TO TAMPA.

From Sanford to Tampa is about one hundred and twenty miles over a ridge of land wnich forms a "divide." South of it all rivers run southward into Lake Okeechobee or the Gulf. North of it the rivers run northward, and empty with the St. Johns into the Atlantic, or with the Withlacoochee into the Gulf of Mexico. The land is the best we have seen in Florida, unless it be in some of the northern counties. It is full of little lakes, with a few big lakes thrown in, like those bearing the original and aboriginal names of Ahapopka and Tohopekaliga. Many of the smaller lakes are named for modern celebraties like Butler, Hancock and Pierce, and some have romantic names like Ariana, Marina, and Rosalie; but for good substantial names, which are distinctives, commend us to the Indians. When they named these lakes, they put music in them like the music of rippling waters. Witness Lake Weshayakapa, or Okliakonkonhee, or Kissimmee. We took dinner at a town of this latter name, which is a favorite resort for tourists. The view from the hotel is very fine, overlooking the lake. But this lake is not Kissimmee, it is Tohopekaliga, and Kissimmee is mented lover, paddling in a bark canoe over its lonely waters, and calling in plaintive accents to the ever-heedless spirit of the lost one, "Kiss me!" or "Kiss Simmie!" as the case may be, while the gentle zephyr strains to fill the bill, as it were, by proxy; fill up the accessories, and you have a first-class Indian legend. The absent look of LaSeniorita indicated that something of the kind was passing through her back to the present by the remarks of the Scribe that the name in the Seminole tongue means simply "low water."

The Florida or Spanish moss is also abundant here, as everywhere south of the Carolinas. One would not imagine that this long, gray, trailing plant held any relation to the flaming epyphite or to the luscious pine-apple, but it is a sort of cousin, as they all belong to the same natural order. This moss is, however, not wholly ornamental, for vast quantities of it are gathered, and steeped in water or buried in the earth, until the outer surface is rotted off, when a dark wirey fibre is left, not unlike coarse horse-hair. This is extensively employed in place of the more costly hair for mattresses and in upholstering the cheaper class of furniture.

"Hello! there is another lake!" was the somewhat remarkable remark of Don. considering that there had been but few moments when some lake had not been in sight, and sometimes three or four at once. This time it was Lake Alfred, which was to be seen a little to the north. And it was quite remarkable after all, for its surface was covered with "white caps," indicating that it was swept by a smart breeze, while at a few rods away the hanging moss was scarcely swayed by the wind. It looked as if a breeze here was only a "local issue," like the tariff in 1880. That most beautiful of the water nymphs, nymphea, or the pond lily, grows here to perfection and in profusion. The flowers are frequently fifteen inches in circumference, and as deliciously fragrant as the smaller ones we used to gather when boys, at the risk of pneumonia add. ed to parental discipline. But it is a mistake to suppose they are cheap because they are plenty. I remember paying a dime for a single blossom, on the upper St. John, "once on a time."

THE DOCTRINES OF WICKLIFFE.

That which was the prime moving cause of the Reformer's advanced sentiments was apparently a very trivial circumstance. Somewhere, somehow he found a Bible, but whose and how we are not informed. It seems strange to us that it should be such an | God's altar there was offered in one year, exceptional circumstance for a religious 3 pounds, 2 shillings and 6 pence; at the Virteacher to have a Bible. A man who makes such a mark in the world as this or any other reformer, must be one who has "the independence of his held a different opinion from the rest; and own convictions." He must know where the when we remember the cruel persecutions mark is at which he aims, and go straight for it. That such was the character of Wickliffe is manifest from the estimate even of his enemies. "As a theologian, the most emiports of a great "cyclone" which had visited | nent of his time; in philosophy, second to the place the evening previous, blowing none; as a school-man, incomparable." "No man excelled him in the strength and numple; of course everyone was interested, but | ber of his arguments; and he excelled all men especially those who had families or friends in the irresistible power of his eloquence." Walden, ansinveterate enemy, confessed that "he had often stood amazed beyond measure at the excellence of his learning, the boldness of his assertions, the exactness of his authorities, and the strength of his arguments. Such a man may well be dreaded by his enemies, but hailed with joy as a champion of the rights of the poor and oppressed. If the religious convictions of such a man are pure and noble, and above those of his time, he must be a great power for good in the land.

It was the fashion of the times for the distant lake in its first and last sylables, with oughly wet down the hotel after the roof Reverend Doctors to indulge in the most a considerable dwell on the first; but the was removed. Saint worship was an important doctrine

of the Catholic Church at this time. One circumstance will serve to illustrate this thought. Thomas a Becket had been canonized by the Romish, church as a martyr, and reigned for centuries as the chief English saint. His shrine was enriched with offerings of astonishing magnificence and value, and every fifty years a jubilee, in his honor, drew together an Insurmountable number of pilgrims. At the fifth jubilee, in 1420, the concourse is said to have amounted to 100,000 people. "The devotion towards him had quite effaced in that place the adoration of the Deity; nay, even that of the Virgin. At 6 shillings and 3 pence." > Freedom of religious opinion was taught by him. When we call to mind the inquisition, the vigilance with which the church sought out heretics, who were those who even to the present day vestiges of it remain man in those times had the understanding and boldness to express a different view. He says, "Christ wished his law to be observed willingly, freely, that in such obedience men might find happiness. Hence he appointed no civil punishment to be inflicted upon transgressors of his commandments, but left them to a punishment more severe, that would come after the day of judgment." "If there be any truth it is in the Scripture, and there is no truth to be found in the schools that may not be found in more excellence in the Bible." Human tradition he set aside as of no account in matters of religion. So bold was he in promulgating his views

that his friends were alarmed for his sake. They wished him to bear in mind that he was exposing himself to the wrath of the satraps of the church, at a time when his appeals to the Scriptures would be of no avail, for they were not regarded as having any authority. He replied, "Without doubt what you say

is true. The chief cause of the existing state of things is our want of faith in the Holy Scriptures. We do not sincerely believe in the Lord Jesus Christ, or we should abide by the authority of his word, especially of the evangelists, as of infinitely greater weight than any other." He urges the importance of studying the Bible in its entirety and followity, including doctors, and councils, and in becoming reverence. The papal bulls will be superceded, as they ought to be." These were the doctrines he taught while

he was in Oxford. He taught because he believed. His thoughts entered into his inmost soul. It was his to do and dare. He tried to educate his pupils to sacrifice for truth, if it should become necessary. He how of their chosen profession. A TRIBUTE To the Memory of Mrs. Mary Maxson Wells.

We, as a society, offer a loving tribute to the memory of one of our most devoted and dearly-loved members; one whose ready help and sure encouragement in all good work make her loss widely felt in our city.

We have many times since our organization been called upon to part with earnest workers, and though we never cease to miss them and never feel their places are filled, we would recognize an ever-loving and everruling power directing all. We remember that God allows his children these struggles for Joseph, there was the pit; for Daniel, the lions; for David, exile; Paul, ship-wreck; Christ, the cross; while we ever find comfort

The life, so lately taken from us, was in every relation pre-eminently useful, earnest, and faithful. The center of a loving home,

Her life in the church was marked by faithful attendance of every service, helpful words, showing an unfaltering faith in God's ways; while in the Sabbath-school she was a devoted and faithful teacher. The hearts she there influenced will be ever grateful for her example of quiet, true living. No one had a deeper interest than

had she in this society or more earnestly desired the strengthening and growth of our Sabbath cause. Though the example has gone from us, we know that the influence of a noble life must ever live. We shall recall, which resulted from this tendency, and that always with fondest memories, the warm heart, cheerful face, and cordial greeting in our laws and customs, we wonder that a which assured one of her love and interest, while we would emulate the faithfulness. the prompt and unquestioning doing of what she could, the ready sympathy and rare charity which endeared her to all, and crowned a life of noble purposes. From her own best loved poet we quote:

Another hand is beckoning us, Another call is given; And glows once more, with angel steps, The path which reaches heaven.

The blessing of her quiet life Fell on us like the dew: And good thoughts where her footsteps pressed Like fairy blossoms grew. Sweet promptings unto kindest deeds

Were in her very look; We read her face as one who reads A true and holy book. Alone unto our Father's will

One thought hath reconciled, That he whose love exceedeth ours Hath taken home his child. Still let her mild rebuking stand Between us and the wrong,

And her dear memory serve to make Our faith in goodness strong. Angel of Patience! sent to calm Our feverish brow with cooling palm, To lay the storms of hope and fear, And reconcile life's smile and tear. The throbs of wounded hearts to still, And make our own our Father's will!

O thou who mournest on thy way, With longings for the close of day; He walks with thee, the angel kind And gently whispers, "Be resigned: Bear up, bear on, the erd shall tell The dear Lord "ordereth all things well." ANNA TITSWORTH, | Com.

THERE is an ever increasing demand for preachers who can do efficient church work -preachers who can organize all the fores; of the church for active, aggressive servrice who will preach about missions; who will raise money for any and every good work; who will take an interest in every real interest of the church. Few young men in our colleges preparing for the work of the ministry should be taught the what and the rented by to do and how.—Ex.

AID TO CHURCHES.

We call the special attention of all churches desiring assistance from the Missionary of women, in the line of contributions, the Board to some of the Rules and By-Laws printed below. Inasmuch as there has been frequent and continued disregard of the requests and rules of the Board, it need not be thought strange if the Board, out of respect for themselves, shall come to feel obliged to delay the granting of appropriations asked, until a few plain and reasonable rules are fairly well complied with. It is scarcely extressed, by naming him Grand Officer of the aggeration to say that we have received many requests for aid about as brief and as empty is said to be an honor of high grade; but in respect to information for the guidance of would respectfully request the Missionary Board to assist them in the support of pastor, to the amount of \$100 a year." But with how much more intelligence, interest and heartiness the Board could grant the request, if these facts were also known to them.

Here we are blamed for giving help; there for not granting it. A knowledge of the facts that bear upon the questions to be considered will greatly aid us in correctly reaching conclusions.

III. AID TO CHURCHES.

1. Churches should use every exertion, either alone or by union with one or more neighboring churches, to support themselves, before asking for aid; and every church should steadily aim to become self-supporting as soon as possible.

2. When desiring aid they should make a full statement of the facts in their condition, prospects for growth and permanency, and needs which justify an application for help. 3. The following particulars are also to be given: Name and address of the church; preaching stations, if any; number of resident church members; average of congregaroads runfin all directions . . . tions for the Society. 5. With the foregoing facts and particulars before them, the Board will make such appropriations as, in their judgment, the field may require, and the state of the treasury will justify, for a period of time not exceed ing one year.

6. Applications for renewal of aid should be made before the expiration of existing appropriations, and be accompanied with a statement of the officers or minister as to whether the church has fulfilled the above Franke, America was evangelized; by the conditions and its own pledges.

AMERICAN HOME MISSIONARY SOCIETY.

There were 1.571 ministers in the service of this society last year, 392 being new ap pointments. These labored in 41 states and territories. Including 54 counted twice, because working in more than one state, they were distributed as follows: New England, 383; Middle States, 101; Southern, 41; Southwestern, 112; Pacific Coast, 127; Western States and Territories, 861. Of the whole number, 748 have been pastors or stated supplies of single congregations; 554 have ministered to two or three congregations each; and 269 have extended their labors over still wider fields. In the aggregate 1,117 years of abor were performed. Number of places fully or statedly supplied, 3,063. There have been 5 congregations of colored people; 29 Welsh congregations; 40 German; 38 Scandinavian; 14 Bohemian; 1 Armenian; 1 Spanish; 2 Chinese; 1 Indian; 7 French; and 3 Mexican. About 130,000 Bible-school scholars, the organization of 323 new schools, and the care of 2,188, are reported; 806 missionaries report benevolent contributions report 8,056 converts, some reporting as many as 90. Additions to churches, as nearly as ascertained, 6,469 on confession of faith, and 3,562 by letters. 135 churches have been organized, and 63 have assumed self-support. One hundred and twelve houses of worship have been completed; 170 materially many others commenced; 16 chapels built; beyond. and 39 parsonages provided. Seventy-six young men connected with missionary churches are reported as preparing for the ministry. Receipts during the year, \$4,829,-979 60, making, with other funds, resources of \$510,144 68. Expenditures, \$507,988 79, and unpaid appropriations over \$60.000.

There was an unusual decrease of legacies. but a great increase in the gifts of the living; and, in results, the year was one of encouraging progress.

The Annual Report makes grateful mention of the organized and unorganized work raising of funds, "missionary boxes" (valued over \$70,000), with circulation of misssionary publications.

NEW MARKET, N. J., Aug. 6, 1887.

Dear Brother,—I enclose to you an item read at our regular monthly missionary prayer-meeting by Bro. Carman, who is one of the converts from the Jews, and we think him a worthy man. He is working for Bro Geo. Larkin, and takes quite an interest in the work of the church, is very studious and tries to improve himself. I thought it quite good, and asked him to let me have it, and for his encouragement I send it to you to be published in our paper under the Missionary

Very respectfully yours in Christian love H. V. DUNHAM.

An Item about Mission Work.

Mission work begins with the incarnation of the Son of God, of Jesus the Messiah of the world. He was "sent" down from heaven to save the sinners of this world; this was the center of all missions. Before Christ all the prophets were missionaries, but missionaries that pointed to the Center. The Center appeared on earth, and went back to the Father in heaven, and since then, all the missionaries who go, go as rays coming forth from the Center.

The best mission work was done by the apostles and their successors; but from the beginning of the fourth century no mission work in the sense of the command of our Lord was performed. Of course the church grew in numbers, but this was the result of compulsion, of acts of enforcement by sword and fire, and so forth. This is not the will of our Lord. Our Lord says, "Go ye and preach, whosoever believes and is baptized will have the everlasting life, and he that equal to any other state in moral character, tor or supply, whether he has any other social culture, civil government and religion. The command to invite people by swords the first scattered in a radius of calling, and whether he is to be pasterned as to be pa

a parsonage; amount of salary proposed; and auto da fes. When the church broke ments, it gave up the right mission work. During 1,200 years was the church without a right mission work. But the Lord had mercy upon the world. He raised up a Luther, a Calvin, a Zwingly, and others. Christianity became reformed, and with the reform the mission work revived again. The greater Christianity develops, the greater is its zeal in missionary work. The Germans were the first to be engaged in mission work; after them came the English people. By Ziegenlaub and other disciples of Spener and Moravian brethren the heathen countries beyond Scandinavia; by the English other

> On the present time the mission work is just in the development. America plays now a great role. It sends missionaries everywhere. The results are a harvest of millions of souls. All the idols of the heathens begin to fall down before the name of our blessed, crucified and risen Saviour. Japan and China and the isles of the seas ll become more and more the subject of pity, and the trumpet call of the gospel is being heard in their places. But the day of glory has not dawned yet.

There is yet a great work to be done. Eight hundred millions of heathen sit yet in deep darkness; the Sun of righteousness—the Son of God-has not yet blessed them with its blessed life giving rays. Besides this, we have the promise that Israel must be saved at first; then when Israel have come in, the morn dawns, and in its blessed clouds will appear the glory of him who comes to meet his saints, and all mankind will behold him, and they also that pierced him. Then he alone will reign in Zion, the beautiful city of God, and all his people that kept the amounting to \$36,309 29; 670 missionaries commandments of God and the faith of Jesus, will be around him who sits on the throne, and a new song will be then: "Hallelujah, praise be to the Lord." May the Lord help us and endue us with power and strength from on high, that we may be true agents of his kingdom, and that by our zealous endeavors Zion may be built up, and we repaired or improved; the building of take the crown that is preserved for us in life

From Mrs. J. S. Williams.

TANEY, Idaho, August 9, 1887.

Dear Brother,—I thought to write as soon as our society was fairly organized, but we are so busy most of the time that letter writing is put off. The ladies met the first Sunday in May, and organized as the "Taney Ladies' Missionary Society." We meet the first and third Wednesdays of each month the Pacific coast. Many of the converts for work and business. Usually we have some | have returned to China, carrying the light Bible subject to discuss while we work, or some one reads. The first Sabbath evening of each month we have a session at the school-house. At first we took up Africa and its missions. A map and descriptive essay were presented, also items and recitations, songs and general remarks. At the third, we had India under consideration, following the same plan. At our last, Persia | the Chinese. We trust that in all our borwas well described, and its mission work ders not one of these strangers will be overtalked of. I think the interest is growing. We had a full house at the last session. Our young people and children work with a will, avail to bring the Chinaman under a Chrisand for the chance they have had for cultian influence. Those who have prosecuted ture and elocutionary drill, do extremely this work in patience, with faith and prayer, well, better than the average. We will take up Japan at our next session, and in October will have China and its missions; working up our own mission. Now if it is not too much trouble will you write me explaining those papers or letters that were sent printed in Chinese. I have not attended Conference or Association to get an explanation, and I can't present them till I know what they mean. We are very well, all of us, and working hard to get our home in shape for winter. Very glad to hear of your improving health. Yours truly,

SEVENTH-DAY BAPTIST LITERATURE.

The following from The Worker (Baptist), suggests the right and opportunity of Seventy-day Baptists to publish and spread their literature, too.

A colporteur writes as follows: "The value of Baptist literature has been singularly manifested in the awakening of an entire community on the subject of New Testament Baptism. While Baptists have experienced no difficulty in every man a Scriptural reason for their faith and practice, Pedounwarranted practice of sprinkling and pour-

churches have demanded immersion at the hands of their pastors, who have publicly declared Baptists in error, but have not been able to convince the people of the truth of their statements.

"The pastor of the Baptist Church says that one bundle of denominational tracts is worth more than a dozen of large volumes. in placing the truth before the people con. cerning New Testament Baptism; for the people will read the tracts."

THE CHINESE IN THE UNITED STATES.

A few years ago the Chinese in the Unit. ed States numbered over a hundred thou. sand. Unfriendly legislation and frequent persecution have diminished the number. until now they are estimated to be not more than eighty thousand. In the early years of their residence among us, they were only found on the Pacific Slope; but as the per. secution in that region increased, and the opportunities for business diminished, these people came in increasing numbers to the Eastern States. There is now no city of im. portance in the whole land in which the Chinese immigrants are not found. They are truly the Dispersion—the strangers scatter. ed abroad. Levi was scattered among the other tribes that he might teach the people; the Chinese are scattered among our cities that they may be taught.

In California, mission work began among the Chinese at a very early period. It was a time, says Dr. S. L. Baldwin, in The Gos. vel in all Lands, when they were gladly wel. comed by all classes, and when the city of San Francisco was rather proud of its Chinese population, whose gay banners had a conspicuous place in the procession which celebrated the admission of California into

the Union.

It was in 1852 that Christian people of all denominations joined in purchasing a site and erecting a substantial building in that city, to be occupied as a Protestant Mission House for the Chinese. After a time this property came into the possession of the Presbyterian Board of Mssions. Rev. Dr. Wm. Spear, who had been a missionary at Canton, the region from which the Chinese immigrants came, was put in charge, and devoted himself zealously to the work. He organized a church in 1853, which was the first in America. This misson is not only the oldest, but one of the strongest and most successful in California. It has conducted its work by preaching in the chapel, by visiting the Chinese at home and in their places of employment, by preaching to the Chinese in the surrounding country, by the work of colporteurs, by Sunday-schools and evening schools, and by instituting a home for poor distressed Chinese women. In 1876, this church had received eighty members, whose character and conduct as faithful Christians were beyond reproach. Up to that time forty six Chinese had been received into other Presbyterian churches in the surrounding country; and about one hundred and forty souls have been converted among the Chinese.

During the past two years much valuable work has been done by the Presbyterians on of Christianity into heathen homes, a considerable number have died; some have emigrated to other parts of our own country. There are two hundred and fifty members

now on the Pacific coast.

The Baptist, Congregationalists and the Methodist missions have done valuable work among these people.

In many of the principal cities of our country, Christian work is being done for looked or neglected. Kindness and willing. ness to take pains in teaching them the English language will, in almost all cases, have met with a good reward.—The Mis-

A LARGE meeting, representing men of all denominations, and from all parts of the world, has been held in London to take into consideration what can be done to prevent the domoralization of native tribes by the liquor traffic. Members of Parliament pledged themselves to use their best efforts to mitigate the evil, and it is reported that since this meeting a conference of members of Parliament has been held to further consider the subject, and to devise plans for some effective action against this abomniable traffic. England and America are not guiltless in this matter, but Germany is the chief offender. It appears that Germany sends to Africa ten times the amount of spirits exported from Great Britain. It is not for Christians to say that nothing can be done to overcome this evil. Whatever ought to be done can be done, and God is on the side of those who throw themselves into any effort that is wisely made for the suppression of evil. Africa is being wasted by the destructive liquors sent from so-called Christian lands. It is for Christan nations to stop the traffic.

In the Standard of July 16th appeared an article from the pen of Bro. S. C. Humphrey, bearing the title, "Sabbath and Lord's-Day" which the writer of this proposes to review in a spirit of love, hoping that he may be able to point out the brother's mistake and render assistance in the direction of removing the pernicious results of disregarding the sanctity of the Lord's-day.

The Sabbath not an exclusively Jewish institution. The foundation argument of our brother's paper is that the Sabbath was exclusively a Jewish institution. This cannot be, because

(a) The very reason assigned to the Israelites as the ground of its obligation was that God had sanctified it from the beginning of human existence. "Six days shalt thou labor and do all thy work: but the seventhday is a Sabbath unto the Lord thy God: in it thou shalt not do any work; . . for in six days the Lord made heaven and earth, the sea and all that in them is, and rested the seventh day. Wherefore the Lord blessed the Sabbath day and hallowed it." Ex. 20: 9-11. Here the statement is made, as in Gen. 2: 1-3 that God blessed and nallowed the seventh-day centuries before there was a Jew in existence, and it was sanctified for the world of mankind and not merely for a little portion of it two thousand years distant in point of time.

(b) The Israelites were bidden to remem ber the Sabbath-day to keep it holy. It was not spoken of as an institution brought to their notice for the first time like the Passover, but as of a distinction which had been recognized in the past, and which they were to continually remember as having been instituted from the beginning when God fin-

ished the work of creation. (c) It was not a ritual institution like the shadowy code of exclusively Jewish forms and observances. It stands in the midst of nine other grand moral enactments which are world-wide and time-lasting, and it is false reasoning which argues that this one institution has been abrogated by the gospel system when there is not one jot of testimony to that effect. It always has been, for any man to steal or kill, or covet or commit adultery. These things are fixed and eternal principles of righteousness, and he is a bold man who will take up one of the equal decrees of the Decalogue and declare it to be null and void when God Almighty has nowhere said so.

The Son of God emphatically stated that the heaven and earth should pass away before one jot or tittle should pass from the law till all should be fulfilled. The types of the law were fulfilled in and by him, and their observance ceased to be obligatory by reason of statutory limitation; but Jesus Christ never fulfilled the moral law in such a way as to render it nugatory or as releasing mankind from its observance. Paul, who is quoted by the brother as arguing against the perpetuation of the Sabbath, and who, in his contentions with the legalists of his day, made use of very strong language against the error of regarding the law as a ground of made void through faith. "God forbid. church wrested the argument against legalism into license to indulge in sin, James and obligation of the moral precepts of the Deca-8-18; I John 3: 4.

(d) The Israelites were commanded to observe the sanctity of the Seventh-day before the law was given at Sinai. Here we must positively contradict our brother's statement that the obligation to observe the Sabbath depended solely upon the fourth commandment. The law was not given until the third month of their journey from Egypt. Ex. 19: 1. Yet the observance of the Sabbath was commanded in connection with the gathering of the manna in the second month. Ex. 16: 1-26, etc.

The Israelites were not to rest on the Seventh-day because they were Jews, but because they were men and obligated thereto with the rest of mankind.

THE NATIONAL ASPECT OF THE SUBJECT.

There are two living questions which at this time are exciting attention and which will not down. One is temperance and the other is the Sabbath. They demand careful thought and thorough investigation. In considering them, dogmatism and intolerance should have no place. On the other hand, they demand unwavering decision and unflinching adherence to what one believes to be right. Sneers and ridicule aimed at those who are guilty of manifesting such indignities. There may be margin for difference of opinion in certain details even among good men. There must be a patient and ment to proper views and to educate the people up to higher conceptions of truth and at command, confirm this statement. Take,

duty. In the discussion of these subjects, however, there are certain facts which cannot | viz., be denied; facts of history and facts of the

With regard to Sabbath-observance, we lesire just here to urge one point, viz., that this subject has a national aspect. We are convinced that the proper regard for the Sabbath is one of the signs and conditions of true liberty and prosperity to a nation.

Some years ago the British Parliament appointed a committee to investigate the question whether it does men any good in this world to observe the Sabbath. The committee questioned many men of different trades and professions and reported that if there were no religious idea connected with the Sabbath yet for the sake of the material prosperity of the nation it ought to be observed.

Judges and juries and court-houses and jails and penitentiaries and police forces and armies are powerless to stem the tide of vice unless there be a restraining moral sentiment among the people. A proper observance of the Sabbath is the most effective way to establish the bulwarks of a true moralty. The Sabbath is the nation's moral pulse. As nations have no future, their retribution comes in this world. A Sabbath-breaking country will sooner or later be cursed by God. History verifies this statement. So fully is the Queen of England convinced of this that she is scrupulous in the observance of the Sabbath, not allowing matters of state to enroach upon holy time even if presented by the nobility. Is not America fast becoming Sabbath-breaking nation? In so far as our grand country obliterates God's day, just so far does she seal her own doom.

We quote the above from the Central Baptist, and with most of its statements we hear tily agree. In a much larger sense than the Baptist means, do we think the question is a more extensive than the Baptist thinks. It wisely sees that a Sabbathless people soon becomes a godless people, but seeks to avert the danger which it sees impending, by trying to persuade men to sacredly observe a day which God never blessed nor commanded to be observed. The inherent feebleness of the effort is so plainly seen that only such as are tied down to their traditional faith and practices are moved by the effort. And so the tide of godlessness consequent upon Sabbathdesecration continues to rise, and can be stopped only when men, in conscience, turn and will be, wrong for any man to serve back again to the observance of the Sabbathidols. It always has been, and will be, wrong day which the Lord blessed and sanctified. It always has been, and always will be, wrong | which Jesus and his apostles observed with-

RELATION OF THE SALOON TO POLITICS.

From the Address of Hon. William Windom, at

Woodstock, Conn., July 4th, 1887.

The statement would perhaps be more accurate to say, the relation of politics to the saloon; for in most of our cities the drinking saloon is the central power around which politics revolve, and which dictates candidates and party policies. THE ENORMOUS WASTE OF PROPERTY AND

It is estimated upon the best attainable authority that this tyrant's revels cost annually more than \$700,000,000; that 500,-000 victims, rendered worse than useless, are staggering along in his triumphal procession to dishonored graves; and that his army of immediate retainers—the makers and venders of "liquid fire"—numbers 500,000 more.

Estimating that this million of makers, venders and victims, if engaged in some legday, we have a loss in productive power of \$450,000,000 per annum, which added to the \$700,000,000 wasted for strong drink makes a total of \$1,250,000,000. Add to this taxation—estimated at \$100,000,000—for the support of jails, criminal prosecutions, penitentiaries, almshouses, pauperism, and all the unumbered burdens imposed upon the counas the annual cost of his reign. How does this compare with the administration of King George, or with the tax on the historic tea that a century ago was put to steep in Boston harbor?

Let it be borne in mind that this burden rests most heavily upon the poor, who are least able to bear it. It is doubtless true that a large portion of it is borne by the rich and prosperous, but if only one-half of it falls upon the wage-workers of the nation there is an opportunity for an Anti-Poverty Society with possibilities beyond the wildest dreams of Mr. George and Dr. McGlynn. Mr. Powderly, in a recent speech, said, "In one Penn sylvania county, in a single year, \$17,000, 000 was spent for liquor, and it was estimated that \$11,000,000 of the amount came from workingmen." The savings that could be made through an Anti-Saloon Anti-Poverty Society would in ten years buy half the national one. Sabbath-breaking is vastly farms in the United States, and in fifteen years more furnish a fund large enough to purchase every railroad in the country and pay more for them than their actual cost. RELENTLESS CRUELTY OF THE LIQUOR POWER.

> Thousands of victims go annually to the drunkard's grave. Pestilence and war combined do not, in this country, equal its destructive energy. I repeat what I have had occasion to say elsewhere, that the waste of human life wrought every five years by our 200,000 saloons is equal to the destruction of the background. The home and the ballot are the very cornerstones on which our free institutions rest the very holy of holies behind the sacred al tars of freedom. It openly proclaims its purposes to disobey all laws which interfere with its supreme purpose to make money in its own way, and at whatever sacrifice?

POLITICAL CORRUPTION.

The corrupt use of money is, in my judgment, one of the most dangerous evils which now threaten the future of this Republic. It is the blighting, festering source of many of itimate business, could have earned \$1 50 per the other evils of which we complain. It is sapping the very foundations of public confidence and respect for law by polluting the sources of political power. It stalks with brazen face into our legislative halls and with scarce a pretense of concealment dictates our laws. It too often corrupts the press and changes truth into a lie. It is the ready and well known instrument by which try by this tyrant, and you have \$1,350,000,000 individual wealth and corporate power aggrandize themselves at the expense of the people, and by which giant evils maintain their hold upon society. Let it be generally understood and acquiesced in, that elections depend not upon the free will of the people but that their results are purchased with money, or whisky, and the end of free institutions is not far off. Upon the ruins of Judea is written "Idolatry," of Greece and Rome "Sensuality," of Spain "Avarice"; and upon the ruins of this great republic will be written "Corruption," unless there be virtue enough in the people to rescue it from the bottomless abyss toward which its steps are tending. Combine and aggregate all the other corrupting agencies and influences of our times and they are dwarfed beside the liquor power. Indeed, but few of the other methods of corruption are complete without it. I know of no other agency which openly proclaims its right and its purpose to control elections and to prevent the passage of distasteful laws by the use of money.-Independent.

INDUSTRIAL EDUCATION IN THE MINNEAPOLIS

A manual training school, under the instruction of Prof. F. W. Decker, has lately been established by the school board of the city, in connection with the high school, and results have already been obtained that promise well for the success of this new enterprise.

The object of the course is not to make finished mechanics in any definite trade, but rather to give a general training that shall serve to render boys familiar with common tools and materials of construction, and lay a good foundation for any one of the several mechanical trades.

The course serves also to correct some of the popular notions among boys that manual occupations are degrading, or at any rate not so respectable as occupations requiring only book knowledge. This latter result is attained by placing the manual training course on an equal footing with other high school courses, and requiring the same attention to system and order as in any branch of knowledge taught.

The course for the present term is wood-

A large lower room of the high school building has been fitted up with benches and drawers and a variety of wood-working tools.

Each bench is provided with a full set of bench tools, and each boy has, besides, a number of edge tools and a drawer in which to keep them locked when not in use. Each boy is required to keep his individual tools in order, and all the bench tools have their proper places on a rack in front, where they must be placed at the end of each exercise. The benches and bench tools are lettered to correspond, so that it is easy to see at a glance that everything is in its proper place.

The use of tools is taught in the following manner, it being assumed there is only one There are some facts which the panegvrists right way. The boys are given a plane, for of the Victorian epoch in this jubilee year instance, and after being shown the nature have not seen fit to dwell on; and especially and construction of the tool, they are shown the effect of fifty years of England's proghow to use it properly. All this is taught to them as a class. They are then given each a piece of board and are required to produce a plane surface, each being drilled until he is tolerably proficient in the use of the tool before being allowed to go on. Sawing is taught in a similar manner. The saw is first discussed, and the reason for the teeth being shaped differently for cross-cut and saws is pointed out. A board is ther marked with a scratch awl, and the class is shown how to saw to line accurately. They are then required to saw to given lines until the lesson is thoroughly taught. By keeping the attention of the pupils on one operation at a time and holding it until taught, rapid and sure progress is made. After the uses of a few of the most common tools is taught, the boys are allowed to construct something that will bring into use only operations they have previously learned. This serves to make the work interesting, though the work is designed to be for the purpose of instruction rather than construction.

Whenever an article is constructed, it is done from an accurate working drawing made by the pupil himself, and thus the value of drawings, in connection with all construction work, is taught better than it could otherwise be done.

Each pupil is required to spend forty minutes per day in the drawing room and eighty minutes in the shop. Drawing is taught in much the same manner as the use of tools just described, and it is found that the two branches of work go very nicely together. It was first planned to provide for a class of eighteen only, the class being in three divisions of six, each division spending, as before stated, eighty minutes in the shop and forty minutes in drawing.

The work at once became so popular, however, that the limit was increased to thirty, with several more anxious to join the class, is already talked of, to provide in near future.

Some additional statements concerning fares to Conference will be found in our Special Notices, on page 8, this week. A careful study of all these statements will answer all questions which the Secretary is able, so far, to answer. Examine your routes, decide what you want, and then write to the Secretary, L. A. Platts, Alfred Centre, N. Y., and he will send you whatever documents you will need.

THE great achievements of the world are, as a rule, made by men who have a "genius for hard work." Brilliant men do not stand for much in the hard and long pull for success. So in the church of Christ the call is for men who know how to take off their coats and remain in the fields all day long, through summer's heat or winter's cold. The call of the Master to all his servants is, "Go work in my vineyard."

THE Corresponding Secretary of the Sab bath-school Board, Rev. T. R. Williams, requests us to urge those superintendents who have not yet reported their schools to him, to do so without delay; also to say that if there are any new schools which have not received the blank reports, or if any school has been overlooked in their distribution, he will be glad to supply them, on notice of the same. Superintendents who wish to have their schools appear in the annual report must attend to this matter promptly.

Solomon says, "A word fitly spoken is like apples of gold in pictures of "silver." This proverb is having an illustration in the interest which is being awakened in respect to the school work in our China mission. A letter just received says, "Sister Davis's appeal in behalf of our China Mission has aroused the sisters of the —— church, and we are organizing a woman's society here to help." The letter is a private one, and the writer expresses the hope of being able to report something from this effort soon; for this reason we withhold the name. The incident is interesting, both because it is an indication of the rising tide of interest in this good work, and because it shows how a word spoken in the love of the Master and of his cause will take root and bear fruit.

THE UNIVERSAL REMEDY. .

We are hearing not a little in these days about the New Theology. If by this muchused phrase we mean merely human opinabout it. At the same time it is well to remember that some things are settled beyond that are no more affected by human speculations than is the usefulness and power of Presbyterian Churches of Merrill. light in the natural world affected by the theories of men respecting its nature and origin. Among these is the fact of sin and death, on the one hand, and the possibility of salvation and life through Jesus Christ, on the other hand. Whatever men may think about it, it is a fact for all time and however we may theorize about it, the doc- Mrs. G. W. Witter , Wausau, Wis. The de- son county, N. said. "Neither is there salvation in any other; for there is none other name under heaven given among men, whereby we must be saved." Sin is the universal experience; the same in all ages of the world; and God's remedy, in the person and work of his Son, is a remedy for the fundamental condition of heart, and not merely for the accidental circumstances of any particular time or place under which sin may be committed. So long, therefore as men have sinful hearts, God's remedy will be suited to the malady, whether they be lieve in the New Theology or the Old.

Dr. Herrick Johnson once put this truth in a beautifully clear light by means of this striking comparison: "Is the sun adapted to the flowers of to-day? Did God make a mistake about the sunbeams when, by his potent word, 'Let there be light,' he flung them into space at creation's dawn? Did he create a sun that would need to be changed every few centuries to adjust it to the changing flora? Or did he make a sun so adapted to the inner and essential structure of the floral world and flowers, whatever their form or texture, could joyously bathe in its light and heat?"

So, let us reverently ask, did God offer a local remedy for sin when he sent his Son into the world to save sinners, subject to such modifications as the changing fancies of men to the word of prophecy, in Jerusalem, a moving to Dakota, returning in 1861 to fountain for sin and uncleanness, in which Friendship, N. IN MEMORIAM.

Mrs. Prudence C. Coon.

MRS. PRUDENCE C. Coon, whose decease at | Merrill, Wis., was recorded in a recent number of the RECORDER, was born in Charleston, R. I., Sept. 24, 1813, and died of heart disease, Aug. 16, 1887. When he was told of her death, he said: "I have nothing to live for now; I want to go too; she is past her suffering, and I wish I was."

> She made a profession of religion when about twelve years of age, and was baptized by Eld. Daniel Coon, and united with the Second Brookfield Church, afterward with the church at West Edmeston, and about 30 years ago with the church at Nile, N. Y., of which she was a member at the time of her death. She came to Merrill from her home in Nile on the fifth day of last February, the illness and consequent helplessness of herself and husband making it necessary that each should receive the loving watch-care of their respective children; a separation which was painful to her husband, and only less so to Sister Coon because of her failure to realize it, on account of her weakness of body and mind, owing to something like a paralytic shock which she had received.

Thus in the bonds of wedlock and of true ffection these two lives have been brought together in the experience of life's common cares and duties. And when disease with its consequent prostration came to them, it came first to the one, and then within a few days to the other. Thus contemporaneously they have been suffering and moving down the declivity of life; and as the gray locks of the one sweep the borders of the grave, the other, waiting as it were but for a moment, follows on the same celestial track, and now another state of existence claims them both. These and similar circumstances of companionship suggested the text at our brother's funeral, which partook of the character of a double funeral. These services were held Sabbath-day, Aug. 27th, at the Seventh-day Baptist church, Nile, N. Y. Two of the hymns sung were selections used at the funeral of Sister Coon but a few days privious, viz., "Asleep in Jesus," and "Safe in the arms of Jesus." NORWICH, N. Y., Aug. 22, 1887. To the readers of the RECORDER:

Dear Brethren and Sisters,-I have often had to refuse promises of letters to those of you whom I have visited, fearing I could not fulfill them all. And now I want, in this way, to reach all such, and as many more as possible, because I have something to communicate which I have no right to withhold. It is a little experience in a matter to which the burdened officers of our societies have faithfully called our attention, that of "Sys tematic Giving." I have ever felt intensely the pressing calls to enter the fast opening fields of usefulness which God is placing before us as a people, and I have very ear nestly desired an increase of means to do my part. Perhaps the treasurer of the Tract Society and others may remember my asking them to pray for this, which I have received to some extent, though not up to my ideal. But I am rich in joy, and have found that faithful stewardship, added to our ordinary diligence, will reveal to us pecuniary capa bility which we were not sure we possesed. I had always intended to do more in proportion for God's cause than I did for myself, but on returning from Conference at Alfred I commenced keeping a strict tithing account, even to the fraction of a penny. THE ROGERS' BEUNION IN BROOKFIELD, N.Y.

The reunion took place at the farm residence of George W. Stillman, in this town, Aug. 24th. The writer was present as a visitor for a brief time only. The historical sketch written by Mrs. C. T. Rogers, of Preston, and read on the occasion, presented some very interesting items. The Rogerses of this family were direct descendants of John Rogers, who was burned at the stake by the fires of Smithfield, by order of Queen Mary, in 1555. The first to come to America was James Rogers, believed to be the son of John Rogers. He landed in Rhode Island in 1635. Soon after, he settled in Stratford in Connecticut. Eld. "LET JERUSALEM COME INTO YOUR MIND.

NUMBER V.

BY REV. THEO. L. GARDINER.

"Remember the Lord afar off, and let Jerusalem come into your mind." Jer. 51: 50.

Last week I tried to show the folly of leaving God's cause and the spiritual needs of our families out of the question when we locate our homes. The influence of outside surroundings upon the future of the family was clearly set forth. I believe that he who has the kingdom of God at heart will be very careful where he plants his home. But the question of locality and surroundings is not all. The man or woman who contemplates are about outside influences. After one has given his heart to God, then the next most important step in life is when one chooses the life-companion who is to share the home, and help to make it.

there, and make the moral atmosphere for on earth suggest the blessed home above. the family, they do oftentimes settle the question of their eternal destiny and that of their offspring.

Yet how many there are who seem to enter into this most solemn engagement upon a mere boyish caprice! It is regarded as a mere trifling affair, to be laughed over and joked about, when it ought to be a question of serious thought and earnest prayer to God. Indeed it is clear, that if ever one needs divine guidance and heavenly light, it is at this critical pass in the lifejourney. Jerusalem should come into mind then, if ever, and God's people of to-day should profit by the lessons he taught Israel of old, wherein he so strictly enjoined that they choose them husbands and wives from among the people of God. The overwhelming ruin that followed, in those far-off days, every family, and even the nation, that disregarded his commands, ought to speak with wonderful emphasis to the hearts and consciences of the children of God's people sults are just as serious. Yet the color of a repartee of a ready wit, the glitter of a mere flirtation, the splendor of a dashing "turnout," the pleasing address, and easy ways

> Again, where a Christian is joined for life with an unbeliever, or an open sinner, no matter how much (if it be a wife) she may trust in her Redeemer, nor how confidently she may hope to follow him, if she sees her husband move away from her side at their first communion service, there must certainly come a shadow upon her heart that forbodes ill for the future peace of her home. For though the separation may not seem so great in the eyes of men, yet in God's sight there is "a great gulf" opened between their souls. Two cannot walk together toward eternity if they go in opposite ways. Again: What will be the result if God blesses them with children, and entrusts the Christian to train for heaven? Will they be likely to take the Christian way of mother? Or will they walk in the irreligious path of father? The urgency with which Mr. Bowen, editor of the Independent demands of Prof. Smyth Scriptural authority for his views of restoration (see RECORDER for Aug. 18th, 1st page), leads me to ask whether Mr. Bowen is willing to give us the Scriptural authority for his observance of Sunday, as a Sabbath. I trust the RECORDER will ask him for his Scripture, and will press him as closely as he presses Prof. Smyth.

But, saith the historian Socrates, the providence member of that family with immortal souls of God provided better than the industry of Apollinarius and his son, by taking away that illiterate law with the life of him who devised it. As we read reports of droughts and severe warm weather in various localities, we feel grateful to the Father of mercies for his special kindness to us. We have had frequent showers during the season, and although some crops are not as large as usual, we have no reason for complaint. God's blessing upon us as a community has been very great.

Bro. G. H. F. Randolph, of the Theolog. ical Class, Alfred University, has been with us throughout the vacation, and, with Eld. J. Kenyon, has given the pastor constant and hearty support in his pulpit and other labors, for which he feels grateful. Bro. Kenyon, though not in any pastorate, is far from being idle in the Master's vineyard. He is almost constantly being called upon to preach funeral sermons far and near, having peen for many years acquainted with nearly everybody for miles around.

Improvement being the order in our society, a new drilled well on the parsonage lot is the recent result. The well is one hundred feet deep, with thirty feet of water. A new wood-house is now to be built for the benefit of the pastor's family. What the Independence Church will attempt next

Or the Obligations of Christians to God's Anicent

A sermon preached by Bishop William R. Nicholson, D. D. (of the Reformed Episcopal Church, Philadelphia), on the occasion of the opening of the recent Conference on Jewish missions, at the Hebrew Christian Church, 17 St. Mark's Place

TEXT.—"For he had told them that he was Jew."-Esther 3: 4.

(Concluded.)

Wherefore, as I have said, the very gospel we should preach to the Jew is in his own sacred books. He has drifted away from these teachings; still his God-given books are his inalienable heritage. Why did God write in them the foundation truths and principles of the salvation of Christ? Was it not for the Jew's instruction and blessing? And if he was at such pains to give them the symbols of that salvation, does it not argue that he would have us be at pains to make them acquainted, by his blessing, with the substance of the symbols? The fact that Leviticus is still God's book, that its record is imperishable—is it not calling upon us to show forth our appreciation of his wisdom and love in that great work, the ritual law? And if blindness has happened to the Jew, how may we, who know the gospel, more adoringly indulge our interest in the works of God, than by doing what we may to lift the veil from the eyes of the Jew, and show him the wondrous things of his own Leviticus? "The works of the Lord are sought out of all them that have pleasure therein."

This fact of the Jews' having the gospel in there own records bears materially upon the character of gospel-work among them. They and the gospel-worker meet together on the common ground of the divine authority of the Old Testament Scriptures. If the Jew object, and place himself in opposition to the gospel, then his own guns are turned against him. So that, if only his attention has been won, nine cases out of ten he will him self be won. The art of gaining his attention, then, is what we Christians should study and cultivate. Ay, but there's the rub, you say. The Jew is so set against Christians, he will not listen to them. But who made him so? Who petrified him? Is it not beacuse of the grievous wrongs done they not harried him, and battered him, and impaled him on their sharpest hatreds? | true, but every man a liar!" So much the more, then, should we not be conquer all. The traveler's cloak is drawn tighthly about him while the wind blows sun burst forth, and at once the cloak falls. Love is sure to win attention, and thousands arms of Jesus.

3. To the Jew we Christians owe a debt of gratitude bigger than can be measured.

Christianity itself, under God, derives from him. The New Testament is the child of the Old Testament. At the same time it is the developed manhood of that pictureloving babyhood. It is that bud in full blown flower; that germ in ripened fruit. It speaks with the same voice, only more articulately, and with richer strength, and sweetness of tone. Our Christ is the realization of the Jew's Messiah; our gospel the realization of the Jew's Leviticus. In particular we depend in part on the Jew's prophecies for identifying and ascertaining our Saviour. The foremost pointer to his identity, indeed, is the historically-proven event of the resurrection of Jesus from the deada demonstration of his Christhood sufficient in itself. But when in ancient predictions, ages antecedent to the appearance of Jesus, we read that Messiah should come—that he should be both woman-born and Virgin-born, God and man together—that he should come at a certain time, be born at Bethlehem, of the seed of Abraham, of the tribe of Judah, of the house of David—that he should do wonderful works—that he should suffer and die for sins of men, should die on a cross, be cruelly mocked and derided, have vinegar and gall offered to him, his garments divided, and lots cast for his vesture—that he should cry out in agony, "My God, my God! why hast thou forsaken me?"—that not a bone of him should be broken, while vet his side should be pierced—that he should die with malefactors, and yet buried honorably—that he should rise from the particulars equally minute and identifying, then confirmation is doubly confirmed, almost redundant becomes the demonstration, the "head of the corner" is lifted to place "with shoutings," yet more triumphant, of "grace, grace unto it."

To the Jew's moral law we are indebted for the revelation of us to ourselves and the realization of our need of a Saviour. Prohibitions and precepts abound in the New Testament, but they are all emanations from the one moral law; the same that was thundered from Sinai for the purpose of convincing of sin. To the Jew's ritual law we are indebted for God-given, vivid illustrations of the salvation by Christ. And this is no. slight gain. Certainly the New Testament teachings of salvation are of the plainest, and, what is more, are the expression of salvation accomplished; but not sel-

WAS IT LUCK?

BY L. V. P. COTTRELL.

(A true incident of the Chatsworth wreck.) To go back to "old DeRuyter" once more had been a wish long indulged in the heart of Deacon Niles S. Burdick, West Hallock,

naturally affectionate disposition, like "still waters that run deep," and a fondness for old associations such as usually accom. panies the musical temperament, this long. cherished hope was ever with him.

Now, after a lapse of twenty-nine years. an opportunity to realize the precious though vague hope seemed at hand, for it was advertised, by the Toledo, Peoria & Western road. on August 10th, at 7.15 P. M., that an excursion train would run from Peoria, only seven. teen miles distant, to Niagara Falls for \$7 50 This would take him two hundred and thirty miles from DeRuyter, and \$13 00 would take him there. His eldest son being now competent to run the blacksmith shop, which had confined him closely all these years, the temptation was irresistible: he decided to go!

The aged father, Elder Sibeus Burdick. was in poor health at this time, having suffered more or less with neuralgia for nearly two years, and beginning to feel, as he says. that "the time is nigh" for him to be "laid away." He suffered much anxiety lest some. thing should happen to his son if he went. but he said, "You've been such a good boy I can't oppose it."

Accordingly the deacon went to Peoria to stay the night previous to the excursion. But the train was, by misprint, advertised to go in the morning; it did not go until even. ing, and the following is an account of how he spent the day, in nearly his own words, in a letter to his sister, Mrs. L. E. Hammond. Nortonville, Kan..

"As I had to stay all day in Peoria, I had a chance to think of everything. It was terribly hot, so I put up at a hotel, that I might lie down during the day, and not be tired and sleepy on the train. While I rested I thought of how I would get off the cars down by the old stock company buildings, or where they used to be; and I would walk around to the old home, and get a drink from the old well, and go into the house; then I would go past B. G. S.'s, and see if I could see any one I knew, and so forth; you can better imagine my feelings than I can

Well, after killing time till after 2 o'clock, I took my satchel and went to the depot and waited until 5 o'clock."

Here he thought over the many ways he might use the \$20 for the comfort of his family of six children. He remembered how her mother was ill, but sacrificed her longing for the sake of the loved ones at home. And he thought: "I am no better than my wife. I will give up going to old DeRuyter."

Retracing his steps, he found neighbor J. G. Spicer in town and rode home with him, arriving after bed-time. He called his folks to let him in, and writes: "they did so very willingly." In the morning he went to his father's room. He was asleep. "When l said, how do you come on? he turned over in astonishment, and said, 'O Niles, I never was so glad to see you."

To the ends of the nation the news of the terrible wreck of that ill-fated train has traveled. In the annals of time no such horrible railroad disaster has ever, before been recordman beings, were wrecked, killing nearly one hundred persons outright, and wounding. nearly twice that many. Whole families and parts of families were thus suddenly and awfully dashed into eternity. Wife lay wailing for husband and husband for wife. Children were bereaved of father, mother, or both; parents of children. A long journey from which none ever return it was to many

"There never was a battle-field comparing with that wreck for horror," said an old soldier, one of the excursionists. "Mangled bodies of children, and dead mothers with dying bakes upon their breasts, I never saw in military life."

In Peoria especially, the catastrophe was the single theme of conversation for many for some of the noblest Christians of this days. First there was wild, harrowing suspense, then tears and cries of the bereaved,or joyful weeping over the restored. Business received only a pretense of attention. Here and there a store was closed, and crape fluttering on the door to tell why.

Let us return to the aforesaid letter:

"Since I commenced writing I have heard something that makes me feel-well it almost makes the chills run over me. Early next morning, after I returned, Mr. Butts and Vars went to Peoria. When they heard of the accident they supposed I was on the train, either killed or hurt, as nearly all daycoaches were smashed to pieces. So they went to the depot to wait for the relief train; but I was not among the wounded, so they thought I must be badly hurt or killed. Mr. Vars decided to stay all night, for the next train was to bring the dead and those too badly hurt to come earlier. Mr. Butts came home to get a team to bring me home, but found I had come home, and said he was

LIVE COALS.

One live coal is enough to start the fire. If there be combustible material adjacent, a blaze will spring up speedily. If only cold, unignited coals touch it, they will be kindled in time, if you can only keep your single coal alive. So one person in a family or a Sab- ther tries pretty hard when a child asks for bath-school class, in a whole church or even help;" and this father did try, so that the rea community is enough, if he be truly the nown of his achievements as a maker of lenses servant of Jesus Christ, to cause agreat religious awakening. Many and many a time this truth has been illustrated. The one solitary believer, comprehending his solemn responsibility and his infinite privilege, has been burdened by anxiety for the conversion of souls. First striving by self-examination, penitence, confession of sin and the the farm until he reached his twenty-second reform of what has been amiss in his life, to | year, and then, having by his own endeavors hinder the grace of God from flowing freely cured a position as a calico engraver at through him as its channel of influence, he Lowell. TWO LOSSES TO SCIENCE.

This week we have to chronicle the deaths of two leading American scientific men: Spencer F. Baird, born at Reading, Penn., Feb. 3, 1823, died at Wood's Holl, Mass. on Aug. 22d. Alvan Clark died the same day | three volumes, as follows: at his home in Cambridge, at the age of eighty-three, having been born at Ashfield, Mass., March 8, 1804. Baird was from youth interested in natural history, and so devoted his time and energies that he was early an honored companion of the best. His executive powers finally led to his being singled out as a fit head for first one and then another of the rapidly growing government scientific organizations, and it is for his good conduct of these affairs that we now best know him, and for which he received the sincere respect of the republic. Of Clark it might be said that we came near losing him. He was forty before he began his life-work which made him famous. His oldest son, as many a boy has before and since, wished a telescope, and, per force of circumstances, must make it. He asked his father's help in grinding and polishing the piece of speculum metal he had obtained for his reflector. The father had never seen a mirror or lens ground and polished. But, as he once said, "a fais world-wide.

Mr. Clark had been in his usual good health up to a fortnight ago, when he complained of illness, and though no disease of an organic nature appeared, he gradually failed, and death resulted from old age. He was essentially a New England man. He labored on cleanse himself of everything which could acquired considerable skill at painting, sethat God would bless his endeavors with at Lowell, designing patterns, a part of that time being employed at other establishments

His pictures of the late Dr. Hare of Philadelphia and that of Dr. Hill of Cambridge are specimens of his skill and taste. At the house on Brookline Street there are a number of specimens of his art, among which are the faces of Daniel Webster, Constable Clapp, renowned in his day as a skillful detector of crimes, and of a son who died when a youth, painted from memory. During this time sons and daughters were born to him, George B. in 1827 and Alvan G. in 1832, both of whom are living.

He began with his sons in 1846 the manufacture of telescopes. The younger son, not even be called influential in the community. You may be only a poor, obscure old

The war prevented its sale to the southern college, and it was finally purchased by the University of Chicago. Then followed the construction of two glasses of twenty-six inches each, one being disposed of to the University of Virginia and the other placed in the observatory at Washington. Their reputation rapidly spread through Europe, and orders came faster than they could be filled. The number of instruments they have made is very large. The cheapest one cost \$300, while the national telescope was sold for \$46,000, and the cost of the Lick glass was set at \$50,000 without the

TWO LOSSES TO SCIENCE.

This week we have to chronicle the deaths of two leading American scientific men. Spencer F. Baird, born at Reading, Penn., Feb. 3, 1823, died at Wood's Holl, Mass., on Aug. 220. Alvan Clark died the same day at his home in Cambridge, at the age of eighty-three, having been born at Ashfield. Mass., March 8, 1804. Baird was from youth interested in natural history, and so devoted his time and energies that he was early an honored companion of the best. His executive powers finally led to his being singled out as a fit head for first one and then another of the rapidly growing government scientific organizations, and it is for his good conduct of these affairs that we now best know him, and for which he received the sincere respect of the republic. Of Clark it might be said that we came near losing.him. He was forty before he began his life-work which made him famous. His oldest son, as many a boy has before and since, wished a telescope, and, per force of circumstances, must make it. He asked his father's help in father had never seen a mirror or lens ground

Mr. Clark afterward had an extenfire as if taken from the very altar of heaven sive correspondence with Mr. Dawes, and itself, by which the church and the whole spoke of his connection with him as the neighborhood will be kindled afresh into a closet friendship of his life. Soon after his return from Europe in 1860 he received the first order for a large telescope in this country from the University of Mississippi, the glass being 181 inches, three inches larger than any that had been hitherto successfully used in the world. The war prevented its sale to the southern college, and it was finally purchased by the University of Chicago. Then followed the construction of two glasses of twenty-six inches each, one being disposed of to the University of Virginia and the other placed in the observatory at Washington. Their reputation rapidly spread through Europe, and orders came faster than they could be filled. The number of instruments they have made is very large. The cheapest one cost \$300, while the national telescope was sold for \$46,000, and the cost of the Lick glass was set at \$50,000 without the mounting.

This was the work of a man who never had seen a lens in process of construction in the hands of any one out of his own shop. Mr. Clark was emphatically a self-made man. His only education was what he received in the public schools of western Massachusetts. His reputation was patiently, steadily, and justly earned. His extraordinary power seemed to be acuteness of the eye, of the touch, and of the understanding, combined with unlimited patience. Not long since he said: "I owe largely my recognition by the scientific world to Mr. Dawes. I had, as I thought, with one of my telescopes discovered several new double stars. I wrote to Dawes, asking him to verify my observations. He answered that they were real discoveries. reported other discoveries. Mr. Dawes wrote: "Where did you get your telescope?" "I made it," was my reply. I sold him that glass and five others."—Science.

INTRODUCTION.

This lesson forms the close of the Sermon on the Mount, and gathers up the main points that have been stated, and presses them upon the hearts and consciences of the hearers. When we consider the number and importance of the subjects connected together in this sermon, and the beautiful and forcible illustration, and finally the direct and solemn application of these truths upon the hearts of our Lord's hearers, we must admit that it is the most wonderful sermon ever brought to our knowledge. In studying this closing lesson of the sermon, we should carefully review the five preceding lessons, and their specific meaning and application.

EXPLANATORY NOTES.

V. 13, 14. Enter ye in at the strait gate; for wide is the gate and broad is the way that leadeth to destruction, and many there be which go in thereat: Because, strait is the gate, and narrow is the way, which leadeth unto life, and few there be that find it. These words introduce a new turn of thought as the concluding passage of the sermon. "The gate" represents the opening of the way which leads to the blessedness spoken of in the beginning of the sermon, and thus refers to the way by which one is to enter the Christian life. The exhortation implies great need of care in order to enter the right way. Having made this earnest exhortation, he proceeds at once to state the reasons for it. The way that leads to destruction is very broad, it is open all around one, but the way of life is narrow and easily missed, unless one is very careful to find it and to enter into it. This represents the inducements to carnal life, the constant appeals to the selfish motives, in contrast with the self-sacrificing which is required of a devoted Christian. Hence, constant vigilance is necessary for a true, godly life.

V. 15. Beware of false prophets, which come to you in sheep's clothing, but inwardly they are radening wolves. Among the most deceptive dangers in the way of a godly life is false teaching, presented to us under the plausable form of moral and religious instruction. Falsehood and infidelity in their naked form may be easily discerned, but when they are covered with the garb of morality and religion they may be mistaken for truth, and thus men are constantly liable to be deceived. On this account our Lord warned his disciples to beware of false prophets. In other words, they are to scrutinize very carefully the teachings that come to them and make themselves sure of their truthfulness.

V. 16-20. Ye shall know them by their fruits. These words bring out a simple and clear criterion by which true teachers and true teachings may always be known. There is no more positive way to determine known. There is no more positive way to determine the kind of a tree or plant than by the fruit which it produces. An apple grows upon an apple tree, it produces. An apple grows upon an apple tree, it labe died. She leaves five children motherless, till abe died. But a teacher without the life of Christ in his heart, whatever may be his professions, is sure to mature the elements of a selfish and carnal life. We are therefore to judge of teach. ers and of their teachings by the results that come in the form of character and works, which are revealed in all the intercourse and relations which men sustain with each other.

V. 21-23. Not every one that saith unto me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father which is in heaven. These three verses form a kind of half-paragraph, making a connection between that which goes before and that which follows, and at the same time expressing a definite thought. They extend the preceding thought, and intimate that even the professing Christian will not be accepted for his profession only, unless he does the will of God. The entrance into the kingdom of heaven doubtless refers to the coming into real fellowship and communion with God. The matter of making profession, saying "Lord, Lord," may be very distinct from actually doing "the will" of God. The acknowledgment of Christ as Lord-even the most earnest and emphatic acknowledgment in words-is not enough. It must be an acknowledgment in heart-life in the very fountain of all moral and religious action. There are Phansees who are full of profession, but fearfully empty of real godly life. Many men, then as now, counted upon their

external works and upon their external relations with other workers, while at the same time they knew nothing of the true motives and spirit of Christian life.. Our Lord says to such, "I never knew you, depart from me," etc. Our Lord, who beholds distinctly and constantly the condition of every human heart and every motive and desire in that heart, whether it be good or bad, can never be deceived by human professions or by nominally good works. He either knows a man to love and approve his heart-life, or he does not know him; in other words, knows him to disapprove and condemn his

V. 24-27. Therefore, whosoever heareth these sauings of mine, and doeth them, I will liken him unto a wise man, which built his house upon a rock, etc, 'These sayings" refer to the entire teachings of the sermon or discourse. They are fundamental to a true and holy character and life. Those who shall treasure them up in their hearts and be persuaded by the spirit of these truths shall build up characters GOLDEN TEXT.—Every tree that bringeth not forth good fruit is hewn down, and cast lustrated by the building of a palace upon a solid fitto the fire. Matt. 7: 19. rock, which shall stand unmoved through the storms of adversity and fiery temptations. But those men who discard these great principles of godly life, are constantly subject to disappointment, overthrow and destruction in all their p'ans of life. They are build. ing, as it were, their house upon the shifting sands of the sea shore, liable to be overthrown by any sudden storm that may come from the wide sea.

V. 28, 29. And it came to pass when Jesus had ended these sayings, the people were astonished at his doctrine. They saw in the lessons brought before them, something more and deeper than the Pharisees and doctors of the law had given them; something beyond even what they had heard from John the Baptist. Here was brought to their apprehension a kingdom which could be set up in men's hearts, a rulership of the divine truth in the affections of the human soul, which would give a permanency and nobility of character able to resist all the powers of eviland of destruction. Well might they be astonished with such a clear and forcible embodiment of the great eternal principles of the divine kingdom of God, which Christ had come to establish in the hearts of the children of men.

BEQUESTS TO TRACT SOCIETY.

The generous purpose of some persons to aid in the work of this Society, by gifts of money or other property, after their death, is sometimes defeated by some technical defect in the instrument by which the gift is intended to be made. It is necessary for this purpose that both the Society and the property. if other than cash, shall be accurately described. A will made in the state of New York less than sixty days before the death of the testator is void as to societies formed under New York laws. INTRODUCTION.

This lesson forms the close of the Sermon on the Mount, and gathers up the main points that have been stated, and presses them upon the hearts and consciences of the hearers. When we consider the number and importance of the subjects connected together in this sermon, and the beautiful and forcible illustration, and finally the direct and solemn application of these truths upon the hearts of our Lord's hearers, we must admit that it is the most wonderful sermon ever brought to our knowledge. In studying this closing lesson of the sermon, we should carefully review the five preceding lessons, and their specific meaning and application.

EXPLANATORY NOTES.

V. 13, 14. Enter ye in at the strait gate; for wide is the gate and broad is the way that leadeth to destruction, and many there be which go in thereat: Because, strait is the gate, and narrow is the way, which leadeth unto life, and few there be that find it. These words introduce a new turn of thought as the concluding passage of the sermon. "The gate" represents the opening of the way which leads to the blessedness spoken of in the beginning of the sermon, and thus refers to the way by which one is to enter the Christian life. The exhortation implies great need of care in order to enter the right way. Having made this earnest exhortation, he proceeds at once to state the reasons for it. The way that leads to destruction is very broad, it is open all around one, but the way of life is narrow and easily missed, unless one is very careful to find it and to enter into it. This represents the inducements to carnal life, the constant appeals to the selfish motives, in contrast with the self sacrificing which is required of a devoted Chris tian. Hence, constant vigilance is necessary for a true, godly life.

V. 15. Beware of false prophete, which come to you in sheep's clothing, but inwardly they are ravening wolees. Among the most deceptive dangers in the way of a godly life is false teaching, presented to us under the plausable form of moral and religious instruction. Falsehood and infidelity in their naked form may be easily discerned, but when they are covered with the garb of morality and religion they may be mistaken for truth, and thus men are constantly liable to be deceived. On this account our Lord warned his disciples to beware of false prophets. In other words, they are to scrutinize very carefully the teachings that come to them and make themselves sure of their truthfulness.

V. 16-20. Ye shall know them by their fruits. These words bring out a simple and clear criterion by which true teachers and true teachings may always be known. There is no more positive way to determine the kind of a tree or plant than by the fruit which

changeably. It is equally true of teachers and teach. ings. A teacher with the life of Christ in his heart matures elements of character which are in harmony with the life of Christ. But a teacher without the life of Christ in his heart, whatever may be his professions, is sure to mature the elements of a selfish and carnal life. We are therefore to judge of teach. ers and of their teachings by the results that come in the form of character and works, which are revealed in all the intercourse and relations which men sustain with each other.

V. 21-23. Not every one that saith unto me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father which is in heaven. These three verses form a kind of half-paragraph, making a connection between that which goes before and that which follows, and at the same time expressing a definite thought. They extend the preceding thought, and intimate that even the professing Christian will not be accepted for his profession only, unless he does the will of God. The entrance into the kingdom of heaven doubtless refers to the coming into real fellowship and communion with God. The matter of making profession, saying "Lord, Lord," may be very distinct from actually doing "the will" of God. The acknowledgment of Christ as Lord—even the most earnest and emphatic acknowledgment in words—is not enough. It must be an acknowledgment in heart-life in the very fountain of all moral and religious action. There are Pharisees who are full of profession, but fearfully empty of real godly knew nothing of the true motives and spirit of Christian life. Our Lord says to such, "I never knew you, depart from me," etc. Our Lord, who beholds distinctly and constantly the condition of every human heart and every motive and desire in deceived by human professions or by nominally good works. He either knows a man to love and approve his heart-life, or he does not know him; in other words, knows him to disapprove and condemn his heart life.

V. 24-27. Therefore, whosoever heareth these sayings of mine, and doeth them. I will liken him unto a wise man, which built his house upon a rock, etc, "These sayings" refer to the entire teachings of the sermon or discourse. They are fundamental to a true and holy character and life. Those who shall treasure them up in their hearts and be persuaded by the spirit of these truths shall build up characters true and stable, which may be in some measure illustrated by the building of a palace upon a solid rock, which shall stand unmoved through the storms of adversity and flery temptations. But those men who discard these great principles of godly life, are constantly subject to disappointment, overthrow and destruction in all their p'ans of life. They are build. ing, as it were, their house upon the shifting sands of the sea shore, liable to be overthrown by any sudden storm that may come from the wide sea.

V. 28, 29. And it came to pass when Jesus had ended these sayings, the people were astonished at his doctrine. They saw in the lessons brought before thom, something more and decrerchen the Pharisees beyond even what they had heard from John the Baptist. Here was brought to their apprehension a kingdom which could be set up in men's hearts, a rulership of the divine truth in the affections of the human soul, which would give a permanency and nobility of character able to resist all the powers of eviland of destruction. Well might they be astonished with such a clear and forcible embodiment of the great eternal principles of the divine kingdom of God, which Christ had come to establish in the hearts of the children of men.
