nature, and which is nature's substantial being. This author of nature must stand free from all conditions imposed from without. His only conditions must be such as are selfimposed in the dignity of his own transcendent being. It must be a positive and intelligently affirmed unconditioned, whose only end of action is found by himself in his own being. Such alone can stand above nature, and condition nature, without the reciprocity of a conditioning back upon himself from nature. As thus positively, unconditioned, we give to this conception of a supernatural being the high name, which must be his own prerogative and incommunicable possession tions," and (3) the "Annual Reports." The

—the Absolute." We have thus traced the two streams of philosophic and theologic tendency down the ages—one holding the doctrine of intuitive tion has in some way rendered assistance. cognition of Deity, as the Absolute and Infinite; the other holding the doctrine of agnition, or that Deity is unknown as the Absolute and Infinite. The Absolute Philosophy and the Positive Philosophy, or the Philosophy of the Infinite and the Philosophy of the Conditioned, as the opposite doctrines are called, are fast becoming the two poles of modern thought-theological, philosophical, and scientific—toward which, with different degrees of divergence, advanced thinkers in all lands are rallying. What is singular, the theologians can not be said, as yet, to be committed to either division. In both schools, the very same arguments have been wielded for the defense and for the destruction of religion; but the religious world is fast coming to see that its only safety is rallying for the defense of the doctrine of a knowable and known God. There is, indeed, too much at stake in these formidable conflicts between the giant intellects of our time for the Christian theologian to think of either despising or disparaging

HOW AGATES ARE CUT.

The variety of quartz known as agate is a variegated chalcedony, with the color distributed in clouds, spots, or concentric layers. The variety called moss agate occurs in veins, while the banded agate is found in the form of geodes or balls, and occasionally soul like in nature to God, a soul which is thought, yet save it to existence, as Mr. there will be found in the side of these balls a sort of funnel through which was introduced the silicious matter forming the lav-

> The chief source of agates now is South America, where, especially in Brazil, they occur in great numbers. They are shipped thence as ballast in vessels bound for Hamburg, and from this port are forwarded by rail to Oberstein, where they are sorted into lots, usually in the yard of some well-known inn, and sold at auction. When purchased they are sent to the agate mills, where they are cut and polished on wheels turned by water power, though of late years steam has been introduced in a few mills.

Along the Idar River, between the towns of Idar and Oberstein, there were, in 1867, one hundred and fifty-three mills, working seven hundred and twenty-four stones. Each mill contains from three to five stones, set on a horizontal axle, one end running outside the workshop and communicating with the water-wheel. The mill-stones are usually red sandstone, about five feet in diameter, and rotate in a vertical plane, the broad edge of the wheel being kept moist by a stream of water trickling down upon it from above. lations would be inapprehensible? It is only The choice agates are usually cut into shape | being ceases to be. Each lives in the future, with steel wheels and diamond powder. The in ever-widening circles and ever-multiplying

barren and dead universe, and existence is a his-creature sufficient intelligence to enable would be totally inaudible; vapid words, roughly dressed with hammer and chisel, the great dexterity in applying their blows so as to obtain the desired fracture.

The grinding is done on the broad edge of the wheel, which is furrowed with channels corresponding in shape with the form which it is desired to give the object in hand. The agate is usually attached to a small stick, and thus applied to the moving wheel.

Each stone accommodates two men, but these men, instead of sitting at the wheel, are stretched in an almost horizontal position upon a wooden stool made to fit the body. The limbs are thus left free, the hands holding the agate to the wheel, while the feet are strongly pressed against blocks of wood fastened to the floor. After being ground, the agates are polished on cylinders of hard wood, or on lead or zinc discs, fed with a mixture of Tripoli and water.

THE SMITHSONIAN INSTITUTION.

James Smithson was an Englishman, and personally an utter stranger to our countrymen. He was the natural son of the Duke of Northumberland; he was educated at Oxford, where he took an honorary degree in 1786; he bore the name in that University of James Lewis Macie, but a few years after graduating he adopted that name of Smithson. The allowance made to him by the Duke of Northumberland, in connection with his retired and simple habits, enabled him to accumulate the fortune which finally passed as the Smithsonian bequest into the trust and treasury of the United States; he died on the 27th day of June, 1829, at Genoa.

On the 3d of December, 1838, the legacy bequeathed to the United States by James Smithson, amounting to \$508,318 46, had been received and paid into the Treasury of the United States. In 1864, \$54,100 was added to the original bequest, making the whole sum of the Smithsonian fund \$563,-

The Board of Regents of the Smithsonian Institution held their first session September 7, 1846; in 1857, they completed a building at a cost of \$300,000, the first business transactions of the regents resulted in the election by their votes of Professor John Henry, of Princeton, who was at that time a member of the faculty of the College of New Jersey, occupying the chair of Natural Philosophy. The publications of the Institution are of three classes, (1) the "Contributions of Knowledge," (2) the "Miscellaneous Collecfirst named consists of memoirs containing positive additions to science resting on original research, and which are generally the result of investigations to which the Institu-The Miscellaneous Collections are composed of works intended to faciliate the study of natural history, meteorology, chemistry, philology, etc., and are designed principally to induce individuals to engage in those studies as specialties. The Annual Report contains translations not generally accessible to American students, reports of lectures, extracts from correspondence, besides an account of the operations, expenditures, and condition of the Instutition. These are presented to learned societies, to libraries, to colleges, and really to all reputable persons who asked for them either in person or by

The National Museum was established by the Government in 1842, and consists of the specimens collected by the Wilkes Exploring Expedition; it was transferred from the Patent Office to the care of the Smithsonian Institution in 1858. Congress annually appropriates for the care and preservation of these specimens from four to twenty thousand dollars per annum, as the Museum has developed; Spencer F. Baird succeeded Prof. Henry, and is now at the head of the Institu-

BURIAL URNS.—The Archæological Cabinet, at Alfred, has just come in possession of a fine alabaster burial urn lately brought from the Island of Cos, in the Grecian Archipelago. It contained the ashes of King Pheidippos, 1200 B. C., also coins with his name upon them. It is accompanied by several terra cotta vases and bottles.

Ko Kum Hua, the Chinese Professor at Harvard, has an American tutor who lately resigned his position on the ground that some other more lucrative occupation must be discovered. The Boston correspondent of The Providence Press says: "What does this good Ko Kum Hua do but hire a furnished room for his valued teacher, and after installing the teacher therein, to send from his own oriental cuisine what he surposed to be a dinner strictly in accordance with Yankee usage. Here is the dinner bill of fare: A frosted cake, a mince pie, and a bag of English walnuts! The professor, who is desirous of doing everything in the American fashion, goes out every day with his little family for a family stroll. At first he went with a child in either hand, and his wife trotting behind. The Yankee tutor, shocked at this heathenism, gave him a lesson, and next day the good professor was observed solemnly walking down the street, Mrs. Ko awkwardly and shyly hanging on his arm, while the children followed on in

BOOK REVIEW

THE SABBATH; a memorial of different events, with the corresponding changes of the day, and the manner of its observances, together with the Chronolo gy of the Ages. By Rev. H. T. Besse. Wesleyan Methodist Publishing House, Syracuse, N. Y. 5x8 inches, 384 pp.

Such is the title of a new book, which, to say the least, is a great curiosity. It is an effort to settle all matters connected with the Sabbath question by chronology and arithmetic. One scarcely knows which to wonder at most, the ease with which it assumes unproven and unprovable points, or its unscientific ingenuity in tangling the question under consideration. The key note of the book is sounded in the following, from the preface, p. 4:

"Was the Patriarchal Sabbath, which God gave to Adam in Paradise, identical with the seventh day of the Jewish week? This question has been answered in the negative by many eminent Biblical scholars, among whom I may name the celebrated Rev. Drs. Kennicott, Mede, John Kennedy, and Akers. For reasons given in this work, it is believed that the Mosaic seventh day of the week corresponds to the sixth day of the creative week. The creational seventh day was observed by the Baal, or Sun-worshipers, and to keep the Israelites separate from this idolatry, God says: 'I caused them to go forth out of the land of Egypt, . . . also, I gave them my Sabbaths to be a sign between me and them."

If Mr. Besse is correct, God must have made quite a blunder in the above imperfect quotation, as well as in several other places. According to the book we are considering, the Baal-worshipers had taken possession of God's Sabbath, and he had to fit up a temporary one for the Jews, to prevent them from keeping "the Creational Seventh-day." Mr. Besse completes his platform by claiming that the Sun-worshiper's day was restored by Christ, and is identical with the present Sunday. Three hundred and eighty-four pages are consumed in vindicating and entangling these two propositions. At least fifty of those are filled with chronological tables which abound in bewildering intricacies, and the appearance of great knowledge. ease with which the author assumes to settle all questions, and the accuracy of his dates, is certainly refreshing. For instance, on p.

"Our calculations make A. M. 1 to begin September twenty-third, before A. J. P. 840. (foot note)—[A. J. P. does not mean Andrew Jackson Pontifex, but the Year of the Julian Period. | What day of the week was that? This belongs to the first period. 840 years contain just 30 cycles of 28 years each, which indicates that the twenty-eighth year in this period is the one which we have judged to be A. M. 1. G. F. are the Sunday letters, and opposite these, and under September is the figure '7,' which indicates that the seventh calendar is the one for September that year; and the twenty-third day in this calendar is Monday."

On p. 208 we are again told:

"According to the numbers used by the author, A. M. 1 was B. C. 5552 years and 100 days. From this deduct 4713, which is the number of years of A. J. P. before the Christian era, there remains 839 years and 100 days as the age of the world at A. J. P. 1. These 839 years and 100 days equal 29 solar cycles, 27 years and 100 days, which lacks only 266 days of being 30 complete solar cycles. We conclude, therefore, that the first year of the solar cycle was also the first year of the world. It is commonly supposed this year began some time in the month corresponding to our September. We have fixed upon the 23d day of September."

idea of the character of the assumptions of officers and teachers in all their sacrifices, this book. By other methods he goes on to assist them in their labors, and inspire them show with similar clearness (?) that the first in their teaching, that they may train up a day of the world was on Monday, and could class of young people who shall be wiser and not have been on any other; hence, the world | stronger and more Christ-like than those was born on Monday, Sept. 23d, A. M. 1. | who have gone before. Having settled this vexed question thus accurately, [we regret that he does not tell his | people in behalf of the Sabbath School Board readers at what hour in the day the world who are preparing the lessons from the Book was born; it is very unsatisfying to come so of life, that grace and wisdom may rest upon near to exactness, and yet be left in doubt,] | them? And in this connection, let us not Mr. Besse goes on to fix other times and dates, forget that noble band who are about to furand to prove in a great many ways that the nish a Sabbath-school paper, and also these second day is the first day, and the first day who have helped so much in publishing the is the seventh day, &c., &c. so long upon a book which is of no use what- beloved brethren be remembered at a throne preme Court. Ex-Vice Presidents and Senever, except as a curiosity that shows how of grace. earnestly men will labor to throw dust upon

or Hessey, or any of the better class of writers on the Sabbath question.

The historical portions are especially unreiable. The book is a chronological puzzle, with an assumed starting point, arranged to meet the demands of a theory that has found very few intelligent supporters. As a curiosity in Sabbath literature, it will pay collectors to procure the book.

PRAY FOR THEM.

I have been thinking of the arduous duties and solemn responsibilities that devolve upon our several denominational Boards. Only those, I suppose, who are familiar with the magnitude of the work, can realize how ar duous their duties are. Great responsibility must rest upon them, because the management of all our denominational interests is intrusted to four or five Boards, and in each of these a few individuals constitute the working members. What rare tact and wisdom are required to manage them so well

1. Look at our Missionary Society with its laborers scattered in all the Associations, and even in foreign lands. The Missionary Board must be familiar with all these fields, ac quainted with the workers, and ready to give advice and direction whether a thousand miles away, or on the other side of the globe. And then there are questions arising in these widely scattered fields, and points to be settled, that are difficult, and often perplexing, and yet they must have the personal attention of the members of the Board before they can be settled wisely; and often these complicated questions require the careful attention of the Board between the regular sessions, that the important work may go forward. The long lists of letters received from the wide field, each embracing new phases of the work, and often a multitude of separate interests, may give some idea why such prolonged sessions are needed before all can be judiciously settled. Now, as I think of the fields represented, the interests at stake, and the multitudes of souls committed to the care of the Board, and especially to the devoted Corresponding Secretary, it seems to me so desirable and Christ-like, that we who look to them and expect so much of them, should make it a special object of prayer that the Holy Spirit may guide them in their deliberations, and assist them in all their labors. And not only at our missionary meeting, but daily and continually, may we pray that God would endue them with wisdom from on high, and so bless and prosper the officers, and especially the Corre sponding Secretary of our Missionary Society.

2. Look at our Sabbath Tract Society. What duties and responsibilities rest upon its officers! Will their labors be easy and their burdens light to lift up and magnify the law of God, when society is against it, in Christian as well as pagan, lands? The new Tract Board are taking hold of the work vigorously, but the work is so great and the interests involved so mighty, that they surely need divine help to carry forward and enlarge the work. Brethren and sisters, let us pray for them, that God would guide them in all their plans, so they may use pen and press and platform in this and other lands, to spread the knowledge and observance of Jehovall's Sabbath.

3. Look at the mighty interests involved in our Education Society, and the blessed Frenchmen, but it must not be forgotten work done by our higher institutions of learning. Do not the Presidents of our schools as much steam and electricity as all Europe and all the members of the faculty need wisdom from on high, to train the minds and for broader scope is finding expression in hearts of those who will so soon be the stand- Mexican railway enterprises, and in the uniard-bearers in our denominational enterpris-These extracts will give our readers some es? Let us pray that God would bless these applied to the Panama canal.

4. May we not ask the prayers of all our

5. The Memorial Board, charged with ties for all the other denominational Boards, We beg pardon of our readers for dwelling deserves our sincerest thanks, and may those

Finally, brethren and sisters, let us offer fourth, and fifth rows to the east of the main the simple truth that "the seventh day is the up our prayers continually, for those who aisle. Governors of States and Territories, Sabbath of the Lord thy God." We do not give so much of their time and thought and impugn the motives of the author, nor his labor to the management of our denomina-Christian character. In point of scholarship, tional enterprises, that they and the work will be reserved exclusively for the use of Esq., of Westerly, lectured before the recent-

Tract, Educational, Bible-school, and Publishing interests, may be advanced as never

CLASS FOUR, of the Summer School for Hebrew, Morgan Park, Chicago, has issued a Revised Translation of the Prophecy of Malachi, in parallel columns, with the Authorized Version with the various renderings of the Septuagint, Targum, and Vulgate, in connection with the catalogue of the institution. Further information may be obtained by addressing W. R. Harper, Morgan Park,

THE SEED ANNUAL of D. M. Ferry & Co., Detroit, Mich., for 1882, is a gem of beauty as well as a mine of information for gardeners and florists. It is sent free on application to the publishers, who have an enviable reputation for the good quality of seeds sent out by them.

THE STORRS & HAMILTON Co., Paines ville, Ohio, has issued its Annual Catalogue of Vegetable and flower seeds, fruit trees, small fruits, etc., of which we have received a copy. This is a well established company, and offers special inducements to its patrons.

WIDE AWAKE for February realizes the anticipations raised by the publishers when the price was advanced, and the wide awake young American will fully appreciate it charms. Published by D. Lothrop & Co. Boston, Mass., at \$2 50 a year.

THE MALE VOICE CHOIR is a collection of gospel songs arranged by L. O. Emerson for male voices exclusively. It seems well adapted to the use for which it was designed. It is published by Oliver Ditson & Co., Boston, Mass. Price 50 cents.

WASHINGTON LETTER.

Ir. Blaine's Diplomacy—The Mild Umpirage of the United States about the Garfield Memorial Ser

> (From our Regular Correspondent.) Washington, D. C., Feb. 4, 1882.

It would be curious if the issue in the next presidential contest should relate to the umpirage of the United States in the Western Hemisphere. Mr. Everett long since spoke of the "mild umpirage of the Federal Union." But Mr. Blaine has proposed an extension of this umpirage to the quarrelsome children of South America. The idea will find favor not only with sentimentalists but with all who are not impervious to sentiment, and the fact that such an astute politician as Mr. Blaine is giving it prominence, lifts the question above the plane of ordinary interest. Nations, no more than individuals. can not live and die to themselves. Vast power can not be dissociated from vast responsibility. But the question of our "mild um pirage" on this side the globe is not merely one of abstract duty to ourselves. The wonderful development of the United States and Territories during the last fifteen years brings us much closer to the time than our fathers expected to be brought, when this country will be too small for us. It would not be too small if we were Germans or that we are fifty millions of Americans, with with its 250,000,000. Already the demand versal approval of the Monroe doctrine, as

The programme for the Garfield memorial services in the House, on the 27th inst., is now complete, and the ceremony promises to be both solemn and imposing. The Hall of the House of Representatives will be open for the admission of Members of Congress, and those who have been invited. President Arthur and ex-Presidents Grant and Hayes will be seated in front of the Speaker's table. The Justices of the Supreme Court will occupy seats next to the right of the resident and ex-Presidents. The Cabinet Officers and the representatives of foreign governments will occupy seats to the left of the Speaker's table. General Sherman, Admiral Porter, and those officers of the Army and Navy who have received a vote of thanks from Congress for distinguished services will be assigned seats next to those of the Suators will occupy seats in the second, third, and invited guests, will have seats assigned them on the floor. The reporters' gallery

sion can be obtained from the press committee only. The Marine Band will discourse appropriate music. The diplomatic eorps will be present in the uniforms of their several nationalities, and will be conducted to their seats by the Sergeant-at-Arms of the House. Prayer will be offered by Rev. F. D. Power, Chaplain of the House, and late pastor of President Garfield's Church, after which Hon. David Davis will introduce Mr. Blaine, who will deliver the memorial address.

Home Aleus.

ALFRED CENTRE.

In the meetings this week the subject of effectual prayer has been thoroughly considered. Prayer has been offered for special interest. Many voices have been heard that have not been accustomed to pray in the congregation. The meeting on Sabbath evening was of deep and solemn interest. It was said that about seventy took part in the exercise. Many are deeply anxious for a general awakening among those who have not given their hearts to the Savior. In the by letter.

The Sabbath-school, in the care of our devoted superintendent, seems active, and is making progress. At the regular session last Sabbath, there were present one hundred and eighty-two.

RICHBURG.

Let's go to Richburg. The old way was, first, from Friendship, daily by stage; second, drive your own team; third, get a complimentary ride; or fourth, go on foot. The new ways: From the west, change cars at Friendship, four times a day, taking Nile an eighth of a mile in the rear, cross the brook a mile south, on trestle bridge, on through the Wheeler farm, Aunt Roxy Allen place, cross back again at Caleb Wilcox's place, run along the East slope of the hill, fronting Lester Williams', and presto, you are at the Old Red Mill; get off quick, or they will have you into Bolivar, Little Genesee, or even Bradford itself. From the East, change cars at Wellsville, pay a dollar. Now, you are off, up Brimmer Brook, corkscrew over the hill to Allentown, on, to Bolivar, change cars to Richburg, where the sound of the derrick, mingled with the roar of the teamsters and the whistles, sweet scream, tells you to write finis, and get off.

The people of Richburg are concerned to learn that in many towns where they have no oil, they have small-pox, fires, delirium tremens, fights and robberies. We perhaps are as clear of these things as common places. Murders! There have been certainly two the passing Winter, and a third man shot is recovering. Coming home I heard two or three times that the third man was dead, and the real number of killed was just seven and a half. The party saying this, laughed, so I didn't believe it.

The Opera House (alias theatre) is nightly crowded with an enthusiastic 3,000. I have not yet paid my fare, so do not know how much is raised by this benevolence, to civilize the heathen!

When fights or murders are not rendered sufficiently frequent by the saloons, for the streets, sham fights and murders are served up, to order, on the boards—they are so

HORNELLSVILLE.

The friends of Mr. and Mrs. Elias Ayars of this place gave them a very pleasant surprise on the evening of Feb. 2d, it being and Park Row, which bounded the large the tenth anniversary of their marriage.

The visitors carried ample provisions for all, and left behind mementoes of their cordial friendship.

same house, kindly opened their rooms and invited the company to make themselves free in the enjoyment of them.

New Jersey.

A masquerade party at the house of J. E. Mosher, at Plainfield, Feb. 1st, was well attended, and afforded much pleasure to the cupied the structure, the fire itself gave the young people.

A "sociable" of the Ladies' Benevolent Society, of the Plainfield Church, was held Thursday evening, Feb. 2d.

Eld. A. H. Lewis received an urgent call to aid in a series of special meetings at the Leonardsville Church, but was obliged to decline in consequence of the pressure of his present engagements.

Rhode Island.

ASHAWAY.

organization of this society is surely a move in the right direction.

At our last Friday-evening prayer-meeting, some of the brethren expressed a hope and expectation that soon the waters of salvation would be moved here. May their expectations be realized, and many be healed from the malady of sin.

At about noon, Tuesday, Jan. 31st, snow began to fall. As the afternoon advanced, the storm increased, being accompanied by a northeast wind, which piled the drifting snow in all sorts of fantastic shapes. The storm continued unabated during most of the night; but before morning it had spent its fury, and the first day of February dawned as calm and serene as May, but not quite as warm.

ROCKVILLE.

The Quarterly Meeting of the Rhode Island and Connecticut Churches was held with us, commencing on Friday, Jan. 27th, with a sermon by Rev. O. D. Sherman, and continuing over the Sabbath, closing Sunday afternoon with an earnest missionary sermon by Rev. A. E. Main, followed by a collection for missions. On the evening after the Sabbath, Bro. Leander C. Burdick was ordained a deacon of the Rockville Church, Rev. L. morning service two were added to the church | A. Platts preaching the ordination sermon. The exercises throughout the entire meeting were quite interesting, and the attendance good, notwithstanding bad traveling and inclement weather. The next Meeting will be held with the Church at Greenmanville. A.

Minnesota.

DODGE CENTRE.

It may not be too late to state that our Sabbath-school had a Christmas Tree on Sunday evening, Dec. 25th. The church was crowded to overflowing; an interesting programme was presented, after which, from \$600 to \$700 worth of presents were distributed, to the delight of the recipients. G. W. Lewis was elected Superintendent for the present year; G. W. Hills, Vice President; V. C. Bond, Secretary; Ellis Ayres, Chorister; G. M. Cottrell, Organist; Minnie Babcock, Collector; and Giles Ellis, Librarian.

Two of our young men are in school at Milton, this Winter, with the view, we suppose, of preparing for the ministry. Another of our number hopes to be able to give himself to theological study next Fall. Three more of our youth are attending school at the Wasioja Seminary, while five of our number are engaged in teaching school.

We greatly enjoyed the preaching of Eld. Main the week he was here. Besides his seven sermons, the pastor preached twenty times during January, and the meetings still continue. A half score and more have expressed an anxiety in reference to their soul's welfare. We pray the work may go on.

As a whole, we have had beautiful weather since Thanksgiving, scarcely snow enough for good sleighing, and the mercury at no time indicating more than 22° below zero. General health prevails, though some of the aged members of our flock are growing feeble with years, and a few are suffering with dis-

Condensed News.

FIRE IN NEW YORK.

A disastrous fire occurred in New York, Jan. 31st, the following account of which we clip from the Sun of Feb. 1st:

"Smoke was rising thick and black from the roof of the Potter building at 10 o'clock yesterday morning. This attracted no attention down in Beekman and Nassau streets house on three sides; but persons in the upper offices of the much taller Morse building, directly across Nassau street, saw that it did not come from a chimney, but was pouring through the roof. Workmen in the Kelly Mr. and Mrs. Fernham who reside in the building, opposite in Beekman street, observed the smoke, too, as it rose lazily into the snowstorm. About five minutes afterward flames shot up from the basement through an elevator way at the Nassau street door, spreading in every one of the five stories, reaching the top in an instant, blazing right through the roof, and mingling luridly with the column of smoke. To most of the 150 to 175 persons in the many offices which oconly warning. Few heard any outcry. Flames crackling at the doors were in some instances the first sound of the danger; and instant, deadly danger it was, for the hallways and stairways were filled with fire before two-thirds of the inmates could escape through them. The rest got out by the windows, or not at all. How many were burned to death is not yet known.

"The fire had other ways of rising and spreading than by the pine-boarded elevator, though that would have been sufficient by itself to distribute the flames quickly. In the center of the building was a huge well, reaching from the second story to the roof, the book has no place with the works of Cox may be richly blessed, so that Missionary, members of the press, and tickets of admis- ly formed literary society of this place. · WHOLESALE PRODUCE MARKET

Review of the New York market for butter, cheese, etc., for the week ending Feb. 4th, reported for the RECORDER, by David W. Lewis & Co., Pro-duce Commission Merchants, No. 85 and 87 Broad-Street, New York. Marking plates furnished

BUTTER.—Receipts for the week were 14,958 packages; exports, 2,450 packages. The market is higher, and stock of all kinds, except very lowest grades. is nearly exhausted. Fine new milch make is quick sale at an outside price. On 'Change 38@40c. was bid for extra fresh dairy, 42@45c. for extra fancy creamery, 41@44 for extra imitation creamery, 30@ 32 for extra fresh factory, and 34c. for extra special marks of Western ladle packed. There are no dairy entire of the classification of extra on the market.

Creamery, fine new milch make......43 @45 fresh, fair to choice.......35 @40 summer firkins......30 @35 Dairy butter, finely made, fresh......35 @38 fair to choice, fresh......25 @30 sour, cheesy or rancid.....15 @20 common to good......13 @18

CHEESE.—Receipts for the week were 22,103 boxes; expofts, 23,500 boxes. The market was weak and irregular. 100 boxes fine cheese September or October were offered at 13c. Known marks September, or October, full cream were offered at 121@ 12%c., and earlier, at 11@12c. 800 boxes New York State skim cheese were offered at 4c., and there are evidently a good many poor skim cheese here unsaleable. We quote:

 Fall make, fine full cream.
 13 @ 131

 " fair to good.
 11 @ 121

 Early make, fair to good.
 10 @ 12

 Factory, partly skimmed.
 6 @ 10

 " poor skims.
 2 @ 5

Eggs.—Receipts for the week were 2,981 bbls. and 1,055 boxes. At this writing, Saturday, there is a heavy snow storm prevailing which stops receipts and the market was excited and higher. 30c. was bid for extra fresh 5 or 6 ten bbl. lots of known marks sold at 281c., and quite a number of small lots of Western firsts sold seller the month at 231. 234 and 24c. We quote:

BEESWAX.—Pure wax, 23 @ 24c.

BEANS.—Higher. We quote:

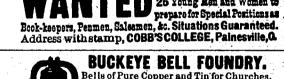

Marrows, per bushel, 62 lbs., prime..\$4 00 @\$4 40 "fair to good, 3 50 @ 3 75 good. to Mediums.

DRIED FRUITS.—We quote: Evaporated apples, ring cut, choice......11 @13

BUTTER, CHEESE, EGGS, BEANS, ETC. Exclusively and Entirely on Commission. Cash advances will be made on receipt of property there needed, and account of sales and remittances for the same sent promptly as soon as goods are sold. We have no Agents, make no purchases whatever for our own account, and solicit consignments of prime quality property.

Selected Miscellany.

THE YEARS ARE PASSING BY.

The years are passing by! We watch, as through an open door, Their passage through time's corridor; Each shadow in its falling, slopes Across the grave of buried hopes: The pulse of being slower beats Through Winter's snow, thro' Summer's heats. And faith and hope and love grow cold As we grow old—as we grow old! The years are passing by!

The years are passing by!
Time's record hath such pages blurred
With hasty deed, with bitter word; Such sad mistakes mark all life's years; We scarce can read because of tears; We see dead faces on the walls, We hear dead voices in the halls, We touch some hands on bended knee, We kiss some lips we can not see-

The years are passing by! The years are passing by! They carry with them as they go, The rain, the sunshine, and the snow; They leave behind the drift of days Wherein each soul some penance pays Some hopes we have, but not our own, Some loves we cherish, not alone; And there are leaves and faded flowers That tell sad tales in memory's hours.

The years are passing by! The years are passing by!
The seal of silence on our lips We closer press. Time's umbra dips To deeper darkness down the lane Through which we walk to hide our pain. We smile and smile as one who bears A life untouched by grief or cares, But when in solitude we wait, We bow our head at sorrow's gate. The years are passing by!

The years are passing by! Another joins the passing band! Oh, is there not some other land Where compensation for all ills The measure of life's being fills? We wait the answer, but in vain, The shadow falls, a sense of pain Rests on us wheresoe'er we go, And whispers of the sod and snow. The years are passing by!

The years are passing by!
The sun dispels the Winter's chill; The snow is gone from vale and hill We wait the answer—not in vain; God's word brings light—relieves the pain. There is a land, a beauteous home, Where snow and chill shall never come. For death is now a vanquished foe, And faith and hope rejoice to know The years are passing by!

JOHNNIE.

BY STELLA.

"And who is Johnnie?" asked his mother, laying down her work and looking steadily into Harry's face.

"Why, Johnnie is all I know of his name," said Harry. "His father makes baskets, and lives at the foot of the hill yonder." and he pointed to a small house just in sight from the window. Mrs. Willis found, upon inquiry, that a family of Germans lived there, and had found few friends; and that they were very poor, having a family of small children, and that Johnnie had broken his leg.

"We will visit Johnnie to-day," said Mrs. Willis, a few days later, "and see if we can learn something more about him."

"May I go too?" asked Nellie, who was at the first of Johnnie's misfortune. "Yes, Nellie, you can," said her mother.

"I shall be glad to have you and Harry both Perhaps you will learn something useful." Soon there was a collection of dainties ready to be carried to little Johnnie.

"Take some grapes, too," said Harry.
"So we will," said his mother, who had quite forgotten the box full of large bunches put away for Winter use. Several large bunches were added to the variety, and soon Mrs. Willis and the children were on their way to the small cottage. The sun shone, and the wind was high; really Harry came near losing his cap while he and Nellie ran and skipped along in great glee. When they came in front of the door-yard, they waited until their mother came up. It was an untidy place surely. The yard must be entered by stooping under a railing which had been nailed across the gateway. After rapping at the first side door for some minutes, a large, rough looking man came out of a door beyond, inviting them into the kitchen. It was full of children, some crying, some playing, one little boy whittling, when suddenly he gave a scream; a cut finger to be tied up by the mother, who seemed much annoyed and out of patience. Mrs. Willis spoke of the misfortune of

which they had heard, and placed the articles on a table, saying they were for the little sick one. How those children gathered around to look at the dainties intended for Johnnie can best be imagined. Mrs. Willis could not refrain from dividing the gingerbread and mince-pie, leaving a portion, with the grapes, for Johnnie. The father seemed much pleased, and after telling Mrs. Willis about the accident, asked if she would like

"O, yes," she said, "the children would

be so disappointed not to see him."

Then the father opened the door which led to the next room, and asked the visitors to follow. There, upon an uneven straw bed, lay poor Johnnie. He was in a half-sitting posture, thin and pale, while his broken leg was in a wooden box. Mrs. Willis spoke kindly to him, taking his hand. He looked up, and a faint smile came over his face. There were traces of tears on his cheeks; she knew he had been weeping. She asked him if he suffered. He only smiled, while his father told how all night long he had cried

"I brought some grapes for you," said all stomach diseases, is excellent in sickness and brought the plate. How the weary eyes fevers. It is a specific against worms and dark garret.

walking home, and many were the cakes and apples sent little Johnnie during his recovery; and the following Christmas a wellfilled basket was sent to the cottage of the Neuralgia may be cured by rubbing the part basket-maker, and in return came a neat willow basket, for Harry and Nellie to carry | also to cure warts, and to destroy dandruff to market. The remembrance of a good deed is like the oasis in the desert. — Western Christian Advocate.

A FRESH START.

BY JOHN M. GREGORY, LL.D.

Among the noblest and worthiest feelings of parents are those which prompt them to educate their children. The father, whose boyhood was pinched with poverty, and who was forced out early into the hard struggle for life, with scant education, and with all desires for learning choked down, feels often that he was shut out from the great heritage of knowledge, which the world's great thinkers and the ages of human experiences have laid up for us all. In the bitter consciousness of his loss, he highly resolves that his son shall not so suffer. His own intellectual growth he believes was stopped midway in its possibilities; and he is forced to hold his humble course, shut out from much that is noblest and sweetest in human life; and he yearns that his children shall have all that he so keenly misses. Under these feelings, he watches their growth, and hurries them amid the deafening cat-calls of the boys. into school, often, indeed, fatally too soon. He urges his boy to study hard, and takes a pride in every step of progress made.

But in many, too many, cases, there comes a pause in the young scholar's career. He grows idle, stupid, and indifferent to study. Complaints come from the teachers, and bribes, threats, and punishments are resorted to in vain, to awaken the dormant energies and urge the boy, now, perhaps, in his teens, to more earnest and successful efforts. He is getting too old to drag or drive, and the disheartened father begins to feel that his cherished purpose must be abandoned. His boy will not, can not, become a scholar.

What a multitude will recognize this picture, and say, perhaps, "Well, there is no help for it. If a boy will not study, he will "O mamma," said Harry Willis, rushing not; and there is no use in forcing him to into the sitting-room, "Johnnie has his leg it." In many cases, perhaps, there is no remedy within reach; but not in all. Often the stupidity is the product of circumstances, and is curable.

In more than thirty years of school work, I have met with many such cases, which seemed perfectly obdurate and callous to all appeals. As a last resort, the advice has been given to the father to take his son from school, and put him to business or work, at some active employment which requires steady, daily, persistent industry. Let it be pleasant and agreeable, if may be; but constant, regular, and exacting, to fill up the whole time and occupy the whole energy. Usually one year of such employment works the cure. The boy feels the influence of fresh surroundings. He is transplanted into new soil, and breathes a new atmosphere. The too familiar books and scenes of schoollife are all left behind. School companionships are broken. He has emigrated to a new world, peopled with new faces, occupied with new interests, urged by new motives and desires.

Mind and body feel the change. Old habits are broken. Fresh sensations and fresh views of life come in. The weariness of study wears off; the blood flows with a new pulse, and the mind takes a fresh start.

After a year or two of this new life, the boy is a new boy. He may now return to school with a fresh childhood; but one disciplined to order, to effort, to success. A ife-time has been interposed between the old school-life and the new. His books seem new to him; study wears a fresh and attractive look, and education has a new purpose and meaning. Out of several cases in which this remedy has been tried, I have never

known a single failure. What your boy wants is a fresh start. He must be led, by the lapse of time and the discipline of work, to new ground, to a higher level, from which the outlook shall no longer wear the old faded appearance. change of schools is not enough. Time and toil must intervene. Do not mistake. A year of idleness will not do it. It is not rest that is needed, it is fresh work-strong, steady, muscle-training, mind taxing, heart lifting work—work that teaches order, steadiness of effort, patient industry, active purpose, self-control. If this does not succeed nothing will; the boy lacks mind or brain power. The hope of scholarship must be abandoned, and the boy sent to his place among the unfortunate ones for whom the higher training is not meant. For him, there is no fresh start in the pathway of school studies. In the humble ways of useful labor, he may win bread or even wealth. His year of toil has helped to fit him, at least, for this. In work or business, he may do good service to God and his fellow-men, may make life illustrious for its goodness, and, growing in grace here, may find in an-

"Young men," said he, solemnly, "I admit that your champion has forestalled here to charge you to do. Drink all the wine you can find that is made entirely out

This was enough.

THE TEA-PLANT.

The vegetation on the southern slopes of the eastern Himalayas, three or four thousand feet above the sea, though by no means luxuriant, is said to be very agreeable and of much interest to the botanist. Among the plants native to these slopes, planted in the course of Nature during the preparation of the earth for man, and left wild with the elephant and the leopard, is a shrub growing from twenty to thirty feet high, and well worthy to be selected for pleasant foliage and fine flowers. The lanceolate leaves are from two to six inches long, and the flowers are large and white, very fragrant, in clusters of two or three in the axils of the leaves. This is the tea-plant, of the genus Thea, very nearly allied to the genus Camellia, of which the Japonica and other species from China and Japan are favorite cultivations of the greenhouse in Europe and this country. Nowhere in the world but on the borders of the Himalayas and in the wild regions of Assam is the tea-plant found growing uncultivated; but it was not discovered in this, its natural habitation, until the present century. As a cultivated plant, the Chinese have certainly had it since the fourth century, and they claim it to be indigenous to their own soil—just as confidently as they claim the JOHN SANTEE, PRESIDENT, parentage of numerous valuable articles. China has given tea to the world, and has J. S. McMaster, Cashier. furnished a favorable home to the plant, other world the fresh start and the higher education.—National Baptist.

finally, after the correction of notable failures in methods of culture and of cure, it appears that the finest teas of Asia are those of these mountain-plains, and the choicest plants are of variety Assamica, lately propagated from the wild shrub of the mountains. -Popular Science Monthly.

YOUR BOY.

You do not know what is in him. Bear with him; be patient; wait. Feed him; clothe him; love him. He is a boy, and most boys are bad. You think him so lighthearted, and fear he is light-headed as well. But remember he calls you father. When he played in your lap, you fondly hoped he would some day be a great and useful man. Now that he has grown larger, and his young blood drives him into gleeful sport, and makes him impatient of serious things-rattling, playful, thoughtless—you almost despair. But don't be snappish and snarlish, and make him feel that you are disappointed

PUBLISHED BY THE

AMERICAN SABBATH TRACT SOCIETY. ALFRED CENTRE, N. Y.

NATURE'S GOD AND HIS MEMORIAL. A Series of Four Sermons on the subject of the Sabbath. By Nathan Wardner, Inte missionary at Shanghai China, subsequently engaged in Sabbath Reform labors in Scotland. 112 pp. Paper, 15 cents.

THE SABBATH AND THE SUNDAY. By Rev. A. H. Lewis, A. M. Part First, Arguments. Part Second, History. 16mo. 268 pp. Fine Cloth, \$1 25.

This volume is an earnest and able presentation of the Sabbath question, argumentatively and historical. ly, and should be in the hands of every one desiring light on the subject.

THOUGHTS SUGGESTED BY THE PERUSAL OF GILFIL LAN AND OTHER AUTHORS ON THE SABBATH. By Rev. Thos. B. Brown, Pastor of the Seventh-day Baptist Church at Little Genesee, N. Y. Second Edition, 125 pp. Fine Cloth, 50 cents. Paper, 10

This is in many respects the most able argument yet published. The author was educated in the observance of Sunday, and was for several years a highly esteemed minister in the Baptist denomination. The book is a careful review of the arguments in favor of Sunday, and especially of the work of James Gilfillan, of Scotland, which has been widely circulated among the clergymen of America. Mr. Brown has thoroughly sifted the popular notions relative to Sunday, with great candor, kindness and ability. We especially commend it to those who, like Mr. Brown, have been taught to revere Sunday as the

A DEFENSE OF THE SABBATH, in reply to Ward on the Fourth Commandment. By Geo. Carlow. Third Edition—Revised. 168 pp. 25 cents.

LOUIS BAGGER & CO., La Droit ding. Washington, D. C.

Popular Science.

LONGEVITY OF FISHES.—Dr. Buchner, of Giessen, presents to the Dorpat Natural History Society his contribution to the facts bearing upon the longevity of fishes, in which he remarks that a large eel is now living in a stone trough about ten feet long, with a board top, through which is continually running a stream of cold water. The eel has been kept in that trough for twenty-six years, and now measures nearly five feet in length, the weight, about a year and a half ago, being four and a half kilogrammes. It was estimated to be eight years old when first placed in the trough. Its food consists of small trout, chopped liver, and of coagulated blood.

CHICORY IN GROUND COFFEE.-A preliminary examination of coffee for admixture is best made by gently strewing the powder upon the surface of cold water. The oil contained in coffee prevents the particles from being readily wetted by the water, thus causing them to float. Chicory, burnt sugar, &c., contain no oil, and their caromel is very quickly extracted by the water, with the production of a brown color, while the particles themselves rapidly sink to the bottom of the water. On stirring the liquid, coffee becomes tolerably uniformly diffused without sensibly coloring the water, while chicory and other sweet roots quickly give a dark-brown turbid infusion.

FALSE VERMILION.—A curious case has been noticed in Germany, where a small cargo of vermilion was purchased, and, upon being analyzed, turned out to be red oxide of lead colored by eesine. This is an entirely novel sophistication. The eosine was separated from the oxide of lead by digesting the product for twenty-four hours in very strong alcohol. A much shorter time is sufficient to color the spirit enough to enable an expert chemist to detect the presence of this splendid organic coloring matter. Another kind of "vermilion" consists entirely of peroxide of iron, prepared especially to imitate brilliant and costly sulphide of mercury, which it does very well, and is largely used in England, France, and America. s.

ALCOHOL IN BREAD.—In the ordinary process of bread fermentation, a portion of the sugar contained in the flour is decomposed and converted into alcohol. It has been heretofore supposed that by the heat of baking the whole of this alcohol was expelled, but recent experiments indicate that a perceptible amount of alcohol still remains in yeast-raised bread after baking. The result of six experiments showed that one-third of one per cent. in weight of alcohol was obtainable from fresh-baked bread. From forty loaves of fresh bread, two pounds each, alcohol equal to one bottle of port wine may be extracted. From what is known as "aerated bread," or bread raised by mixture of carbonic acid gas with the dough, without fermentation, no alcohol can be extracted.

THE MASTODON IN AMERICA.—From the Geological Report of Indiana for 1880, by Prof. John Collett, recently published, it appears evident that the mastodon lived in this country at a not very remote period. In a skeleton found in Fountain county, the larger bones contained marrow, which was utilized by the bog-cutters for greasing their boots. In another, exhumed in Iroquois county, Ill., a mass of material was found in the locality of the stomach, which proved on careful separation to be a crushed mass of herbs and grasses such as still grow in that vicinity. This is important in connection with the fact that Dr. Plongeon finds evidence that the remarkable ruins of ancient palaces and cities in Yucatan, near Mexico, were contemporaneous with the

WEIGHING THE SUN BY A SOAP-BUBBLE. Prof. Pliny Earl Chase, of Haverford College, has deduced the weight and distance of the sun from the explosion of a mixture of oxygen and hydrogen in the proportions to form water, as in the common laboratory experiment with a soap-bubble. The process is quite too abstrusely mathematical for popular reading, but is based on the known thermal energy of the chemical combination in connection with the atomic weightf of the gases, and the laws of oscillation and orbital velocity. Adopting Regnault's value for the atomic weight of oxygen, he finds the sun's mean distance to be 92,769,000 miles, and its weight 331,591 times that of the earth, which are not far different from those ob-

tained by astronomers

BY PROF. W. R. POTTER. For Sabbath-day, February 18.

SCRIPTURE LESSON.-MARK 4: 1-20.

(Old Version.) (New Version.) And again he began to teach by the sea side. And there is gathered unto

him a very great multi-tude, so that he entered

into a boat, and sat in the sea; and all the multitude

devoured it. And other fell

and straightway it sprang up, because it had no deep-

ness of earth: and when

the sun was risen, it was scorched; and because it

choked it, and it yielded no 8 fruit. And others fell into the good ground, and yielded fruit, growing up and increasing; and brought forth, thirtyfold, and sixtyfold, and a hung dredfold. And he said,

Who hath ears to hear,

And when he was alone,

they that were about him with the twelve asked of

kingdom of God: but unto

things are done in para-bles: that seeing, they

shall ye know all the para-

straightway cometh Satan, and taketh away the word which hath been

sown in them. And these

in like manner are they that are sown upon the rocky places, who, when they have heard the word,

straightway receive it 7 with joy: and they have no root in themselves, but endure for a while; then,

when tribulation or perse-cution ariseth because of

the word, and the cares of the world, and the deceit

fulness of riches, and the lusts of other things enter-ing in, choke the word, and

it becometh unfruitful.

And those are they that

1. And he began again to teach by the sea side: and there was gathered unto him a great multitude, so that he entered into a ship, and sat in the sea; and the whole multitude was by the sea on

the land.
2. And he taught them many things by parables, and said unto them in his doc 3. Hearken; Behold, there went out a sower to sow:
4. And it came to pass,

he sowed, some fell by the way side, and the fowls of the air came and devoured it up. 5. And some fell on stonground, where it had no nuch earth; and immediately it sprang up, because it had no depth of earth: 6. But when the sun was up, it was scorched; and be-

cause it had no root, it with that no foot, it withered away.

7. And some fell among thorns, and the thorns grew up, and choked it, and it yielded no fruit.

8. And other fell on good ground, and did yield fruit that arrang up and increased.

that sprang up and increased and brought forth, some thir ty, and some sixty, and some an hundred. 9. And he said unto them He that hath ears to hear, let

10. And when he was alone they that were about him with the twelve asked of him the parable.

II. And he said unto them,

the mystery of the kingdom of God: but unto them that are without, all these things are done in parables: 12. That seeing they may see, and not perceive; and hearing they may hear, and not understand; lest at any time they should be converted, and their sins should be forgiven them.

13. And he said unto them Know ye not this parable and how then will ye know all parables?
14. The sower soweth the

word.
15. And these are they by the way side, where the word is sowu; but when they have heard, Satan cometh immedi ately, and taketh away the word that was sown in their

16. And these are they likewise which are sown on stony ground; who, when they have heard the word, immediately receive it with gladness; 17. And have no root in

themselves, and so endure but for a time: afterward, when affliction or persecution ariseth for the word's sake, immediately they are offend-18. And these are they

which are sown among thorns; such as hear the word, 19. And the cares of this world, and the deceitfulness of riches, and the lusts of other things entering in, choke the word, and it be-cometh unfruitful.

20. And these are they which are sown on good ground; such as hear the word, and receive it, and bring forth fruit, some thirtyfold, some sixty, and some an hundred.

TIME.-31 A.D.

PLACE.—Sea of Galilee

CONDITIONS OF GROWTH:

RULER OF ROME.—Tiberius Cæsar.

GOVERNOR OF JUDEA.-Pontius Pilate.

IV. Sowing-upon good ground. v. 8, 20.

CENTRAL TRUTH. - The right condition of the heart.

DAILY READINGS.

GOLDEN TEXT.—"He that hath an ear, let him hear what the Spirit saith unto the churches."—Rev. 2: 29.

OUTLINE.

II. Sowing-upon rocky ground. v. 5, 6, 16, 17.

III. Sowing-upon thorny ground. v. 7, 18, 19.

I. The wayside. v. 1-4, 15. Relate the main points in

Jesus' history, as we find them in Mark, previous to this

lesson. Where do we find him in this lesson? What had the

multitude gathered here for? Was it the first time? Why

did he enter the boat? What was the form of his teach-

ing? Define a parable. Was this a new mode of teaching?

What class of Jewish teachers taught much in this way?

What is the subject of this parable? In v. 3, whom does the

sower in the figure represent? Matt. 13: 37, 38. In a more

general sense, whom does it represent? What is the seed

sown? Luke 8: 11. Who is represented by the fowls? To

what condition of the heart, then, does this part of the

II. The rocky ground. v. 5, 6, 16, 17. In Jesus' ex-

planation, what does the stony ground signify? Mention the

natural consequences of such sowing in physical life. The

corresponding condition in spiritual life. Does your obser-

vation furnish any illustration of this teaching? Does your

III. The thorny ground. v. 7, 18, 19. What is the

thorns that crowd out the spiritual from our lives. In what way may our love of wealth become such a hindrance? Our love of worldly honor? Our love of pleasure? Our love of ease? How do any of these tend to make us neglectful of the means of grace and growth? Does the Sabbath service suffer from any of these thorns? Do the Sabbath-school interests? Does the prayer-meeting? Does the missionary work? If so, who is responsible?

IV. The good ground. v. 8, 20. Repeat the 8th verse; also the 20th. What condition of the heart, then, does the good ground represent? Why do we sow? Can we expect to reap except the conditions of growth be complied with? Do weeds grow without effort on our part? Does evil spring spontaneously? Does goodness come by chance? What important lesson is here taught?

NOTES.

This lesson may also be found in Luke 8: 4-15. and Matt. 13: 1-23. Briefly review the main points in the history of Jesus so far, as we find it in Mark. In very many ways, Jesus had now shown himself possessed of more than human ability. By the exceptional purity of his life, the wonderful exhibitions of his power, and the remarkable force of his teaching, he had drawn multitudes to him, so that, wherever he went, his way was thronged, notwithstanding the increasing opposition of the Pharisees. The carpenter's son had now become the most popular man of his time. Men in every station in life sought his presence, and some even pressed their way through the multitude that they might get the benefit of a touch of his garment. At this crisis in public opinion, many of his most wonderful miracles were performed, and some of his most striking parables uttered. Of the latter, the lesson of this week is one.

V. 1. And he began again. It was not the first time he had thus taught them by the sea. Luke 5: 1-3. By the sea. Sea of Galilee. So that he entered into a ship. Went on board a boat, such as were sometimes propelled by hand in those days. And sat in the sea. Withdrew from the shore a little way, within hearing distance, to avoid the pressure.

were by the sea on the 2 land. And he taught them many things in parables, V. 2. Taught them by parables. A comand said unto them in his teaching, Hearken: Be-hold, the sower went forth mon mode of teaching in those times with Jewish rabbis, and employed with great effect by Jesus. 4 to sow: and it came to pass, as he sowed, some seed fell by the way side, and the birds came and Parable. A fable, a figurative representation. In his doctrine. His teaching—the new salon the rocky ground, where it had not much earth;

V. 3. **Behold.** A form of expression to secure attention. A sower. A subject for a parable so common that all could understand.

V. 4. Some fell by the wayside. On unhad no root, it withered away. And other fell among the thorns, and the prepared ground, and so was left uncovered. And the fowls. The birds ate it up. thorns grew up, and choked it, and it yielded no

V. 5. And some fell on rocky ground. (New Version.) Meaning upon a rock with little dirt upon it. And immediately it sprang up. The little earth and moisture allowed the sun to quickly heat and germinate the seed.

V. 6. It was scorched. Burned. No root. Not sufficient soil to maintain growth and life. V. 7. And some fell among thorns.

Ground well seeded to thistles, brambles, etc., 11 him the parables. And he said unto them, Unto you which, when they grew, took the moisture and food from the seed that was sown, thus starving it.

V. 8. And other fell on good ground. Ground that was properly prepared, having sufficient may see, and not perceive; and hearing, they may hear, and not understand; lest haply they should turn again, and it should be depth to retain heat and moisture; not grown up to weeds. And did yield fruit. A natural result of favorable conditions.

forgiven them. And he saith unto them, Know ye not this parable? and how V. 9. He that hath ears to hear. Whoso ever hears me, let him ponder this parable, for it is

bles? The sower soweth the word. And these are they by the way side, where the word is sown; and when they have heard, to teach an important lesson. V. 10. When he was alone. When the crowd had dispersed. About him. Such as had stood near him. The twelve. The twelve apostles chosen before this.

V. 11. And he said unto them. Gave them the reasons for teaching in parables. The mystery of the kingdom of God. Referring, not to anything which was mysterious as he was now teaching it, but to a fuller development of those prophecies which were in the old dispensation, which were before only partially understood. Them the word, straightway
the they stumble. And others
are they that are sown
among the thorns; these
are they that have heard that are without. The multitude; the people who came to hear.

V. 12. Seeing, they may see, and not perceive. A way of saying that they might understand the words, the letter of his teaching, and yet be utterly ignorant of their significance or spiritual meaning. were sown upon the good ground; such as hear the word, and accept it, and bear fruit, thirtyfold, and sixtyfold, and a hundred-

V. 13. How then will ye know. A clear intimation that he should teach much by parables; also an expression of surprise that they had not the spiritual perception to recognize the lesson taught.

V. 14. The sower soweth the word. This means the seed referred to in verse 3 of the lesson. The question naturally arises, Who is the sower? In the parable of the mustard seed, we are taught that the seed is the word of God; and in the parable of the tares that he who soweth the good seed is the Son of man; that the field is the world; and that he that soweth the tares is the devil. Matt. 13: 37, 38.

COMMENTS.

I. The wayside. v. 15. Jesus' own explanation of v. 4. There is no more common experience of the heart than this, and none less desirable, none more dangerous. The affairs of this life demand so much of our attention, and so much of our affection, that with most of us the serious impressions of life are about the last made, and therefore the last heeded. The admonitions of the Spirit produce little effect upon us when our hearts are all unused to thoughts of God, his mercy and goodness, filled full as they are of selfish desires and motives. They are fit for the planting, if we would grow the fruits of holiness. Our natural leadings are away from God, toward evil. We repel gospel truth because goodness is inimical to evil; and as we are of the earth, earthy, so are our thoughts, our lives. Let us re member that our wayside barrenness comes of our own volition. We turn away from the best influences, and thus prevent their taking root.

-II. The stony ground. v. 16. This is Jesus' explanation of v. 5. Compare Luke 8: 13, 14. There is a class of persons, a large class, too, who are easily impressed with all new things, especially if there is a leaning of popular approbation toward it. They are quite ready to embrace new doctrines, new enterprises of any kind, before counting the cost, or soberly considering results. Such men and ordinary result of sowing among thorns? To what did the | women, boys and girls, are plenty in the world, and

pulsive people, who lack strength-not of purpose, perhaps, but of continued determination. They work well for a time, when all is fair, and the popular current runs high; but adversity easily overwhelms them. They lack depth of soil. The rock under the soil is too near the surface. A hot sun soon affects their thrift. If they become Christians, it is usually for a season, and then lose their vitality,

III. Thorny ground. v. 18, 19. The trouble is, we allow ourselves to be displaced. We are drawn away by being over-occupied with temporal matters, and thus allow other considerations to crowd out our spiritual life. Our race after wealth, place, and all the good things of this life, very often hinders our progress, and too often kills us.- It is this that the Savior would warn us against. We too often show to the world that, after all, our god is the world, however much we insist that it is not. We show, by a tardy service, that he does not occupy the first place in our hearts—that really he does not. We show that the thorns of self-interest, of supreme devotion to business, self-aggrandizement and ease, crowd out the treasure that would grow in a better

IV. The good ground. v. 20. We notice, in the last case mentioned in this parable, that the conditions of growth are all favorable. The ground is prepared for the seed. It is soft, warm, deep, and clean. Notice the fruitage: thirty, sixty, and hundredfold. For what do we live as Christians Is it simply to save ourselves from perdition as by fire? or is it to fit ourselves, by love of the right for righteousness' sake, by love of our fellows, by sympathy with all good, for the joy it brings to us in this life, as well as to fit us for the natural inherit ance that such a life brings, that we may thus be prepared to enjoy as well as to inherit it.

The individual answers of such as study this lesson will indicate the heart preparation in which has flourished or withered the fruits of the sower as portrayed in this parable of our Savior.

FOR THE BLACKBOARD.

 $\prod_{\mathbf{ow}}^{EED}$

THE SOWER.

A sower once went forth to sow, To scatter broadcast o'er the land The seed that, in due time, should grow A harvest for the reaper's hand.

And, as he sowed the precious seed, Some by the sterile wayside fell, Where no moist soil supplied its need, The greed of hungry birds to quell.

And other fell on rocky ground, Where shallow earth no root could give. When rolled the sun his daily round, It died; no rootless plant could live.

And other seed 'mong thorns did fall, Which springing up did choke the blade;
For thick they gree and rank and tall:
No fruit could grow in such a shade.

But other fell on fertile soil Where, nursed by rain and gathering dew, Much fruit repaid the laborer's toil; Increased a hundred fold, it grew.

The Word of God's the seed that's sown; The varied field's the human heart: The shallow soil, the thorns and stone, All find in man their counterpart.

THE SOWER.

Ever the seed-grains of truth are falling. Ever their golden sheen is calling, To the way-side, a lodgment to intercept Birds of the air, with seductive voices Cloaking their theft, while their prince rejoices In a legion of agents, so nimble and apt.

Ever the seed-grains of truth are falling, Ever the powers of darkness appalling,
Push rocky tusks through the shallow soil; Each budding germ with their breath they blast it, A moment the delicate rootlets have lasted Then wither in death, whence is no recoil

Ever the seed-grains of truth are falling, Ever the cruel brambles enthralling,

Thrust their sharp spears through the springing Forcing and choking, still ruder and ruder,

With the rank growth of a noisome intruder, The plant that is life to man in his need.

O Thou grest Sower, with humble endeavor, My heart I have tilled, drop thy seed in forever, Fence in the field, with the hedgerows of grace, Shield it from bird and from rock and from brier, Guard the green blades waxing higher and higher, Lastly upon them Thy harvest-wealth place.

NEW WINE AND NEW BOTTLES.

We have been taught to believe that there is but one kind of wine referred to in the Bible, and that always fermented. Hence new wine must be put into new bottles; then the stretch and strength of the new skin would preserve both. But the difficulty of reconciling denunciations with recommendations, and the taunts of wicked men, resulthard as the wayside, and must be softened and made ed in an investigation that again demonstrated that inspiration makes no physical, mental, moral or chemical mistakes. If a moment's reflection will not convince any man, a little experimenting will, that no leathern, glass or wooden bottle, new or old, can be made strong enough to resist the expansive force of the carbonic acid gas generated by the fermenting wine.

The object of putting new wine into new bottles was to keep it from fermenting. Any one of the several means known in the Savior's time to prevent fermentation could be used, the wine then put into a new leathern bottle, tied up air-tight, and it would Savior liken this sort of sowing! Mention some of the they are all about us. They are enthusiastic, im- keep any desired length of time, as our Miss Addie E. Ashbaugh, of

canned fruit and medicinal and sacramental wines now keep. When the albuminous particles in their wine should come in contact with the oxygen of the atmosphere the wine would ferment. The thousands of albuminous particles that would unavoidably adhere to the thousands of fleshy fibers that are inside of the animal skin, though dried as hard as our yeast cakes, had each enough of the fermenting quality to ferment any amount of wine that they might be placed in. Hence to keep clear of these, new wine must be put into new skins. The idea of stretch and strength of the new bottle, though it had some, and more than the old, is a weaker figure than the Savior ever used. As it was necessary to keep every particle of ferment from the new wine and the new bottle, to perserve them, so it was necessary to keep the hallowed, sanctifying, healing, and sav- in the "valley of the shadow." ing gospel of Christ from every particle of the envious, selfish, rabbinical traditions. Now there is beauty and force in the figure. We are not playing into the hands of the lovers and venders of drink. We are not family and many friends to mourn his loss. encouraging them by teaching our Sabbathschool children the time-honored error, that Christ made, used, recommended, or even here admitted, the existence of that which God so plainly tells us not to "look upon." H. P. Burdick.

QUIET WORKERS.—A word for the quiet workers: "The strength of the ministry today is not in her noisy names, but in her great men who have resisted the temptation to push themselves forward by unmanly arts."-Mr. J. H. Mann, before the Baptist New York State Conference. "Oh, the great silent men! the noble silent men, scattered here and there, each in his own department: silently thinking, silently working, whom no morning newspaper makes mention of. They are the salt of the earth."— Thomas Carlyle. The voice of St. Paul uttering his convincing logic and thrilling appeals, died when his lips were sealed. His letters, written in the quiet retirement of the homes where he was entertained, or in the silence of his prison abodes, now after eighteen centuries are ringing round the world. The sower in the fields makes no great ado as he scatters the precious seed, but in due time the harvests laugh all the same."—Our Bible Teacher.

AT an Iowa Sunday-school convention a school was reported which "takes no Sunday-school paper, lesson-leaf, or quarterly." The school had one hundred dollars in the treasury, and the officers did not know what to do with their funds, and were puzzled to know why their school did not prosper. Of course Iowa enterprise could not suffer many such schools to exist.—Our Bible Teacher.

LITTLE PHIL, a bright five-years-old, is afraid of thunder. During the recent hot spell, his mother would remark, "Oh, I pray for rain." One day when she said it, Phil thus addressed her: "Oh, mamma, I will tell you why it don't rain. When I say my prayers, I des say, 'Please don't pay any 'tention to what mamma says, cos I am 'fraid of thunder."-Wit and Wisdom.

A DIAMOND-LIKE CHRISTIAN.—The diamond, in whatever direction it is turned, is equally brilliant, equally attractive, nor requires to be placed in a certain position to exhibit its matchless lustre. So should the Christian shine, and when the divine principle fully pervades the soul, thus uniformly will he reflect the light he receives from

SOLD UNDER A POSITIVE GUARANTEE that coughs, colds, consumption, hoarseness, asthma, whooping cough, and particularly croup and all throat and lung difficulties can be cured by Hamilton's Cough Balsam. If it fails, return the empty bottles and we will promptly refund the price paid. Sample bottles, 25 cents; large size 50 cents. Sold by G. W. Rosebush and H. P. Saunders, M. D., Alfred Centre, and Wm. R. Burdick, Alfred, N. Y.

ATTENTION.—A cough, a cold, or a sore throat, should be checked at once. If allowed to continue, a permanent throat disease is often the result. Ham alton's Cough Troches reach directly the seat of the disease, and give almost immediate relief. For public speakers, singers, and those who overtax the voice they will render articulation easy. Price 25 cents per box. Sold by G. W. Rosebush and H. P. Saunders, M. D., Alfred Centre, and Wm. R. Burdick, Alfred, N. Y.

Does IT INJURE THE SKIN?-It does not. Ham ilton's Oriental Balm is entirely free from anything calculated to injure the skin or health. It is decidedly the best thing in the market. It removes tan, pimples, freckles, moth patches, black worms or grubs, and leaves the skin clear and transparent. Price 50 cents per bottle. Sold by G. W. Rosebush and H. P. Saunders, M. D., Alfred Centre, and Wm. R. Burdick, Alfred, N. Y.

A SURE CURE FOR TOOTHACHE.—Oh, the suffering caused by toothache. The inclination is to rush to the dentist and have the offending tooth extracted even at the risk of sadly marring the good looks. Don't do it. Go to the druggist instead and get Hamilton's Dental Toothache Drops. They will cure in one minute. Price per bottle, 25 cents. Sold by G. W. Rosebush and H. P. Saunders, M. D., Alfred Centre, and Wm. R. Burdick, Alfred, N. Y.

\$1,500 per year can be easily made at home work ing for E. G. Rideout & Co., 10 Barclay street, New York. Send for their catalogue and full particulars.

MARRIED.

In Hopkinton City, R. I., Jan. 9, 1882, by Rev. S. Griswold, Mr Edward S. Barber and Miss Ida E. JACQUES, both of Hopkinton.

In Hopkinton City, R. I., Jan. 21, 1882, by Rev. . S. Griswold, Mr. ERNEST P. PALMER and Miss JOSEPHINE L. WOODMANCY, both of Hopkinton.

In Hartsville, N. Y., Feb. 1, 1882, IRA S., son of Joseph and Naucy Clarke, aged 19 years and 9 months. His death was caused by an accident, that occurred five days previous. A circular saw running by horse power, and used for cutting wood, burst, and a piece, striking him, mangled his head and face, crushing bones, and probably injuring the brain. He lingered in a half conscious state, though his friends think that at times he realized his condition. Less than a year ago, this family was called to mourn the loss of a son taken almost as suddenly by disease, and this affliction fills their cup of sor row almost to overflowing. Still they trust God who "doeth all things well." In Shiloh, N. J., Jan. 30, 1882, after a lingering ill

ness with consumption, LILLIE J. BONHAM, daugh. ter of Richard J. and Hannah A. Bonham, in the 20th year of her age. She lived a true-hearted Christian, and the believer's hope was her sure support In Westerly, R. I., Jan. 23, 1882, of heart disease

resulting in dropsy, Mr. EDWIN C. CLARKE, youngest son of the late Col. Weeden Clarke, aged 5 years and 5 months. He bore his long and painful sickness with patience, and peacefully departed, entertaining a good hope of a better life. He leaves a
