#### KINGS.

"'Tis so great, and yet so awful, So bewildering, yet so brave, To be king in every conflict Where before I crouched a slave. It's so glorious to be conscious Of a glorious power within, Stronger than the rallying forces Of a charged and marshaled sin. Never in those old romances Felt I half the sense of life That I feel within me stirring. Standing in the place of strife. Oh. those olden days of dalliance When I wantoned with my fate, When I trifled with a knowledge That well nigh had come too late. Yet, my soul, look not behind thee, Thou hast work to do at last; Let the brave toil of the Present Overarch the crumbling Past."

WHAT IS YOUR LIFE?

JAMES 4: 13, 14.

Abstract of a sermon preached at the Seventh day Baptist church in Rockville, R. I., by the pastor, REV. U. M. BABCOCK, and furnished for publication in the SABBATH RECORDER by request.

Sometimes, it is well to pause and ask, What of my life? Life is so swiftly passing that men scarcely think to stop and inquire its duties and privileges or its joys and sorrake, never looking up to see the golden crown which is being held over their heads. It is the dirt and filth of the world in which is not thus found. Life is a strange maniit scorches itself to death. #### SAN FRANCISCO CABLE ROADS.

The San Francisco householder, and the Crosus particularly, has "a station like the herald Mercury new-lighted on a heavenkissing hill." How in the world, I have asked, does he get up there? Well, then, by the cable roads. I should consider the It is a peculiar kind of tramway, quite as usecars, coupled together, are seen moving at a horse, no steam, no vestiges of machinery, no ostensible means of locometion. The astonished comment of the Chinaman, ob it is, may be worth repeating once more for its quaint force: "Mellican man's wagon, no like flashee." The solution of the mystery in an engine-house at the top of the hill. The foremost of the two cars is provided with a grip or pincers, running underneath it, through a continuous crevice in the same box as the cable, and managed by a conductor. When he wishes to go on he clutches the always-moving cable, and goes with it: if he wishes to stop, he simply lets go and puts on a brake. Fortunately there is no snow or ice in this climate to clog the cencase, must be open. The system has been applied, however, with emendations, in Chicago, and no doubt could be in New

The great houses on the hill, like almost all the residences of the city, are found to be of wood. It seems a pity to the outsider, considering the money spent, that they should be. The fact is attributed to the su perior warmth and dryness of wood over brick and stone in a moist, cool climate, and also to its greater security against earthquakes. Whatever the reason, the San Francisco Crœsuses have reared for themselves palaces which might be swept off by a breath, writers of modern times, that it is not neccessary to and leave no trace of their existence. #### BOOKS AND MAGAZINES.

THE MAY CENTURY makes an appeal to a large variety of tastes: "The Aborigines and the Colonists," by Edward Eggleston; the first of two papers, by H. H., on the Spanish Missions of Southern California, entitled, "Father Junipero and his Work," and thirdly, a paper of great readableness, by Frank H. Cushings, on his "Adventures in Zuni." By way of personal interest, there are three sketches. One of Cardinal Manning, written by C. Keegan Paul; a second, an exposition of Salvini's King Leon, by Emma Lazarus; and third, a charming light essay by Henry James, Jr., on Du Maurier's Caricatures in 'Punch." Apropos of the recent criticisms of American literature and writing about England, Charles D. Warner makes a retort courteous to his critics in a humorous paper entitled, "The English Volunteers During the Last Invasion." "Moral Purpose in Art," by the late Sidney Lanier, treats a theme not uninteresting. There is also an illustrated paper on "The Father of American Libraries," (Philadelphia Public Library,) by Bunford Samuel. The Christian League of Connecticut," by Washton Gladden, is continued. In fiction there is an installment of Wm. D. Howell's serial, "A Woman's Reason;" a short story by Frank R. Stockton in the Rudder Grange series, "Pomona's Daughter;" and the first half of a story of much freshness and humor, by Joel Chandler Harris, namely, "At Teague Poteets." The remainder is as interesting as the above articles. The publishers have introduced a new feature with this number, a department called "Open Letters," doing away with the departments of "Literature," "Home and Society," and the "World's Work."

St. Nicholas for May has truly a Spring like appearance, opening the second part of the volume with an interesting table of contents, the important features of which are the opening chapters of "Swept Away," a new serial, by Edward S. Ellis; and the first part of "The Story of Robin Hood," by Maurice Thompson; "The Tinkham Brothers" Tide-Mill," J. T. Trowbridge's entertaining serial; Lucy Larcom's out of door sketch, called "Among the Polly dancers" "The Last of the Peterkins" is a paper with a suggestive title, by Miss Lucretia P Hale. In 1769 he entered the House of Burgesses and 1775 found him in Congress. He wrote the Declaration pushee, no pullee; all same go top-side hill of Independence, excepting two or three slight changes mad by Franklin and Adams. The year 1779 found him Governor of Virginia, but he was not the man for the place. On July 5, 1784, he sailed from Boston as Minister to France. In 1790 he entered upon his duties as Secretary of State. It was while he occupied this position, that he was continually at sword's points with Hamilton. He soon became Vice President, under Adams as President. While holding this office the author describes him as, 'in matters of detail he was politic, not always ingenuous, not rigidly truthful; not altogether incapable of subterfuge and even of meanness." March 4 1801, he became President, holding the position two terms. Afterserving his country in this capacity he retired to his home at Monticello, where he was continually visited by all kinds of people, friends and strangers; he entertained them all, keeping a kind of hotel, and was made bankrupt, as all the produce of the estate was eaten up by the guests... The chief interest and occupation of Jefferson's last years were concentrated in establishing the University of Virginia. He died on the 4th of July, 1826, a few hours succeeding the death of John Adams. This work is the most impartial of all the biographical works thus far published in the series of "American Statesmen," and can be accepted as a satisfactory account of Jefferson and the causes which have made him so strong a force in the politics of America. #### FOUR DAYS INLAND.

In due time we arrived in the suburb just outside of the walled city Soong Kong. In political importance, this is the chief city of the Kiang-Su province, the highest provincial officers having their residence there. We approached the city from the north, and finding that it was a quiet place, and gave promise of being a very desirable spot to remain through the night, we determined to cast anchor. This place, the lau-da (captain) said, would be free from any disturbance. It is not always possible to find a place where your slumber will not be disturbed by the noisy boatmen as they pass he had frequently sold it to foreigners as they passed that way. We concluded to buy some, and I went with him to see that the milking was properly done; for, strange to say, the Chinese do put water in their milk. To be sure of getting pure milk, it takes three persons to milk a cow, one to hold the cow, one to watch, and one to extract the milk, and with all these precautions the foreigner has been known to get half water. The milkman would have an arrangement for putting a quantity of water up the sleeves of his coat, and when he was in the act of milking, the water would flow down into the milk-dish with the milk. Having experienced much of this trickery, you will not think it strange that I wished to see this man milk his cow myself. It was nearly dark when we arrived at his house. I was invited in. In the room were some half dozen natives taking their Ya-Vau, evening rice, all sitting about a small finished the New Testament. A part of it table three or four feet square. Just above, over the table, hung a little bamboo rack, holding a shallow basin of bean oil, from corner was a door-way, from which were several heads peering to catch a glimpse of the stranger. I inquired where the milking was to be done. They said in the room just back. Passing through a long, narrow alley, I came to the place, where I found a man endeavoring to milk a large buffalo cow, leisurely eating some grass which had, been placed before it. Coaxing, petting, scolding did no good. I was evidently thwarted in my purpose. There was a league between the beast and the Chinamen to keep me in perfect ignorance about the matter of watering the milk. I returned without having accomplished my object, and must, after all, trust them to bring whatever they choose in the morning. Early we moved our boat to the West Gate of the city, where it was very thickly populated. Soon after breakfast, we were on the streets and in the tea-shops, preaching and distributing books and tracts. We stopped to preach right close to the city wall, near the entrance, where there was a projection of mason-work several feet above made for the occasion; and as we stood there, not upon Mars' Hill, but still before a people quite as zealous in their idolatrous worship as the Athenians, we preached to them about the Unknown God, whom men should not liken to gold, silver, and wood, graven by the skill of man's hand. A large company of passers-by soon gathered about us, so that the street was quite impassable. Distributing a good number of tracts, we thought best to pass on into the city, stopping here and there, as circumstances seemed to demand. were progressing up the main street, with a crowd of people following us, when suddenly a native accosted us, calling me by name; as we halted, he threw open the doors of a buildand that the building he had opened was the | cotton. place where he was preaching. The Bible was translated into the Burmese language by Dr. Judson. It takes many years of study and labor to translate the whole of the Scriptures into any language, and it was twenty years after Mr. Judson reached Burmah before he finished this work. He, by this time, so well understood the hard Burmese tongue, so well knew all the shades of meaning, that I suppose this Burman Bible is one of the best and most faithful translations of God's Word that ever was made. Just before Mr. and Mrs. Judson went to live in the "golden city," he had had been printed, but the larger part was only in writing.

On the 8th of June, 1824, early in the war which protruded a lighted wick, which shed between England and Burmah, Mr. Judson a dull, glimmering light through the dismal was taken from his home in Ava, and thrust occupying the middle and the upper classes a dull, glimmering light through the dismal was vanced from the dismal into prison. Mrs. Judson then took this how terribly hard it will be to win these circle how the traffic shall be conducted, but shall to ask all sorts of questions; wanted to know | and a few things of value, buried it in the whether I was English, French, or an earth under the house. But it could not American; where I lived, where going, and long stay there, for it was the rainy season, what I was doing, &c., &c. Back in the and the dampness would soon cause it to mould.

It could not be returned to the house, for, if found by the Burmans, it would be destroyed. When Mr. and Mrs. Judson, three days later, met at the door of his prison, and were permitted to speak a few words to each other, one of the first questions asked by would try to take care of it. So Mrs. Judson put the treasure inside of a roll of cotton, carefully sewed it up, then put on a cover, and Mr. Judson used it for a pillow. It looked so poor and hard that not even the keeper, who wanted almost everything,

When the missionary had been a prisoner seven months, suddenly a change came. The little bamboo room, which Mrs. Judson had been allowed to have made for her husband in the prison-yard, was torn down, the pillow and mats scattered, and Mr. Judson with the other white prisoners hurried into the inner prison. Two more pairs of fetters were put upon their ankles—they already had three pairs—and there, fastened to a bamboo the level of the street, a very good pulpit it pole, more than a hundred men expected to be killed before the morning.

Mr. Judson said that even during this terrible night, he thought of his pillow, and wondered if its precious contents would ever fall into the hands of his wife; and he even thought how he might have better translated some passages of the Divine Word.

The keeper, to whose share the pillow fell, gladly exchanged it for a good one brought to the better one. Later in the season, when cause, and, by argument and appeal to the Mr. Judson was hurried away to Oung-penla, he, in common with the other prisoners, was robbed of nearly all his clothing, and allowed to take nothing with him. Here is an incident for the little people. And, as older people are quite likely to be interested in whatever interests their children, we suggest that it will be worth while superstition and the sepulchers of dead heath- for the older people to read it. If any one, old or young, shall catch the spirit of this little girl and learn to give of their own, and that the best, it will be profitable reading:

> "We must have a far more thorough arousal as to our duty to missions than we have dreamed that we need. ### TEMPERANCE AND THE PRESS.

One of the signs of progress in the temperance cause is the amount of attention it is receiving through the press of the country. Of course we mean, not the wine-press, or the cider-press, but the newspaper-press. Almost all the great religious journals of the country, and many of the secular newspapers, by Mrs. Judson, with, perhaps, some wonder | have their columns devoted, weekly, to a that the white man should prefer the poorer | survey of the field giving the progress of the humane and Christian sentiment of their readers, broadening and deepening the temtable are the Christian Union, Independent and American Reformer, of New York, the Christian Statesman, of Philadelphia, the When such periodicals, and the hosts of cussing there the various phases of this great question, it is not only a sign of progwhich produce that progress as well. #### THE ISSUE IN OHIO.

The Legislature of Ohio has decided to submit to the people of that State two propositions to amend the constitution on the 'liquor question. By this action the choice on any case, when it is presented in due "Constitutional Regulation" is before the people. We give below the two propositions with some remarks upon the issue by the Western Christian Advocate, of Cincinnati. FIRST PROPOSITION.

"The General Assembly shall regulate the traffic in intoxicating liquors so as to provide against evils resulting therefrom; and its power to levy taxes or assessments thereon is not limited by any provision

eighteen of the schedule shall be repealed, and there shall be substituted for it the following

"The manufacture of and the traffic in intoxicating liquors to be used as a beverage are forever pro hibited; and the General Assembly shall provide by law for the enforcement of this provision.

lation of the State concerning it shall be that the existing government has promised only regulative. That is, it may prescribe to introduce legislation, and that the subnot prohibit. The laws to be enacted may and that the information asked for would "provide against the evils resulting therefrom." They may limit the number of saloons; prescribe the number of hours, and the days in the week in which liquor may be sold; they may license or tax; they may build poor-houses, infirmaries, jails, and penitentiaries, or even create pensions for the victims of the traffic. But the traffic itself, as such, is to be indestructible by legislation. It can only be "regulated."

It follows from this that the first proposition does not put the traffic under the absolute control of the legislature to be deal According to the Missionary Magazine the | with according to the convictions of the people, and the instruction given by them to their representatives. It gives only such control as can be exercised under a system of license or of taxation.

The second proposition would, if adopted, forever prohibit both the manufacture of and the traffic in intoxicating liquors to be used as a beverage, and would require the General Assembly to enforce this prohibition by law. This proposition has in it something definite, something which, if executed, would bestow immeasurable blessings upon a vast multitude of individuals, and upon

#### ABSURDITY OF THE HIGH GROG POLICY.

The absurdity of the limited, high license system which is just now so popular with a certain class of politicians could scarcely be more forcibly exhibited than by placing side by side two sentences of an address made in its advocacy by Rev. H. W. Beecher at a meeting held Tuesday evening, Nov. 27th, in the Brooklyn Academy of Music. We reproduce them as reported in the New York Tribune of the 28th ult.

"Licensing liquor "There should be a lishops is like licensing cense law restricting the wolves to run around."

On the first we hear the echo of the clarion voice of the stalwart old Prohibitionist, Dr. Lyman Beecher, who said: "I challenge any man to show that a rum seller is not a murderer;" in the second is the conscienceless proposition of social aristocracy, ecclesiastical treachery and party expediency, so called, saying, "We can't go with these fanattical impracticables who insist upon having no 'license wolves;' we are willing to pay \$500, of \$1,000, for our legal sanction to their ravenous purpose!" These cigarettes are sold at very low prices, and are bought mostly by boys,

#### BREVITIES.

The status of the prohibitory amendment before the Supreme Court of Iowa has not been generally understood. It appears, under a law which has not been in existence many years, that the Supreme Court has no option in the matter of granting a rehearing between "Constitutional Prohibition" and form. It is obliged to receive the petition, and then set a time for hearing arguments for and against. This it has done in the case of the prohibitory amendment. The hearing is set down for the April term.

The liquor prohibitory amendment, with a provision attached for the compensation "The additional section" in and with section eighteen of the schedule shall be repealed, and there shall be substituted for it the following:

"The additional section" in and with section of pecuniary sufferers by reason of abolition of alcoholic traffic, has been defeated in the House of Representatives, at Harrisburg, Pa, by a vote of 27 yeas to 151 nays. Many Prohibitionists voted against it on account of the reimbursement clause. The amendment can not again be considered in the House this session as a motion to recon-"The additional section" in and with section sider was voted down. On the proposition the yeas were 74, nays 100.

A lady has just given \$6,000 to the temperance cause who a few years ago was told by her husband that as temperance was being agitated in their State (Virginia) he thought he would sign the pledge to help keep the cause. With great pride she said, "I should be ashamed of a husband who would thus surrender his personal liberty." One year from that time he died of delirum tremens, and her sons, learning to drink at their mother's table, have both died drunkards.

It is alleged that the prohibition of the liquor-traffic in Maine has led to a largely increased consumption of tobacco, opium, etc., in that State. Ex-Governor Dingley, in a late address, called attention to the very significant fact that the revenue reports show that while the expenditure for tobacco averages one dollar per capita in the United States, it averages but seventeen cents per capita in the State of Maine.

In Denmark, also, there is an awakening. The number of licensed saloons in Copenhagen has been reduced from 1,350 to 300 Sales to minors and intoxicated persons are strictly forbidden, and when a man is found drunk he is to be taken home in a close carriage at the cost of the dealer who sold him

In Russia, the government has become tired of relying on the inclination of its subjects as a chief source of revenue, and has consequently set at work to diminish the number of liquor shops. Formerly it encouraged their multiplication, and punished as disloyal some public advocates of temper-

There are nearly four thousand drinking saloons in Chicago; and it is estimated that thirty million dollars are expended annually for intoxicating liquors in that one city.

In the Legislature of Kansas, recently, the House decided not to submit to the people of the State the question of constitutional prohibition. The vote stood 65 to 51.

Mr. Gladstone is credited with the remark that the drinking customs of Great Britain are bringing on that country all the evils of war, pestilence, and famine.

At Hyde Park, Pa., nearly all the saloon keepers were refused a renewal of licenses. This action is due to the strenuous efforts of the Temperance Union.

"Wisdom is the principal thing, therefore get wisdom; and with all thy getting get understand-

In the first volume, and number 49 of the Protestant Sentinel of our denomination, a reference is made to an address of Mr. Z. T. Bentley before a select school in the Berlin Academy, New York, delivered March 2, 1831. This school was in session at least the Winter previous. It would be a matter of interest to know how long it was in operation, how many students attended it, what academic character it acquired, and what share our Seventh-day people at Berlin took in the enterprise. It should be remembered that this school was held six years before the Alfred Academy, and seven years before De-Ruyter Institute were opened.

THE North-Western Seventh-day Baptist As ciution was organized at Milton, Wis., Jely 8, 1847. The following is one of the as which were carefully discussed and washimously adopted by that body:

#### RELIGIOUS WORK IN COLLEGES.

There are few years in the life of any man more decisive and important to him than the years he spends in college. The acquisition of the facts and truths to be found in books is of small moment compared with that almost indefinable combination of influences which shapes his plans of life, fixes his habits of thought, gives the tread of character, and so makes or unmakes a man. We have just happened upon a paragraph in an exchange, written by a man who, twenty years ago, was a schoolmate of ours, and from whom we have not heard before in all these years. We well remember some of his struggles of mind, a little previous to the time of which he writes. The same train of influences which finally led him to Christ, helped many another thoughtless one to higher aims and nobler achievements in life's conflicts. It is an occasion for rejoicing whenever, in any school of learning, there is evidence of ueh a spirit and system of work as brings I can only refer to is this: The church must its students to a life of faith in God and keep the Sabbath herself, and set a proper obedience to his will. Believing that other Milton students who read the RECORDER will be glad to read this letter from our friend Steele, we copy it here:

LEMOYNE NORMAL INSTITUTE, MEMPHIS, Tenn., March, 28, 1883. Rev. W. C. Whitford, Milton, Wis.:

Dear Brother, -A few days since, in a column of religious intelligence, I read of the precious work you have had at the college in the conversion of a large number of the students. The statement carried me back to seventeen years ago this Spring, (can it be so long?) when in the old chapel I was led to accept Christ as my guide and portion. I recall the time with joy of heart, and with gratitude to God and you to that I was then led as I was; and to-night, as I think over the years since then, and the experiences they have brought to me, I know not how I could have lived but for the grace and consolation that have come to me through the Saviour. Dark and hard as the way has been, the darkest day has had in it the full light of his love for me, and his promise, "I will never leave thee nor forsake thee," has never failed me. I am sure if I have accomplished anything good in my life, it is due to the fact that I then chose Christ, to be directed by his will in his ways. So far as I have kept in those ways they have been to me "ways of pleasantness and paths of peace." Very truly, etc., A. J. STEELE.

Under the above heading, the Outlook announces its platform at some length. We take the liberty to make quite extensive extracts from it, for our Sabbath Reform Department this week, in the hope that some will thus read it who have not already done so, and that others who are not now so interested, may become interested in the publication and work of the Outlook.

Why does the Outlook make Sabbath Reform prominent? Because of its vital importance. The path of no-Sabbathism coming changes, have made Sunday business, share through a bed of flowers. The most earnest effort that has ever been made to check the tide of no-Sabbathism by Sundayobservance was made in the Puritan movement. The civil law enforced which have produced them. The "European and there to enforce it on the ground of the "general good of society," do little more than reveal the inability of the authorities

Another method of formulating this destructive no-Sabbathism, and one which reveals the conscienceless state of the public mind and the church is this: "If we keep Sunday. Low vice, luxurious pleasure-seeking, and the relentless greed of business are glad to hear these sayings. They listen while the pulpit says: "The Sabbath was judge you in eating or drinking or keeping view an exposition of Col. 2: 16, which lulls assurance that all Sabbaths were unsubstan-Its friends could not treat it thus if they had awakened viper. faith in its sacredness.

Why do we bring forward the claims of the Sabbath? As the only day that can come with divine authority to stem the tide of lawlessness and death. If anything can revive the dying conscience of the church, it must be the plain Word of God. If there is any source of authority in religious matters it is God's Word, seconded by his Spirit. Our age needs something that comes to men's lives with the grip of truth in it; the voice of God in it, something that means controlling authority, not sin-breeding lawlessness. We do not plead for Sinai, and its tables of stone. The church ought to have outgrown the dullness into which God once had to thunder his law. We plead for the "new covenant" under which this same law, once on tables of stone, is written in men's hearts. where it is before their eyes every day, and to which the Spirit points every child of God, pleading that obedience be rendered

Do you think the world can be brought back to the seventh day? Religious men can; there is enough material out of which to build a conscience, if we give it a divine foundation on which to build. Puritanism held Sunday to be the Sabbath, honestly, conscientiously; and although the years have lessened men's faith in the theory of the transfer of the law to Sunday, many yet long for something firm and abiding on which to found Sabbath reform. #### THE SEVENTH-DAY BAPTIST QUARTERLY.

For several years, there has seemed to be a growing demand for the publication by the Tract Society of a magazine, which would be a suitable repository for sermons and valuable papers, and such denominational literature as should be preserved in a more permanent form than in ordinary weekly periodicals. Every year, these productions from the pens of ripe scholars are lost for the want of a proper place to put them.

The Tract Board, in response to this oftrepeated wish, in public and in private, and finally, in harmony with the advice of the Tract Society at the last General Conference, have taken the preliminary steps towar d publishing such a journal. A careful estimate of the cost shows that five hundred subscribers, at \$2 a year, will be the least number with which it will be safe to undertake this enterprise.

A competent editor has been engaged, who, in addition to other arduous duties, is willing to do this work gratuitously, rather than to have it fail, and thus keep the price below other similar periodicals.

A prospectus has now been before the people for nearly three months, with an earnest appeal for subscribers, and at the present time not one hundred names have been forwarded. The Tract Board are firmly resolved not to undertake the enterprise except upon a self-supporting basis. They therefore issue this appeal to the friends of the enterprise for immediate action. Names can be sent singly, by postal card, direct to the editor of the SABBATH RECORDER, or through pastors and agents. The money need not be forwarded until enough names are secured to insure its publication. Further neglect to send in the names may defeat the enterprise. Will not all who care for its success move at

All communications, whether on business or for publication, should be addressed to "The Sabbath Recorder, Alfred Centre, Allegany Co., N.Y."

WE take pleasure in calling attention to the Special Notice published by Bro. Main, in another column of this paper.

A CORRESPONDENT from Rhode Island speaks of the Quarterly Meeting at Niantic, April 20th and 21st, as a very pleasant gath-

Does God hear prayer? Yes, and answers it, too; not always according to the asking, but according to the needs of the praying soul, and that in abundant measure.

A READER of the RECORDER suggests that the last number was seriously defective in that there was "not a marriage notice in it." Such a thing shall not occur again, if we can help it.

THE Irish National Convention which met in Philadelphia last week, was a success so far as numbers were concerned. It these councilors would only keep blood and dynamite out of their plans, they would get more sympathy from those who are not Irish.

THE Editor and Publishing Agent of the SABBATH RECORDER expects, by appointment of the Board of the Tract Society, to be in attendance upon the approaching sessions of the various Associations. He will be prepared to receive subscriptions for all our publications, and will be glad to meet the Local Agents from the various societies, and any others who may have business to transact with the Publishing Office.

Some improvements are being made in the room in which the Tract Society's publications are kept, by means of which it is hoped these publications can be made more available, and more useful. We have a large ure." And it was in the fulfillment of this until late in the evening. We will go in number of tracts on hand which ought to be in circulation. Those who can afford it, ought to buy and distribute them; those who can not afford to buy, but who could distribute to a good advantage, should send and get without money and without price; and many who could not find time or have not the opportunity for distributing, but who have means, should send the money to give these tracts wings.

A CERTAIN writer on morals advises his readers to seek, for their associates and companions, those who are superior to themselves in intellectual and moral attainments. This is good in theory, though, in actual life, it is difficult to see how there could be any association or companionship, if everybody should act upon it. Christ gave better instruction than this. He came into a world of sin, infinitely below himself, not to be contaminated with the touch, but to lift up the world to himself. Let him who would attain life's highest possible good, make the Holy One his companion and friend until his own heart is the abode of righteousness; then like his Divine Master he may go to the lowly and sinful, not to suffer harm by the contact, but to be a savor of life unto life to those who are perishing.

This takes the matter out of all mere intellectual operations, and puts him who exercises faith where, feeling his need of a Saviour, he finds him in Jesus Christ, and trusts his soul's welfare implicitly to him. It hardly needs to be said, this is the fundamental principle of the Christian life.

4. To possess Christ's spirit. It is an oft quoted saying of one of the apostles, "If any man have not the spirit of Christ, he is none of his." > This letter must find a few lines for the "Old Castle of Hohenbaden." It is a picturesque ruin on the summit of a hill in the Black Forest, about three miles from Baden-Baden. It was built in the 10th or 11th century, and was the home of the Margraves of Baden, until the construction of the "New Castle" in 1479. It was ruined by the French in 1689. Judging from the present appearance it must have been well nigh impregnable in its prime. The old tower has been restored, and from it we had an entrancing view of the valley of the Rhine far beyond Strasbourg, with the beautiful valley of Baden at our feet. The "Black Forest" stretched away to the left, beyond the limit of vision. The fir trees on the hill below the ruin surround it like legions of giant warriors, tall, shapely, and invincible. The day was a perfect one. From the topmost parapet of the tower, looking into the unroofed halls below, it was easy to recall the rude, roistering life of our German ancestors, who counseled and reveled, loved and hated, feasted and wept here in the centuries now dead. Easy to drift backward along the line of history, a briefer period, and listen to the wail of a new-born infant, in a hut in the Black Forest yonder, listen until it changed to the voice of a man, which shook Germany and the world with the great truths of the Reformation. But there are other things to be seen to-day, of which these columns can not tell, so we must clamber down, stop dreaming of the past, and go on.

You would, had you been there. Everybody did. It was the thing to do. "Did we enjoy it?" Do you enjoy everything you do?

> A finely-wooded hill a mile away is called Neroberg, because of a tradition that the Emperor Nero once had a palace there. Russian chapel, rich in marble, and in golden ornaments, was erected there a few years since in memory of a Russian Duchess, who died at Wiesbaden in 1845.

Parson's German did much more here than was expected. It engaged a carriage to drive the Club "over all the town, and to all the desirable places," for a given sum, which sum was not to be paid unless the contract was fulfilled by the honest-looking coachman. There was only one trouble, and that was the conception which the Club entertained of the size of the town. That conception had to be increased about fourfold to meet the reality. The coachman had a more accurate knowledge of the situation, and he was very faithful. He drove through some principal streets, showed some very fine buildings, grounds, &c., and when we thought the work nearly done he drove straight out of town. It was a beautiful woodland drive, but that was not the thing the Club came to see; but rather, hot springs and Wiesbaden. Parson explained, in German, that the Club "wanted to see the rest of the town." When German failed, he put in a little English. Other members of the Club aided in the work. Some of them put in emphatic English. The coach man insisted that he was only carrying out his contract, while we knew he was carrying us out of town. Where to, and what for, and would he ever bring us back? had we escaped Vesuvius and the Neapolitans; the mules of Chamouny, and the caverns of the St. Gotthard Tunnel, to be carried away from the joyous scenes of this time-honored and festive town, into an unknown wilderness? For answer, the German drove on. He did not act very vicious, but he was the soul of persistency. We gave up, and sank back in enforced resignation. At last we grew composed, laughed and chatted again, and unless memory is at fault, Press, the musical man of the Club, sang some soothing strains. Finally the carriage halted on the brow of a lofty hill; the driver opened the door obsequiously, and we walked to a little platform and observatory, from which there was seen the town below, the long winding valleys, the villas and cottages, the valley of the Rhine in the distance, the mountains reaching toward the clouds on the right; all in all it was like many of life's experiences, better than our hopes, far better than our

We returned to the city by a pleasant route. We drove to the springs and drank. Again we went whither our driver would. He took everything in order. He must have been a mathematician, judging by the thoroughness with which he carried out that contract. At last the suburbs were "done." We had seen palaces, and villas, mansions of the old baronial days, and cottages that seemed pert and modern. We had been ran. Morning climbed to noon, and yet he drove on. The main beauty of the town had been seen. Now came the more prosaic, the business portion. We were beginning to enjoy the matter. The work went on as methodically as that of a book agent, or a seller of sewing machines. Up, down, across, over; past churches, warehouses, hotels, shops; broad streets, narrow streets; streets well paved, and streets which were not well paved; everywhere, everything. The after-Crossing the Rhine on an excellent pontoon | noon and the Club were both weary, when bridge, from Mainz to Castel, a few minutes at last we came back to the place where,

riage. It is twelve miles. These excellent roads make such trips a real pleasure. The road runs up the right bank of the Rhine for a few miles, through numerous compactly built villages, where solidity rather than beauty is the prevailing feature. The main street through some of these is so narrow that one could almost reach the windows of the houses with a walking stick, in some places. The the benefit of those who desire to make the tant one. You can easily test the quality of Royal palace of Stolzenfels, spoken of in the last letter, is in full view on the opposite shore of the Rhine, when we reach the River Lahn where it unites with the Rhine. Just here is the narrowest part of the Rhine, the mouth of the gorge. The spot was chosen by Arnold Von Isenberg, Archbishop of Treves, in 1250 A. D., and the castle then built was the residence of the Archbishops of that district for four hundred years. The restoration of the old castle during the the present century has cost £53,000. Turning to the left the road ascends the valley of the Lahn. On a rocky hill across this river stands the halfrestored castle of Lahneck, once the residence of the Electors of Mainz, now the private property of an Irish gentleman. The Lahn is not large, but the scenery is extremely picturesque. Several iron foundries are passed, the waters of the river are utilized for mechanical purposes, at different points. Horses and men force rude freight boats against the current, up the stream, while the return trip is made with no effort except the work of the pilot, who humors the laden vessels into accord with the swift waters. It was a busy scene and a delightful ride; albeit, German villages have some characteristics which offend esthetics. Parlors for the people, and parlors for the cows and other domes tic animals, are often in too great proximity.

"What about Ems?" It is a Prussian town. In former times, when the German States were independent, "the dominions of eight different independent princes" could be seen from the bridge across the Lahn, at Ems. A kingdom then was about equal to a good wheat farm, or a sheep ranch, in the Wester part of the United States now. Ems was also known to the Romans. It consists mainly of a single street along the right bank of the Lahn, filling the narrow space between the river and the mountain. Some fine buildings have been lately erceted upon the left bank. It has about 5,000 inhabitants. Quite a portion of the town is old and unsight ly. The water from the springs is lower in temperature than at Weisbaden, being 75° to 117° Fahr. Soda, salt, and hot water will enable you to manufacture it at home. The selling of curiosities and ornaments is the prominent item of business. The place claims 15,000 visitors annually. Gambling has been much lessened or wholly suppressed at the principal German watering places, within a few years. Whatever curative properties the waters may have, there is little doubt that rest, recreation, and freedom from care, are the principal agencies through which restoration to health is brought about. The recipes which are scattered through this letter will enable the reader to enjoy the gustatory pleasures of these noted springs without leaving home. PARSON.

#### IN MEMORIAM.

It has become my painful duty to record the sudden and unexpected death of our beloved classmate and associate, Mrs. Hannah R. Johnson, at her home in Nile, Allegany Co., N. Y., on March 25, 1883, at the age of 61 years, 6 months, and 3 days. She was the eldest daughter of Samuel and Hannah Potter Lanphear, and was born in the town of Alfred, September 22, 1821. She. was blessed with religious and educational advantages above many of her age, which through parks large, and parks small, parks | was as "seed sown in good ground," for at natural, and parks artificial; past fountains the age of ten years she was converted to that gushed from the heart of the hills, and | Christ and united with the First Alfred fountains that gushed when the machinery | Church, and subsequently became a successful teacher both in day and Sabbath-school, beloved by her pupils. When but twelve years of age she had the charge of her brother's house.

On Feb. 22, 1844, she was married to Ezekiel W. Johnson, and moved to Nile, at which place she has resided until called to her heavenly home.

Her interest in the cause of Christ was an absorbing one, and her anxiety for the salvation of souls, led her, shortly after her marriage, to induce a number of children to come to her house each Sabbath through the Summer to study the Word of God, and very term Christians to all who believe in Christ. but we think the average reader will be bet- of a Roman fortress were uncovered in 1848, have had in former years, nor into what mis- one of its constituent members. #### WHOLESALE PRODUCE MARKET.

Review of the New York market for butter, cheese, etc., for the week ending April 28th reported for the Recorder, by David W. Lewis & Co., Pro-duce Commission Merchants, No. 85 and 87 Broad Street, New York. Marking plates furnished BUTTER.—Receipts for the week were 26,328 pack-

ages; exports, 366. The market for old butter is about done. It has been a cold Winter and a cold, backward Spring, and still old long held butter either. Western or State has had a hard market. Imitation butters have contributed immensely to the supply and kept all butter not showing freshness and bouquet flavor down to their level of price; and for Summer make and ordinary dairy butter there have been broken and irregular markets, and uncertain values all through. Fresh creamery butter has all the time ruled firm and sold readily. It started off at 25 @ 28c., went down on the full flush of feed in the last days of May and first of June to 22 @ 25c., held stiff through June and went into July at 23 @ 26c., run up to a plump 30c. by the 20th of August. and gradually hardened through September, closing at 31 @ 33c. sharp, and opening into October at 32 @ 35c., middle 33 @ 36c., and closing out in the last week at 33 @ 38c. This was the steady top until Winter scarcity sent the corn fed Elgin creameries up to 38 @ 42c. in December, when prices and demand hung fire. #### A BIT OF POTTERY.

The potter stood at his daily work, One patient foot on the ground; The other, with never slackening speed, Turning his swift wheel round. Silent we stood beside him there, Watching the restless knee, Till my friend said low, in pitying voice, 'How tired his foot must be! The potter never paused in his work, Shaping the wrondrous thing; 'Twas only a common flower-pot, But perfect in fashioning. Slowly he raised his patient eyes, With homely truth inspired: "No, marm; it isn't the foot that kicks, The one that stands gets tired.'

But his appetite for whisky was stronger than his sense of honor or decency, and hi wife was weak, and one afternoon he came home unusually crazed with liquor, and be gan his usual treatment. He had knocked his wife to the floor where she lay helpless under his blows, when the door suddenly opened, and half a dozen stout, strong armed women entered. Seizing the drunken fellow, they marched with him to the shore, where a boat lay waiting, into which they all betook themselves with their captive, who was indeed unable to resist. They rowed out into deep water, and then lifting him suddenly over the edge of the boat, they plunged him in the water, and held him there while they propounded to him some questions.

Said they, "Sandy McNeil, you are perfectly helpless and in our power, and you must promise us some things, or we'll drown you just as sure as you're a living man." "I'll promise, I'll promise," he gasped,

thoroughly sobered by his cold bath. "Do you promise not to drink another drop of whisky, or anything to make you drunk, as long as you live?

"Yes, I promise, if you will let me go." "Do you promise never to abuse your wife or children again, and always treat them kindly, and to go to work, and take care of them like a man?"

"Yes; I will, I will," he protested.

"There, Sandy," they said, drawing him up, "we will let you go this time, but remember, if ever you break your word, and we hear of your getting drunk, and abusing your family, the same women who have done this can do it again, and it won't go so easy with you another time."

The cold-water treatment proved effectual and with the help of these same determined women, who followed up their vigilant measures with timely aid and advice, the man was cured of his drunkenness, and his family made more comfortable and pros-

A SECRET--Now let me tell you a secret -a secret worth knowing. This looking for enjoyment does not pay. From what I know of it, I would as soon chase butterflies for a living, or bottle moonshine for cloudy nights. The only true way to be happy is to take the drops of happiness as God gives them every day of our lives. The boy must learn to be happy while he is plodding over and as fast as one was done it was lifted up fields. If we lose this out of our lives, we and oft-quoted words were, "All is dark and making his fortune. ## Popular Science.

In a recent scientific lecture, Prof. O. A. Young, the learned astronomer of Princeton College, used the following language: "Do not understand me at all as saying that there is no mystery about the planets' motions. There is just the one single mystery—gravitation—and it is a very profound one. How is it that an atom, no matter how great the distance, no 'matter what intervening substance there may be; how it will act upon it, or at least behave us if it acted upon it, I do not know, I can not tell. It is inscrutable. All the explanations that have been given of it seem to me merely to darken counsel with words and no understanding. They do not remove the difficulty at all. If I were to say what I really believe, it would be that the motion of the spheres of the material universe stand in some such relation to Him in whom all things exist, the ever-present and omnipotent God, as the motions of my body do to my will-I do not know how, and never expect to know."—Christian Statesman.

PHYSICAL VALUE OF SINGING .- Singing is one of the healthiest exercises in which men, women, and children can engage. The Medical Wochenschrift of St. Petersburg has an article based upon exhaustive researches made by Prof. Monassein during the Autumn of 1878, when he examined 222 singers ranging between the ages of nine and fifty-three. He laid chief weight upon the growth and absolute circumference of the chest, upon the comparative relation of the latter to the tallness of the subject, and upon the pneumatometric and spirometric condition of the singer. It appears to be an ascertained fact from Dr. Monassein's experiments that the relative, and even the absolute circumference of the chest is greater among singers than among those who do not four page tract, by Horace Waters published by sing, and that it increases with the growth and age of the singer. The Professor even says that singing may be placed physically as the antithesis of drinking spiritons liquors:

Cotton is the only fiber which has hitherto been spun in the ultimate or normal fiber, as it is presented to us by nature. In all other spinning the filaments used are compound, the ultimate fibers being held together in a sort of sheaf by agglutinating matter. After spinning, this agglutinating matter is removed by bleaching. Eckman has now patented a process by which isolated fiber can be produced directly from the straw, and | ber dealer to furnish Hemlock Lumber at my Shop it is said that even hemp under this process at the may come to be a rival with cotton in its various fields of usefulness. The influence of this discovery in the production of paper promises to be very remarkable. Hitherto wood only with great difficulty. By the Eckman process it can be obtained practically pure at a single operation. It consists in subjecting fibrous plants to boiling, under pressure, in water containing so much sulphurous acid, more or less in combination with an alkali or base, as shall be necessary to prevent the oxidation of the organic mat-

PROF. GEORGE F. BARKER, the eminent physicist, of Philadelphia, asserts that the phrase "storage of electricity" is not strictly correct, and that the proper statement of the scientific fact would be "the storage of energy by means of electricity." It is true, that the charging of a Leyden jar is in a certain sense the storing of electricity; but what is usually called the storage of electricity is the collection or accumulation of energy by means of electricity. Professor Barker says that the loss of energy in such work is similar to that in the case of a steam engine, which, as is well known, does not produce one-half of the work which it should. considering the amount of fuel used. When energy can be used without the enormous losses now unavoidable there will be an immense saving of power and fuel, and he who discovers how to use but seventy-five per cent. of the energy stored in fuel, electric batteries, common gas, and ordinary engines, will not only become rich himself, but will add hundreds of millions of dollars to the wealth of the civilized world.

INTERESTING TO DYSPEPTICS.—A gentleman who is in business in this city cured himself of a chronic and ugly form of dyspepsia in a very simple way. He was given up to die; but he finally abandoned alike the doctors and the drugs, and resorted to a method of treatment which most doctors, and most persons, would laugh at as an "ugly woman's remedy." It was simply complete instructions how to obtain Patents, and the swallowing of a teacupful of hot water other valuable matter. During the past five years, the swallowing of a teacupful of hot water before breakfast every morning. He took the water from the cook's teakettle, and so hot that he could only take it by the\_spoonful. For about three weeks this morning dose was repeated; the dyspepsia decreasing all the while. At the end of that time he could eat, he says, any breakfast or dinner FREE! CARDS AND CHROMOS. that any well person could eat-had gained in weight, and has ever since been hearty and well. His weight is now between thirty and forty pounds greater than it was during his dyspepsia sufferings; and for several years he has had no trouble with his stomach.

This is in many respects the most able argument yet published. The author was educated in the observance of Sunday, and was for several years a highly esteemed minister in the Baptist denomination. The book is a careful review of the arguments in favor of Sunday, and especially of the work of James Gilfillan, of Scotland, which has been widely circulated among the clergymen of America. Mr. Brown has thoroughly sifted the popular notions relative to Sunday, with great candor, kindness and ability. We especially commend it to those who, like Mr. Brown, have been taught to revere Sunday as the

ersecution that arose about stephen, traveled as far as Phenecia, and Cyprus, and Antioch, preaching the word to none but unto the Jews men of Cyprus and Cyrene, which when they were come to Antioch, spake unto the

Grecians, preaching the Lord Jesus. 21. And the hand of the Lord was with them: and a great number believed, and turned unto the Lord. 22. Then tunings of these things came unto the ears of the church which was in Jerusalem: and they sent forth Barnabas, that he should go

as far as Antioch. 23. Who, when he came, and had seen the grace of God, was glad, and exhorted them all, that with purpose of heart they would cleave unto the Lord.

24. For he was a good man, and full of the Holy Ghost and of faith: and much people was added unto the Lord. 25. Then departed Barnabas to Tarsus, for to seek

Saul:

26. And when he had found him, he brought him unto Antioch. And it came to pass, that a whole year they assembled themselves with the church and taught much the church, and taught much people. And the disciples were called Christians first in 27. And in these days came

prophets from Jerusalem un 28. And there stood up one of them named Agabus, and signified by the Spirit, that there should be great dearth throughout all the world: which came to pass in the days of Claudius Cesar. 29. Then the disciples, eve-

ry man according to his ability, determined to send relief unto the brethren which 30. Which also they did, and sent it to the elders by the hands of Barnabas and Saul.

OUTLINE. THE SPREAD OF THE GOSPEL :

I. By singular providence. v. 19, 20. II. In surprising degree. v. 21, 24. III. By apostolic sanction and oversight. v. 22

IV. With good results. v. 29, 30. V. In intimate relation to Christ.

#### QUESTIONS.

Why did the disciples preach only to Jews? What special' fitness in sending Barnabas on this mission? Why did Barnabas seek Saul? What made Antioch important as a new center? What was the probable origin of the name Christian? What was the gift of Jerusalem to Antioch? Of Antioch to Jerusalem? What suggestion to us in the early preaching of the gospel in the world's great centers?

#### SEEDS AND GERMS.

1. "He who has consolation gives it; and he who gives consolation has it." (v. 22, 23.) 2. The secret of the only true "higher life." (v. 23.) 3. By divine power both persecution and famine are overruled for good. 4. "A living church will be a growing church." 5. The gospel an aggressive, progressive, and conquering religion. 6. The true believer always takes his religion with him. 7. The blood of Stephen, the martyr, was the seed of the churches of Syria. 8. Christian means (1) one who knows Christ; (2) one who trusts Christ for salvation; (3) one who resembles Christ in character; (4) one who obeys Christ in life.

#### NOTES.

V. 19. Scattered abroad. Those who were scattered abroad did not cease their service or preaching. So we should do to day. If the scattered Sabbath keepers did not cease preaching the Word, the result would be far different. Upon the persecution, etc. The very efforts to destroy the gospel spread it still more. So usually with efforts against true religion. Traveled as far as Phenice. Phænicia, a strip of coast about 20 miles wide and 120 long, lying between the crest of Lebanon and the sea, once holding very important commercial relations with the whole civilized world. Cyprus. A large island in the Mediterranean, about 60 miles from the coast of Palestine, a rich island, and very interesting to both classical and Biblical students. Antioch. The capital of Syria, 300 miles north of Jerusalem, containing over 500, 900 inhabitants, far advanced in culture and refinement, and also in luxury and vice. Preaching the word. The missionaries are not named. They kept back their own names, and put forward by a rapid and powerful progress. v. 21.

themselves on earth; but they have as their record on | the outside world, and impressed itself upon the high—a great multitude, brought by their ministry, to the Saviour .- W. Arnot. Unto the Jews only. In accordance with the earlier ideas in regard to the scope of the church, Christ came to the Jews only, they at first thought

V. 20. And some of them. Grecian Jews, i. e., Greeks who had accepted Judaism. Unto the Greeks also. A beginning of the conversion of the Gentiles. V. 21. The hand of the Lord, i. e., the

power of God. Turned to the Lord, i. e., turned from their heathen faith and practices, and accepted the new faith and Christ as their Lord; accepted the gospel of Christ.

V. 22. Tidings of these things came. is preaching the Lord Jesus. There was some message, perhaps, sent to the apostles. The Jewish Christians were no doubt perplexed by the conversion of Gentiles. They sent forth. To look after an irregularity, perhaps in receiving Gentiles as Christian converts.

V. 23. Had seen the grace of God. in the gospel: 1. Goodness. 2. Full of the Holy The force of the original can hardly be given in an English version. It is not merely the grace of God, but the grace which [evidently] was that of God, | which he recognized as that of God.—Alford. Was glad. Evidently contrary to what might have to his ability. -Peloubet. been expected, for he may have expected an irregupurpose of heart. The Greek word rendered quoted. purpose means literally setting forth, and is used to designate the shew bread (Matt. 12: 4; Mark 2: 26; Luke 6: 4), which was set before, and consecrated to, the Lord. Here the purpose of the heart is a heart similarly set before God by being wholly consecrated to his service.—L. Abbott. Cleave unto the Lord. By cleaving unto Jesus is meant hold ing fast to his religion. Closeness to Christ has been illustrated by the electro-magnet. When the current passes from the battery through the wire, the magnet acts powerfully, holding immense weights. As soon as the current ceases, and a slight separation of the wires will cause the current to cease, the magnet is so much lifeless and powerless metal. So, close union with Christ sends the current of his love through our hearts, and makes them powerful to

V. 24. For he was a good man. Hencehe cared more for the success of God's cause than for that of Judaistic Christianity; he nourished no ecclesiastical pride, a good plan for all Christians in these days. Full of the Holy Ghost. Spiritually gifted, as all Christians may be and ought to

called Christians first in V. 25. To seek Saul, showing the assurance Antioch. Now in these days there that Saul would approve of the work at Antioch, came down prophets from and that he was a proper person to organize and Jerusalem unto Antioch. And there stood up one of direct it. "So when a miner in the gold fields has them named Agabus, and fallen upon a piece so large that he is unable singlesignified by the Spirit that there should be a great famine over all the world: handed to remove it, he leaves it where it lies. . . and goes away in search of a friend who may help him bear the treasure home."-W. Arnot. the disciples, every man according to his ability,

V. 26 Taught much people. As new conunto the brethren that dwelt in Judæa: which also they did sending it to verls, in vast numbers, came in from the ranks of the Gentiles, the church began to lose its ancient appearance of a Jewish sect, and to stand out in relief as a great self-existent community in the face both of Jews and Gentiles.—Conybeare & Howson. Were called Christians first in Antioch. This appellation was not assumed by the Christians themselves. They rather called themselves "disciples," "believers" (in reference to their relation to the Lord). "saints" (with respect to their character and the great problem of their lives), "brethren" (referring to their mutual fellowship). Still less was it given them by the Jews who would have been far from applying to the hated heritics the hallowed name of Christ, Messiah, and who contemptuously called them rather "Galileans," "Nazarenes." The name came from the heathen, who applied it to the followers of Jesus Christ, either in mockery, or from a mere misunderstanding, taking the term Christ for a proper name instead of an official title. - Schaff. It is used but three times in the New Testament; here, Acts 26: 28 and 1 Pet. 4: 16.

V. 27. Came down prophets. In both the Old and New Testaments, the prominent idea in prophecy and prophesying is not prediction, but inspiration; not telling before what is to happen, but delivering messages of warning, instruction, comfort, helpfulness, such as are commissioned by, or given under, the inspiration of the divine Spirit.-L. Ab-

V. 28. Agabus. Agabus at this time must have been comparatively a young man, as twenty years afterwards he is mentioned as coming from Jerusalem on purpose to warn Paul not to approach that city Acts 20: 10. -P. J. Gloag. Great dearth [famine] throughout all the world. All the world is used here as elsewhere to denote the Roman Empire. In the days of Claudius Caesar. The reign of Caligula lasted from A. D. 37 to 41; that of Claudius from A. D. 41 to 54. The whole reign of SEND FOR CIRCULAR SHOWING GUARANthe latter emperor was memorable for frequent famines. Josephus (Ant. 20: 5) speaks of one as especially affecting Judea and Syria, under the procuratorship of Cuspius Fadus, A. D. 45. The population of Jerusalem were reduced to great distress, and were chiefly relieved by the bounty of Helena, Queen of Adiabene, who sent in large supplies of corn, figs, and other articles of food.—Plumptre.

V. 29. The disciples, every man according to his ability. We have here one of the rules divinely prescribed, for the management of charities. Among the disciples (1) every man gave; and (2) every man gave as the result of a deliberate determination, a spontaneous act of his own will; and (3) every man gave according to his ability.-

V. 30. Sent it to the elders. The very incidental way in which they are introduced indicates (1) that Luke did not consider the history of the Church organization intrinsically important; and (2) that the form of Church polity arose spontaneously, created and shaped by immediate convenience and expediency - Whedon.
